GENERAL ASPECTS OF PLANT TRANSCRIPTION FACTORS

1. Introduction to Transcription Factor Structure and Function

DANIEL H. GONZALEZ

1.1 Introduction: Transcription in Eukaryotes	3
1.2 Structure of Transcription Factors	4
1.3 DNA Recognition by Transcription Factors	4
1.4 DNA-Binding Domains	5
1.5 Protein-Protein Interactions	6
1.6 Regulation of Transcription Factor Action	7
1.7 Plant Transcription Factors	9
References	9

2. Methods to Study Transcription Factor Structure and Function

IVANA L. VIOLA, DANIEL H. GONZALEZ

2.1 Introduction	13
2.2 <i>In Vivo</i> Functional Studies	14
2.3 Methods for the Analysis of <i>In Vitro</i> Protein-DNA Interactions	18
2.4 Methods to Study Protein-DNA Interactions <i>In Vivo</i>	21
2.5 Analysis of Protein-Protein Interactions	25
References	29

3. General Aspects of Plant Transcription Factor Families

JONG CHAN HONG

3.1 Introduction	35
3.2 Overview of the Transcription Cycle in Eukaryotes	36
3.3 Components Involved in the Formation of the RNAPII Preinitiation Complex in Plants	39
3.4 Plant Transcription Factor Families	44
3.5 Major TF Families that are Conserved Across Eukaryotes	44
3.6 Plant-Specific TF Families	49
3.7 TFs without DBD but Interacting with DBD-Containing TFs	50
3.8 Conclusion	52
References	52

4. Structures, Functions, and Evolutionary Histories of DNA-Binding Domains of Plant-Specific Transcription Factors

KAZUHIKO YAMASAKI

4.1 Introduction	57
4.2 Description of Respective DBDs	59
4.3 Evolutionary History of Plant-Specific TFs	65
References	69

5. The Evolutionary Diversification of Genes that Encode Transcription Factor Proteins in Plants

TOSHIFUMI NAGATA, AENI HOSAKA-SASAKI, SHOSHI KIKUCHI

5.1 Introduction – Distinctive Features of TF Genes in Plants (<i>Arabidopsis</i> and Rice)	73
5.2 A Comparative Analysis of TF Genes between Plants and Animals	76
5.3 A Comparative Analysis of Transcription Factor Genes in 32 Diverse Organisms	76
5.4 The Appearance of New TF Gene Members During Evolution	92
5.5 The Different Evolutionary Methods of TF Genes in Animals and Plants	93
5.6 TF Gene Evolution and its Biological Function	94
5.7 Conclusion: the Regulatory Role of Individual Transcription Factors	96
References	96

B

EVOLUTION AND STRUCTURE OF DEFINED PLANT TRANSCRIPTION FACTOR FAMILIES

6. Structure and Evolution of Plant Homeobox Genes

IVANA L. VIOLA, DANIEL H. GONZALEZ

6.1 Introduction	101
6.2 Structure of the Homeodomain	102
6.3 Specific Contacts with DNA	102
6.4 Plant Homeodomain Families	104
6.5 The Evolution of Plant Homeobox Genes	108
References	110

7. Homeodomain–Leucine Zipper Transcription Factors: Structural Features of These Proteins, Unique to Plants

MATÍAS CAPELLA, PAMELA A. RIBONE, AGUSTÍN L. ARCE, RAQUEL L. CHAN

7.1 Homeoboxes and Homeodomains in Eukaryotic Kingdoms	114
7.2 Plant Homeoboxes	114
7.3 The Plant Homeodomain Superfamily	114
7.4 Different Domains Present in Homeodomain Transcription Factors	115
7.5 The HD-Zip Family	117
7.6 Target Sequences Recognized by the HD-Containing Transcription Factors	122
7.7 What do we Know about the Target Sequences of the HD-Zip Proteins?	123
7.8 Concluding Remarks	124
References	124

8. Structure and Evolution of Plant MADS Domain Transcription Factors

GÜNTER THEIBEN, LYDIA GRAMZOW

8.1 Introduction: Who Cares about MADS Domain Transcription Factors?	127
8.2 The Structure of MADS Domain Proteins	128
8.3 Evolution of MADS Domain Transcription Factors	132
8.4 Concluding Remarks	136
References	137

9. TCP Transcription Factors: Evolution, Structure, and Biochemical Function

EDUARDO GONZÁLEZ-GRANDÍO, PILAR CUBAS

9.1 Introduction	139
9.2 Evolution of TCP Proteins	139
9.3 The TCP Domain: Structure and Function	142
9.4 Activation and Repression Domains	147
9.5 TCP Factors as Intrinsically Disordered Proteins	148
9.6 Posttranslational Modifications of TCP	148
9.7 Concluding Remarks	149
References	149

10. Structure and Evolution of Plant GRAS Family Proteins

CORDELIA BOLLE

10.1 Presence of GRAS Proteins in Plants and other Organisms	153
10.2 Genomic Organization (Intron/Exon)	156
10.3 Structure of GRAS Proteins	157
10.4 Conclusion	160
References	160

11. Structure and Evolution of WRKY Transcription Factors

CHARLES I. RINERSON, ROEL C. RABARA, PRATEEK TRIPATHI, QINGXI J. SHEN, PAUL J. RUSHTON

11.1 Introduction	163
11.2 The Structure of the WRKY Domain	164
11.3 The Evolution of WRKY Genes	164
11.4 R Protein–WRKY Genes	173
11.5 Conclusion: a Reevaluation of WRKY Evolution	177
References	179

12. Structure, Function, and Evolution of the Dof Transcription Factor Family

SHUICHI YANAGISAWA

12.1 Discovery and Definition of the Dof Transcription Factor Family	183
12.2 Structure and Molecular Characteristics of Dof Transcription Factors	184
12.3 Molecular Evolution of the Dof Transcription Factor Family	188
12.4 Physiological Functions of Dof Transcription Factors	190
12.5 Perspective	194
References	194

13. NAC Transcription Factors: From Structure to Function in Stress-Associated Networks

DITTE H. WELNER, FARAH DEEBA, LEILA LO LEGGIO, KAREN SKRIVER

13.1 Introduction	199
13.2 NAC Structure	200
13.3 Evolution of NAC Proteins	202
13.4 NAC Proteins: from Structure to Interactions with DNA and other Proteins	204
13.5 NAC Networks in Abiotic Stress Responses	207
13.6 Conclusion	209
References	210

C

FUNCTIONAL ASPECTS OF PLANT TRANSCRIPTION FACTOR ACTION

14. Homeobox Transcription Factors and the Regulation of Meristem Development and Maintenance

KATSUTOSHI TSUDA, SARAH HAKE

14.1 Introduction	215
14.2 KNOX and BELL: TALE Superfamily Homeobox Genes	216
References	225

15. CUC Transcription Factors: To the Meristem and Beyond		19. Functional Aspects of GRAS Family Proteins	
AUDE MAUGARNY, BEATRIZ GONÇALVES, NICOLAS ARNAUD, PATRICK LAUËS		CORDELIA BOLLE	
15.1 Introduction	230	19.1 The Role of GRAS Proteins in Development	296
15.2 Evolution and Structure of NAM/CUC3 Proteins	230	19.2 The Role of GRAS Proteins in Signaling	301
15.3 NAM/CUC3 Genes Define Boundaries in Meristems and Beyond	234	19.3 General Principles of GRAS Function	303
15.4 Multiple Regulatory Pathways Contribute to the Fine Regulation of NAM/CUC3 Genes	236	19.4 Conclusion	307
15.5 NAM/CUC3 Control Plant Development Via Modifications of the Cellular Behavior	242	References	307
15.6 Conclusion	243	20. DELLA Proteins, a Group of GRAS Transcription Regulators that Mediate Gibberellin Signaling	
References	244	FRANCISCO VERA-SIRERA, MARIA DOLORES GOMEZ, MIGUEL A. PEREZ-AMADOR	
16. The Role of TCP Transcription Factors in Shaping Flower Structure, Leaf Morphology, and Plant Architecture		20.1 About DELLAs and Gibberellins	313
MICHAEL NICOLAS, PILAR CUBAS		20.2 GA Signaling through DELLAs	317
16.1 Introduction	250	20.3 The Molecular Mechanism of DELLA Action: DELLA-Protein Interactions and Target Genes	319
16.2 TCP Genes and the Control of Leaf Development	250	20.4 Conclusion and Future Perspectives	324
16.3 TCP Genes and the Control of Shoot Branching	256	References	324
16.4 TCP Genes and the Control of Flower Shape	259	21. bZIP and bHLH Family Members Integrate Transcriptional Responses to Light	
16.5 TCP Genes Affect Flowering Time	262	MARÇAL GALLEMÍ, JAIME F. MARTÍNEZ-GARCÍA	
16.6 Concluding Remarks	262	21.1 The Role of Light in the Control of Plant Development: A Brief Introduction	329
References	263	21.2 PIFs: Factors that Link Light Perception, Changes in Gene Expression, and Plant Development	333
17. Growth-Regulating Factors, A Transcription Factor Family Regulating More than Just Plant Growth		21.3 HFR1 and PAR1: Atypical bHLH Factors that Act as Transcriptional Cofactors	336
RAMIRO E. RODRIGUEZ, MARÍA FLORENCIA ERCOLI, JUAN MANUEL DEBERNARDI, JAVIER F. PALATNIK		21.4 HY5: a Paradigm of a bZIP Member in Integrating Light Responses	337
17.1 Growth-Regulating Factors, a Plant-Specific Family of Transcription Factors	269	21.5 Conclusions	339
17.2 Control of GRF Activity	272	References	339
17.3 Role of GRFs in Organ Growth and other Developmental Processes	274	22. What Do We Know about Homeodomain-Leucine Zipper I Transcription Factors? Functional and Biotechnological Considerations	
17.4 Conclusion and Perspectives	277	PAMELA A. RIBONE, MATÍAS CAPELLA, AGUSTÍN L. ARCE, RAQUEL L. CHAN	
References	278	22.1 HD-Zip Transcription Factors are Unique to Plants	344
18. The Multifaceted Roles of miR156-targeted SPL Transcription Factors in Plant Developmental Transitions		22.2 Brief History of the Discovery of HD-Zip Transcription Factors	344
JIA-WEI WANG		22.3 Expression Patterns of HD-Zip I Genes	344
18.1 Introduction to Developmental Transitions	281	22.4 Environmental Factors Regulate the Expression of HD-Zip I Encoding Genes	346
18.2 miR156 and its Targets	282	22.5 The Function of HD-Zip I TFs from Model Plants	346
18.3 miR156-SPL Module in Timing Embryonic Development	283	22.6 HD-Zip I TFs from Nonmodel Species	349
18.4 miR156-SPL Module in Juvenile-to-Adult Phase Transition in Higher Plants	283	22.7 Divergent HD-Zip I Proteins from Nonmodel Plants	351
18.5 The miR156-SPL Module Regulates Flowering Time in Higher Plants	285	22.8 Knowledge Acquired from Ectopic Expressors	352
18.6 The miR156-SPL Module in Developmental Transitions in Moss	286	22.9 HD-Zip I TFs in Biotechnology	352
18.7 The miR156-SPL Module in other Developmental Processes	287	22.10 Concluding Remarks	353
18.8 Perspectives	290	References	354
References	291		

MODULATION OF PLANT TRANSCRIPTION FACTOR ACTION

23. Intercellular Movement of Plant Transcription Factors, Coregulators, and Their mRNAs

DAVID J. HANNAPEL

23.1 Introduction to Noncell-Autonomous Mobile Signals	359
23.2 Mobile Transcription Factors of the Shoot Apex in Protein Form	360
23.3 Mobile Root Transcription Factors	360
23.4 Transcription Factors and Coregulators that Move Long Distance through the Sieve Element System	361
23.5 Full-Length Mobile mRNAs and their Roles in Development	363
23.6 Conclusions	369
References	369

24. Redox-Regulated Plant Transcription Factors

YUAN LI, GARY J. LOAKE

24.1 Introduction	373
24.2 Concept of Redox Regulation	374
24.3 Redox Regulation of NPR1 During Plant Immunity	377
24.4 Redox Regulation of Basic Leucine Zipper Transcription Factors	378

24.5 Redox Regulation of MYB Transcription Factors	379
24.6 Redox Regulation of Homeodomain-Leucine Zipper Transcription Factors	380
24.7 Rap2.4a is Under Redox Regulation	381
24.8 Redox Regulation of Class I TCP Transcription Factors	381
24.9 Conclusion	382
References	382

25. Membrane-Bound Transcription Factors in Plants: Physiological Roles and Mechanisms of Action

YUJI IWATA, NOZOMU KOIZUMI

25.1 Introduction	385
25.2 bZIP Transcription Factors	386
25.3 NAC Transcription Factors	389
25.4 Conclusions and Future Perspectives	391
References	393

26. Ubiquitination of Plant Transcription Factors

SOPHIA L. STONE

26.1 The Ubiquitin Proteasome System	396
26.2 The Ubiquitin Proteasome System and Regulation of Transcription Factor Function	400
References	405
