1. Morphogenesis of *Streptomyces* in Submerged Cultures

1

Dino van Dissel, Dennis Claessen, and Gilles P. van Wezel

1. Introduction	2
2. Morphogenesis in Submerged Cultures	4
3. Molecular Control of Liquid-Culture Morphogenesis	9
4. The SsgA-Like Proteins	16
5. Environmental and Reactor Conditions	20
6. Morphology and Antibiotic Production	25
7. Outlook: The Correlation Between Morphology and Production	29
Acknowledgments	32
References	32

2. Interactions Between Arbuscular Mycorrhizal Fungi and Organic Material Substrates

47

Angela Hodge

1. Introduction	48
2. AMF Hyphal Foraging Responses	49
3. Early Evidence of AMF Interactions with Organic Matter	55
4. Response by AMF to Organic Materials	57
5. AMF Influence on Organic Material Decomposition	71
6. Interactions with Soil Microorganisms in Organic Substrates	76
7. Interactions with Soil Fauna	80
8. Conclusions	87
Acknowledgments	88
References	89

3. Transcription Regulation in the Third Domain

101

Elizabeth A. Karr

1. Introduction	102
2. Sugar Utilization	105
3. Sulfur Metabolism	107
4. Electron Carriers	108
5. Methanogenesis	108

6. Nitrogen Metabolism	110
7. Amino Acids	111
8. Cell Structures	114
9. Heat Shock	115
10. Metals	116
11. Oxidative Stress Responses	121
12. Viral	122
13. Concluding Remarks	124
References	124
4. Bacteria-Phage Interactions in Natural Environments	135
Samuel L. Díaz-Muñoz and Britt Koskella	
1. Introduction	136
2. Setting the Stage: Bacteria and Phage Distribution in Nature	137
3. Interactions Among Bacteria and Phage	143
4. Impact of Phages on Bacterial Populations and Communities	150
5. Bacteria and Phage Dynamics in Nature	158
6. Cascading Effects of Bacteria and Phage Interactions	164
7. Future Directions	166
8. Conclusions	170
Acknowledgments	171
References	171
5. The Interactions of Bacteria with Fungi in Soil: Emerging Concepts	185
Irshad Ul Haq, Miaozhi Zhang, Pu Yang, and Jan Dirk van Elsas	
1. Introduction and the Importance of Microhabitats in the Living Soil	186
2. Bacterial-Fungal Interactions in Soil	188
3. Selected Mechanisms Involved in Bacterial Fitness in Fungal-Affected Microhabitats	196
4. Genomics of the Interactome of <i>B. terrae</i> B5001 and <i>Lyophyllum</i> sp. Strain Karsten	203
5. Mutational Analysis to Understand Bacterial-Fungal Interactions in Soil	204
6. Horizontal Gene Transfer and Adaptability of Bacteria in the Mycosphere	205
7. Conclusions and Outlook	207
Acknowledgments	208
References	209

6. Production of Specialized Metabolites by <i>Streptomyces coelicolor</i> A3(2)	217
Geertje van Keulen and Paul J. Dyson	
1. Introduction	218
2. Morphology and Life Cycle	219
3. Genome Architecture	220
4. Specialized Metabolites of <i>S. coelicolor</i>	221
5. Regulation of Specialized Metabolism	242
6. Modulation of Antibiotic Titers	249
7. Exploiting <i>S. coelicolor</i> as a Generic Host for Antibiotic Production	254
8. Future Perspectives and Concluding Remarks	255
Acknowledgments	256
References	256
7. Synthetic Polyester-Hydrolyzing Enzymes From Thermophilic Actinomycetes	267
Ren Wei, Thorsten Oeser, and Wolfgang Zimmermann	
1. Introduction	268
2. Identification of Synthetic Polyester Hydrolases from Thermophilic Actinomycetes	269
3. Preparation of Actinomycete Polyester Hydrolases	272
4. Catalytic Properties of Actinomycete Polyester Hydrolases	276
5. Structural Properties of Actinomycete Polyester Hydrolases	286
6. Genetic Engineering of Actinomycete Polyester Hydrolases	295
7. Conclusions	297
Acknowledgments	298
References	298
Index	307
Contents of Previous Volumes	315
