Preface

xix

Part I

Riboswitch Discovery

1. **Riboswitch Discovery by Combining RNA-Seq and Genome-Wide Identification of Transcriptional Start Sites** 3
Isabelle Rosinski-Chupin, Olga Soutourina, and Isabelle Martin-Verstraete
 1. Introduction 4
 2. RNA Isolation and mRNA Enrichment 7
 3. Genome-Wide Mapping of Transcription Start Sites by dRNA-Seq 14
 4. Genome-Wide Analysis of Transcript Length by RNA-Seq 20
 5. Processing and Analysis of dRNA-Seq and RNA-Seq Data 22
 6. Characterization of New Potential Riboswitches Using dRNA-Seq and RNA-Seq Analyses 24
 - References 26
2. **Discovering Human RNA Aptamers by Structure-Based Bioinformatics and Genome-Based *In Vitro* Selection** 29
Bao Ho, Julio Polanco, Randi Jimenez, and Andrej Lupták
 1. Introduction 29
 2. Precautions 32
 3. Generating a Human Genomic DNA Pool 32
 4. *In Vitro* Selection of RNA Aptamers 36
 5. Structure-Based Searches for Naturally Occurring Aptamers 44
 - References 45

Part II

Synthesis and Sample Prep Methods for Large RNAs

3. **Affinity Purification of *In Vitro* Transcribed RNA with Homogeneous Ends Using a 3'-ARIBo Tag** 49
Geneviève Di Tomasso, Alix Salvail-Lacoste, Jonathan Bouvette, James G. Omichinski, and Pascale Legault
 1. Introduction 50

2. Batch Affinity Purification of RNA Using a 3'-ARiBo Tag	52
3. Ensuring 5'-Homogeneity of Affinity-Purified RNA	67
4. Summary	80
Acknowledgments	81
References	81
4. Deoxyribozyme-Mediated Ligation for Incorporating EPR Spin Labels and Reporter Groups into RNA	85
Katarzyna Wawrzyniak-Turek and Claudia Höbartner	
1. Introduction	86
2. Synthesis of Spin-Labeled RNA Using Convertible Nucleosides	87
3. DNA-Catalyzed Ligation of RNA Using 9DB1*	90
4. Protocols for Synthesis of Spin-Labeled SAM-I Riboswitch	93
5. General Considerations and Future Developments	99
Acknowledgments	101
References	101
5. A Flexible, Scalable Method for Preparation of Homogeneous Aminoacylated tRNAs	105
Jinwei Zhang and Adrian R. Ferré-D'Amaré	
1. Introduction	105
2. Methods	107
Acknowledgments	112
References	112
6. Synthesis of a Biotinylated Photocleavable Nucleotide Monophosphate for the Preparation of Natively Folded RNAs	115
Yiling Luo, Herman O. Sintim, and T. Kwaku Dayie	
1. Theory	116
2. Equipment	118
3. Materials	118
4. Protocol	121
5. Step 1: Synthesis of Biotin-PC GMP	123
6. Step 2: Transcription of D5 and Ribosomal A-site RNAs Using Unmodified GTP and Biotin-PC GMP	126
7. Step 3: Purification of Biotin-Labeled RNA with Affinity Avidin Column and Photocleavage	128
8. Conclusions	129

Acknowledgments	131
References	131

7. Chemo-Enzymatic Synthesis of Selectively $^{13}\text{C}/^{15}\text{N}$ -Labeled RNA for NMR Structural and Dynamics Studies **133**

Luigi J. Alvarado, Andrew P. Longhini, Regan M. LeBlanc, Bin Chen,
Christoph Kreutz, and T. Kwaku Dayie

1. Theory	135
2. Equipment	138
3. Materials	139
4. Protocol	144
5. Step 1: Synthesis of Uracil	145
6. Step 2: Synthesis of UTP	148
7. Step 3: Synthesis of CTP	150
8. Step 4: Purification and Quantification	151
9. Step 5: Quality Control	154
10. Step 6: <i>In Vitro</i> RNA Transcription	155
11. Step 7: NMR Applications	157
12. Conclusion	158
Acknowledgments	161
References	161

Part III

Structure and Folding

8. SHAPE Analysis of Small RNAs and Riboswitches **165**

Greggory M. Rice, Steven Busan, Fethullah Karabiber, Oleg V. Favorov,
and Kevin M. Weeks

1. Theory	166
2. Equipment	167
3. Materials	167
4. Protocol	169
5. Step 1: RNA Folding and SHAPE Probing	170
6. Step 2: Primer Extension	172
7. Step 3: Capillary Electrophoresis	174
8. Step 4: Data Processing Using QuShape	175
9. Step 5: Data Processing and RNA Modeling	182
Acknowledgments	186
References	186

9. Experimental Approaches for Measuring pK_a's in RNA and DNA	189
Pallavi Thaplyal and Philip C. Bevilacqua	
1. Introduction	190
2. Experimental Parameters for pH Titrations	193
3. RNA Cleavage Kinetics	199
4. Spectroscopic-Detected Methods	204
5. Perspective	215
Acknowledgments	216
References	216
10. Crystallographic Analysis of TPP Riboswitch Binding by Small-Molecule Ligands Discovered Through Fragment-Based Drug Discovery Approaches	221
Katherine Deigan Warner and Adrian R. Ferré-D'Amaré	
1. Introduction	222
2. Methods	223
3. Conclusions	231
Acknowledgments	231
References	231
11. Methods for Using New Conceptual Tools and Parameters to Assess RNA Structure by Small-Angle X-Ray Scattering	235
Francis E. Reyes, Camille R. Schwartz, John A. Tainer, and Robert P. Rambo	
1. Introduction	236
2. Specialized Equipment	238
3. Preparation of the RNA for a SAXS Study	238
4. Interpretation of the X-Ray Scattering Curve	245
5. Case Studies	252
6. Multiphase Volumetric Modeling	255
7. Gold Labels and Comprehensive Conformations	256
8. Considerations	258
Acknowledgments	260
References	260
Part IV	
Dynamics	
12. Use of ^{19}F NMR Methods to Probe Conformational Heterogeneity and Dynamics of Exchange in Functional RNA Molecules	267
Caijie Zhao, Clemens Anklin, and Nancy L. Greenbaum	
1. Introduction	268

2. Methods	270
3. Conclusion and Remarks	282
Acknowledgments	283
References	283
13. Site-Directed Spin-Labeling Strategies and Electron Paramagnetic Resonance Spectroscopy for Large Riboswitches	287
Jackie M. Esquiaqui, Eileen M. Sherman, Jing-Dong Ye, and Gail E. Fanucci	
1. Techniques Used for Riboswitch Studies	290
2. Ligation Methods for SDSL of Large Riboswitches	297
3. CW-EPR Spectral Analysis of Riboswitches	307
References	309
14. Using sm-FRET and Denaturants to Reveal Folding Landscapes	313
Euan Shaw, Patrick St-Pierre, Kaley McCluskey, Daniel A. Lafontaine, and J. Carlos Penedo	
1. Introduction	314
2. Single-Molecule FRET: Technical Aspects	317
3. Riboswitch Structure and Biological Function	319
4. Combination of sm-FRET and Denaturants to Investigate Riboswitch Folding	323
5. Summary and Prospects	337
References	337
15. Riboswitch Structure and Dynamics by smFRET Microscopy	343
Krishna C. Suddala and Nils G. Walter	
1. Introduction	344
2. Methods	351
3. Practical Experimental Considerations	359
4. Data Analysis	360
5. Induced-Fit Versus Conformational Selection	365
6. Summary and Conclusions	368
Acknowledgments	368
References	368
16. Ribosome Structure and Dynamics by smFRET Microscopy	375
Bassem Shebl, Zenia Norman, and Peter V. Cornish	
1. Introduction	376
2. Overview of Ribosome Structure and Function	377

3. Methodology	379
4. Ribosome Dynamics	384
5. Data Acquisition	395
6. Building and Verifying Histograms, Normalization, Gaussian Fitting	400
7. Future Directions	400
References	401

17. Unraveling the Thermodynamics and Kinetics of RNA Assembly: Surface Plasmon Resonance, Isothermal Titration Calorimetry, and Circular Dichroism **407**

Charles G. Hoogstraten, Minako Sumita, and Neil A. White

1. The RNA Folding Problem and Assembly of RNA Tertiary Structure	408
2. Practical Aspects of Biophysical Studies of RNA Assembly	410
3. Specific Measurements of Ion-Driven RNA Assembly	417
4. Concluding Remarks	429
Acknowledgments	429
References	429

Part V

Ligand Interactions

18. ITC Analysis of Ligand Binding to PreQ₁ Riboswitches **435**

Joseph A. Liberman, Jarrod T. Bogue, Jermaine L. Jenkins, Mohammad Salim, and Joseph E. Wedekind

1. Introduction	436
2. Experimental Procedures for ITC	439
Acknowledgments	448
References	449

19. Facile Characterization of Aptamer Kinetic and Equilibrium Binding Properties Using Surface Plasmon Resonance **451**

Andrew L. Chang, Maureen McKeague, and Christina D. Smolke

1. Introduction	452
2. Materials	453
3. Sensor Surface Immobilization	455
4. Characterization of Aptamer Binding Properties	458
5. Conclusion	465
Acknowledgments	466
References	466

20. The AdoCbl–Riboswitch Interaction Investigated by In-Line Probing and Surface Plasmon Resonance Spectroscopy (SPR)	467
Michelle F. Schaffer, Pallavi K. Choudhary, and Roland K.O. Sigel	
1. Introduction	468
2. In-Line Probing Experiments	471
3. SPR Spectroscopy	477
4. Conclusion	484
Acknowledgments	485
References	485
21. Assessing RNA Interactions with Proteins by DRaCALA	489
Darshan K. Patel, Margo P. Gebbie, and Vincent T. Lee	
1. Introduction	490
2. DRaCALA-Based Detection of Protein–Ligand Interactions	491
3. Principle of DRaCALA	493
4. Determination of Fraction Bound by DRaCALA	493
5. Steps for Performing DRaCALA to Detect Protein Interaction With RNA	495
6. CsrA Binds Specifically to RsmY and RsmZ	509
7. Other Modifications of DRaCALA for RNA–Protein Interactions	510
References	511
