

CONTENTS

Contributors	ix
1. <i>Pseudomonas aeruginosa</i> Biofilms: Mechanisms of Immune Evasion	1
Maria Alhede, Thomas Bjarnsholt, Michael Givskov, and Morten Alhede	
1. Introduction	2
2. Biofilm Research Today	6
3. The Polymorphonuclear Leukocytes	14
4. The Interplay: Biofilm Versus PMNs	16
5. Biofilm Infections in Context	22
6. Concluding Remarks	28
Acknowledgments	29
References	29
2. Insights into the Biology of <i>Borrelia burgdorferi</i> Gained Through the Application of Molecular Genetics	41
Ashley M. Groshong and Jon S. Blevins	
1. Introduction	43
2. Global Gene Regulation	49
3. Motility and Chemotaxis	66
4. Cellular Processes: Nutrient Acquisition, Biosynthesis, Metabolism, Cell Division, and Secretion	73
5. Immune Evasion	85
6. Colonization and Dissemination in the Vector or Reservoir	93
7. Conclusions	110
Acknowledgments	111
References	111
3. Shiga Toxin-Producing <i>Escherichia coli</i>	145
James L. Smith, Pina M. Fratamico, and Nereus W. Gunther IV	
1. Introduction	146
2. Diseases Caused by STEC	148
3. Locus of Enterocyte Effacement and Other Virulence Genes	151
4. Combatting Acidic Conditions	154
5. Iron Acquisition	159
6. Antimicrobial Drug Resistance	160

7. Ecology	162
8. Epidemiology	165
9. Prevention of STEC Colonization and Shedding in Cattle	166
10. Prevention of STEC Contamination of Meat and Dairy Products	168
11. Prevention of STEC Contamination of Produce	169
12. Detection, Isolation, and Identification of STEC	171
13. Comparative Genomics of O157:H7 and Non-O157 STEC	174
14. Stress Responses	177
15. Cell-to-Cell Communication Systems in <i>E. coli</i>	179
16. Conclusions	187
References	188
 4. Modern Taxonomy of Biotechnologically Important <i>Aspergillus</i> and <i>Penicillium</i> Species	199
Jos Houbraken, Ronald P. de Vries, and Robert A. Samson	
1. Introduction	200
2. One Fungus, One Name	202
3. Classification and Phylogenetic Relationships in <i>Trichocomaceae</i> , <i>Aspergillaceae</i> , and <i>Thermoascaceae</i>	205
4. Taxonomy of <i>Penicillium</i> Species and Phenotypically Similar Genera	209
5. Taxonomy of <i>Aspergillus</i> Species	219
6. Character Analysis	225
7. Modern Taxonomy and Genome Sequencing	227
8. Identification of <i>Penicillium</i> and <i>Aspergillus</i> Strains	233
9. Mating-Type Genes	234
10. Conclusions	240
Acknowledgments	240
References	241
 5. Upstream Regulation of Mycotoxin Biosynthesis	251
Fahad Alkhayyat and Jae-Hyuk Yu	
1. Introduction	252
2. Pathway-Specific Regulators	253
3. Heterotrimeric G Protein Signaling Governing Mycotoxin Biosynthesis	257
4. The Role of Transcription Factors Responding to Environmental Cues in Mycotoxin Biosynthesis	259
5. Bridging Morphological and Chemical Development in Fungi	264
6. Chromatin Modification and Toxigenesis	268
7. Conclusions and Prospects	269
