1. Lipidomics Applications for Discovering Biomarkers of Diseases in Clinical Chemistry

1

Ying-Yong Zhao, Xian-long Cheng, Rui-Chao Lin

1. Introduction	2
2. Definition, Classification, and Biological Function of Lipids	3
3. Lipidomics Methodology	5
4. Applications of Lipidomics in Clinical Disease Biomarker Discovery	13
5. Concluding Remarks and Perspectives	20
Acknowledgments	21
References	21

2. Enzymatically Synthesized Inorganic Polymers as Morphogenetically Active Bone Scaffolds: Application in Regenerative Medicine

27

Xiaohong Wang, Heinz C. Schröder, Werner E.G. Müller

1. Introduction	29
2. Bone Scaffolds	30
3. Bone Cells	39
4. Biogenic, Morphogenetically Active Inorganic Polymers	43
5. Enzymes Controlling the Synthesis of Morphogenetically Active Inorganic Polymers: A Paradigm Shift in Bioinorganic Chemistry	50
6. Biocalcite as Bioseed during Mammalian HA Formation	60
7. CA Activators as Potential Novel Drugs to Stimulate Bone Mineral Formation	62
8. ALP Activators—Potential Novel Compounds to Stimulate Bone Mineral Formation?	63
9. Applications for Bioprinting Organs	65
10. Concluding Remarks	67
Acknowledgments	68
References	68

3. New Insights into the Mechanism for VACM-1/cul5 Expression in Vascular Tissue <i>in vivo</i>	79
Maria A. Burnatowska-Hledin, Christopher C. Barney	
1. Introduction	80
2. Ubiquitin-Proteasome System and VACM-1/cul5	80
3. Tissue-Specific Expression of VACM-1/cul5	86
4. Impact of Hydration Status on VACM-1/cul5 and Aquaporins	88
5. Summary	94
Acknowledgments	94
References	94
4. The UNC-45 Myosin Chaperone: From Worms to Flies to Vertebrates	103
Chi F. Lee, Girish C. Melkani, Sanford I. Bernstein	
1. Introduction and Overview	104
2. Model Organism-Based Studies of UNC-45 Function	108
3. X-Ray Crystal Structures of UCS Proteins	123
4. Interactions, Mechanisms of Action, and Human Diseases	132
5. Concluding Remarks	139
Note Added in Proof	140
Dedication	140
Acknowledgments	140
References	140
5. Cell and Molecular Biology of Epidermal Growth Factor Receptor	145
Brian P. Ceresa, Joanne L. Peterson	
1. Introduction	146
2. Background	147
3. Fundamental Mechanisms of EGFR Signaling	151
4. Regulatory Mechanisms that Modulate EGFR Signaling	163
5. Concluding Remarks	168
Acknowledgments	168
References	168
6. Centrosomes and the Art of Mitotic Spindle Maintenance	179
Edward H. Hinchcliffe	
1. Introduction	180
2. Centrosome	185
3. Amphiastral Mitotic Spindle Assembly	188

4. Acentriolar Mitosis	191
5. Chromosome Instability	200
6. Conclusions	205
Acknowledgments	206
References	206
7. Dual Roles of Orphan Nuclear Receptor TR3/Nur77/NGFI-B in Mediating Cell Survival and Apoptosis	219
Gengming Niu, Lei Lu, Jun Gan, Di Zhang, Jingzheng Liu, Guangjian Huang	
1. Introduction	220
2. Dual Roles of Nur77 in Various Cells	221
3. Stimuli that Regulate Apoptosis/Survival via Nur77	235
4. Downstream Targets of Nur77	240
5. Signaling Pathways Involved in Nur77 Activity	243
6. Apoptotic Pathways Involved in Nur77-Mediated Apoptosis	245
7. Concluding Remarks	246
Acknowledgments	250
References	250
Index	259
