1. Nonviral Vectors: We Have Come a Long Way

1

Tyler Goodwin and Leaf Huang

1. Introduction

2

2. Chemical Methods

2

3. Physical Methods

8

4. Perspectives

11

Acknowledgments

11

References

11

2. Lipid Nanoparticles for Gene Delivery

13

Yi Zhao and Leaf Huang

1. Introduction

14

2. Rational Designs to Overcome Extracellular and Intracellular Barriers

15

3. Current Lipidic Vectors for Gene Delivery

18

4. Gene Therapy Applications

24

5. Pharmacokinetics, Biodistribution and Toxicity of LNPs

26

6. Clinical Trials

28

7. Conclusions

30

Acknowledgments

30

References

30

3. Nanotechnology for *In vivo* Targeted siRNA Delivery

37

James E. Dahlman, Kevin J. Kauffman, Robert Langer,
Daniel G. Anderson

1. RNA Potently Modifies Gene Expression

38

2. Targeting Strategies

40

3. Targeting the Liver

46

4. Targeting Primary Tumors and Metastasis

56

5. Endothelial Cell Targeting

60

6. Future Perspectives

62

References

64

4. Lipid Nanoparticles for Short Interfering RNA Delivery	71
Alex K.K. Leung, Yuen Yi C. Tam, Pieter R. Cullis	
1. Introduction	72
2. Challenges and Strategies for Delivery of siRNA	73
3. Lipid-Based Delivery Systems	78
4. LNP-siRNA Formulations in Clinical Trials	95
5. Future Prospects	97
References	102
5. Composite Nanoparticles for Gene Delivery	111
Yuhua Wang and Leaf Huang	
1. Nanomedicine and Gene Therapy	112
2. Composite Nanoparticles	113
3. Fabrication Methods of Composite Nanoparticles	113
4. Composite Nanoparticles for Targeted Gene Delivery	119
5. Conclusion	131
Acknowledgments	132
References	132
6. Multifunctional Enveloped Nanodevices (MENDs)	139
Yusuke Sato, Takashi Nakamura, Yuma Yamada, Hidetaka Akita, Hideyoshi Harashima	
1. Introduction	140
2. R8-MEND	142
3. KALA-MEND	154
4. MITO-Porter	159
5. YSK-MEND	172
6. SS-Cleavable Proton-Activated Lipid-like Material (ssPalm)	184
7. Perspectives	191
Acknowledgments	192
References	192
7. Lipid-Coated Calcium Phosphate Nanoparticles for Nonviral Gene Therapy	205
Matthew T. Haynes and Leaf Huang	
1. Recent Progress of Nonviral Gene Therapy and <i>In vitro/In vivo</i> Delivery Systems	206
2. LCP Nanoparticles as a Multifunctional Platform for Gene Delivery	210

3. Potential Therapeutic Applications of LCP: Cancer, Chronic Liver Disease, and Gene Therapy	219
4. LCP Nanoparticles: Conclusions	223
References	223
8. Polymers for Nucleic Acid Transfer—An Overview	231
Ernst Wagner	
1. Five Decades in Polyplexes: Challenges and Breakthroughs	232
2. Optimizing the Core: Biodegradable and Biocompatible Polymers	235
3. Optimizing the Shell: Bioinspired Smart Polyplexes	241
4. Next Steps: Multifunctional and Sequence-Defined Polymers	245
5. Perspectives	249
References	249
9. Recent Developments in Nucleic Acid Delivery with Polyethylenimines	263
Patrick Neuberg and Antoine Kichler	
1. Introduction	264
2. Mechanism of PEI-Mediated DNA Transfection	265
3. Proton Sponge: Myth or Reality?	268
4. PEI for Gene Delivery	273
5. PEI Derivatives for the Delivery of Exon Skipping Oligonucleotides	277
6. PEIs for siRNA Delivery	278
7. Conclusion	282
References	282
10. Bioresponsive Polymer-Based Nucleic Acid Carriers	289
Hiroyasu Takemoto, Kanjiro Miyata, Nobuhiro Nishiyama, Kazunori Kataoka	
1. Introduction	290
2. Polymer Self-Assemblies for Nucleic Acid Delivery	292
3. Reductive Environment-Responsive Nucleic Acid Delivery	296
4. Acidic pH-Responsive Nucleic Acid Delivery	302
5. Other Stimuli-Responsive Nucleic Acid Delivery	310
6. Conclusion and Future Perspectives	314
References	314

11. Chitosan-Based Nanoparticles for Mucosal Delivery of RNAi Therapeutics	325
Alina Martirosyan, Morten Jarlstad Olesen, Kenneth A. Howard	
1. Introduction	326
2. RNA Interference	327
3. The Mucosal Barrier	330
4. Mucoadhesive Biomaterials	333
5. Chitosan	335
6. Chitosan/siRNA Nanoparticles	336
7. Chitosan/siRNA Nanoparticles for Delivery across Mucosal Barriers	340
8. Considerations and Future Perspectives	342
References	345
12. Polycation-Mediated Integrated Cell Death Processes	353
Ladan Parhamifar, Helene Andersen, Linping Wu, Arnaldur Hall, Diana Hudzech, Seyed Moien Moghimi	
1. Introduction: Cell Death Definitions, Guidelines, and Processes	354
2. Lysosomal-Related Cell Death	367
3. ER-Related Cell Death	373
4. Mitochondrion-Related Cell Death on Polycation Treatment	376
5. Cell Death-Assay Design, Considerations, and Interpretations	380
6. Safer Design of Polycationic Systems	384
7. Conclusions	387
References	387
