1. The Genetic Basis of the Symbiosis Between <i>Photorhabdus</i> and Its Invertebrate Hosts	1
David J. Clarke	
1. Introduction	2
2. The <i>Photorhabdus</i> Life Cycle	3
3. Genomics	7
4. Phenotypic Variation and Primary-Specific Factors	11
5. Pathogenicity: <i>Photorhabdus</i> and the Insect	14
6. Mutualism: <i>Photorhabdus</i> and the Nematode	17
7. Conclusion	22
References	22
2. Regulation of Plant Biomass Utilization in <i>Aspergillus</i>	31
Joanna E. Kowalczyk, Isabelle Benoit, and Ronald P. de Vries	
1. The <i>Aspergilli</i> and Their Potential for Plant Biomass Utilization	32
2. Composition of Plant Biomass	34
3. Transcriptional Regulators of Plant Biomass Degradation in <i>Aspergillus</i>	35
4. The Amylolytic Regulators AmyR and MalR	38
5. The Hemicellulolytic Regulator XlnR	40
6. The Cellulolytic Regulator ClbR	42
7. The Arabinolytic Regulator AraR	42
8. The Inulinolytic Regulator InuR	44
9. The Galactose-Related Regulators GalR and GalX	44
10. The Pectinolytic Regulator RhaR	45
11. Mannanolytic Regulator ManR	46
12. Carbon Catabolite Repressor CreA	47
13. Other Fungal Biomass Utilization Regulators	48
14. Concluding Remarks	50
Acknowledgments	51
References	51

3. Threonine Aldolases	57
Sarah E. Franz and Jon D. Stewart	
1. Introduction	58
2. Threonine Aldolases Utilized for Chemical Synthesis	60
3. Summary of Reactants and Products for Threonine Aldolases	61
4. Structural Studies of Threonine Aldolases	85
5. Protein Engineering Studies of Threonine Aldolases	93
6. Conclusions and Future Outlook	99
References	99
4. Carbohydrate-Binding Modules of Fungal Cellulases: Occurrence in Nature, Function, and Relevance in Industrial Biomass Conversion	103
Anikó Várnai, Miia R. Mäkelä, Demi T. Djajadi, Jenni Rahikainen, Annele Hatakka, and Liisa Viikari	
1. Introduction	104
2. Cellulolytic Enzymes	107
3. Enzymatic Biomass Hydrolysis	140
4. Conclusions	152
References	153
5. Benzoyl-CoA, a Universal Biomarker for Anaerobic Degradation of Aromatic Compounds	167
Abigail W. Porter and Lily Y. Young	
1. Introduction	168
2. Biochemistry of the Benzoyl-CoA Pathway	174
3. Using the Benzoyl-CoA Pathway as a Metabolic Biomarker for Anaerobic Aromatic Biodegradation	178
4. Applicability of Using the Benzoyl-CoA Pathway Biomarkers in the Environment	189
5. The Role of Benzoyl-CoA in the Anaerobic Carbon Cycle	191
6. Conclusions and Future Directions	196
References	197
