1. Regulation of Immunoglobulin Class-Switch Recombination: Choreography of Noncoding Transcription, Targeted DNA Deamination, and Long-Range DNA Repair	1
Allysia J. Matthews, Simin Zheng, Lauren J. DiMenna, and Jayanta Chaudhuri	
1. Overview of Genomic Alterations in B Cells	2
2. Initiation of CSR: S Regions and Germline Transcription	7
3. Induction of DNA Lesions in CSR: Essential Requirement of AID	12
4. Processing of Deaminated DNA: Requirements for BER and MMR Proteins	15
5. Completion of CSR: Synapsis and End-Joining	18
6. AID Phosphorylation at Serine-38 and a Role Beyond DNA Deamination	21
7. Multifaceted Regulation of AID Expression and Activity	26
8. Targeting of AID to the Ig Loci	31
9. AID Activity Beyond the Ig Loci	34
10. Perspectives	39
Acknowledgments	40
References	40
2. Two Forms of Adaptive Immunity in Vertebrates: Similarities and Differences	59
Masanori Kasahara and Yoichi Sutoh	
1. Introduction	60
2. Discovery of VLR	62
3. Structure of VLR Proteins and Genes	63
4. Functions of VLR and Lymphocyte Lineages	71
5. Interplay of VLRB and the Complement System	76
6. Similarities and Differences in the Two Forms of Adaptive Immunity	77
7. Evolution of Antigen Receptors	81
8. Concluding Remarks	83
Acknowledgments	84
References	84

3. Recognition of Tumors by the Innate Immune System and Natural Killer Cells	91
Assaf Marcus, Benjamin G. Gowen, Thornton W. Thompson, Alexandre Iannello, Michele Ardolino, Weiwen Deng, Lin Wang, Nataliya Shifrin, and David H. Raulet	
1. Introduction	92
2. Innate Cells and Effector Molecules in Tumor Surveillance	94
3. Germline-Encoded Receptors Implicated in Tumor Surveillance	96
4. The Immunogenicity of Cancer: How Alterations Common to Cancer Can Result in Detection by Innate Immune Cells	103
5. Interplay Between Tumors and Innate Lymphocytes	108
6. Concluding Remarks	112
Acknowledgments	116
References	117
4. Signaling Circuits in Early B-Cell Development	129
Michael Reth and Peter Nielsen	
1. Introduction	130
2. Moving from the pro-B to the pre-B Stage	132
3. The Interleukin 7 Receptor	135
4. The preBCR and Its Autonomous Signaling	136
5. Lessons from Transgenic and Knockout Mouse Studies	141
6. Signaling Pathways Controlling pre-B-Cell Expansion	143
7. The Switch from Proliferation to Differentiation	151
8. pre-B Cells and Tumors	155
9. Perspectives	160
Acknowledgments	162
References	162
5. Interleukin 10 Receptor Signaling: Master Regulator of Intestinal Mucosal Homeostasis in Mice and Humans	177
Dror S. Shouval, Jodie Ouahed, Amlan Biswas, Jeremy A. Goettel, Bruce H. Horwitz, Christoph Klein, Aleixo M. Muise, and Scott B. Snapper	
1. Introduction	178
2. IL10 and IL10 Receptor Expression and Regulation	179
3. Down-stream Signaling Through the IL10 Receptor	181
4. Regulation of Intestinal Immune Responses by IL10 in Murine Models	183
5. Regulation of Mucosal Homeostasis by IL10 Receptor Signaling in Mice	187
6. IL10-Dependent Signaling Shapes the Intestinal Microbiome	191

7. Impact of IL10 and IL10R Signaling Defects in Humans	194
8. Conclusions	200
Acknowledgment	201
References	201
6. Development of Mast Cells and Importance of Their Tryptase and Chymase Serine Proteases in Inflammation and Wound Healing	211
Jeffrey Douaiher, Julien Succar, Luca Lancerotto, Michael F. Gurish, Dennis P. Orgill, Matthew J. Hamilton, Steven A. Krilis, and Richard L. Stevens	
1. Introduction	212
2. Development of MCs	215
3. Secretory Granule Proteases of Human and Mouse MCs	219
4. MC Involvement in Wound Healing	226
5. Conclusions and Therapeutic Directions	237
Acknowledgments	237
References	237
7. Why Does Somatic Hypermutation by Aid Require Transcription of Its Target Genes?	253
Ursula Storb	
1. The Basic Process of Somatic Hypermutation Before AID	254
2. History and Structure of AID	256
3. Control of Expression and Function of AID	257
4. Is RNA an AID Target?	258
5. Properties of AID Target Genes	259
6. SHM of Non-Ig Genes	262
7. SHM Versus CSR	263
8. A Revised Model for AID Function in SHM	265
9. Concluding Remarks	269
Acknowledgments	269
References	270
Index	279
Contents of Recent Volumes	285
