Preface

xix

1. High-Content Functional Genomic Screening to Identify Novel Regulators of the PINK1–Parkin Pathway **1**

Andy Cheuk-Him Ng, Stephen D. Baird, and Robert A. Screaton

- 1. Introduction and Theory 2
- 2. General Screen Design Strategy 3
- 3. RNAi Screen for Genes Involved Required for PARK2 Translocation 6
- 4. Equipment 8
- 5. Materials 8
- 6. Genome Screen Protocol 10
- Acknowledgments 18
- References 18

2. Measurement of Mitochondrial Turnover and Life Cycle Using MitoTimer **21**

Kyle M. Trudeau, Roberta A. Gottlieb, and Orian S. Shirihai

- 1. Introduction 22
- 2. Expressing MitoTimer in Cells 23
- 3. Imaging MitoTimer 28
- 4. Interpreting MitoTimer Readout 29
- 5. Summary 36
- References 36

3. Monitoring Mitophagy in Mammalian Cells **39**

Yushan Zhu, Guo Chen, Linbo Chen, Weiling Zhang, Du Feng, Lei Liu, and Quan Chen

- 1. Introduction 40
- 2. Transmission Electron Microscopy 40
- 3. Western Blot Analysis of Mitophagy 42
- 4. Fluorescence Methods for Analyzing Mitophagy 45
- 5. Analyzing Mitophagy Using Mitochondria Mass 47
- 6. Mitochondria-Targeting Probes for Mitophagy Assay 47
- 7. Mitophagy Inducer and Inhibitors 49

8. Future Perspectives	51
Acknowledgments	52
References	52
4. Photoactivatable Green Fluorescent Protein-Based Visualization and Quantification of Mitochondrial Fusion and Mitochondrial Network Complexity in Living Cells	57
Mariusz Karbowski, Megan M. Cleland, and Brian A. Roelofs	
1. Introduction	58
2. Visualization and Quantification of Mitochondrial Fusion in Living Cells	61
3. Estimation of Relative Size of Mitochondrial Units and Mitochondrial Network Complexity	66
4. Time-Lapse Imaging of Mitochondria in Living Cells: General Considerations	68
5. Concluding Remarks: Other Potential Applications of Mito-PAGFP	70
Acknowledgments	71
References	71
5. Characterization of Mitochondrial Transport in Neurons	75
Bing Zhou, Mei-Yao Lin, Tao Sun, Adam L. Knight, and Zu-Hang Sheng	
1. Introduction	76
2. Analyses of Mitochondrial Transport in Embryonic Neuron Cultures	79
3. Analyses of Mitochondrial Transport in Adult Neuron Cultures	84
4. Characterization of Mitochondrial Transport at Synapses	90
5. Summary	94
Acknowledgments	94
References	95
6. Imaging of Mitochondrial Dynamics in Motor and Sensory Axons of Living Mice	97
Irene Bolea, Wen-Biao Gan, Giovanni Manfredi, and Jordi Magrané	
1. Introduction	98
2. Protocols to Image Mitochondrial Transport in the Peripheral Nerves of Living Mice	99
3. Imaging of Mitochondrial Dynamics in the Peripheral Nerves of Living Mice	105
4. Conclusions	108
Acknowledgments	109
References	109

7. Analyzing Mitochondrial Dynamics in Mouse Organotypic Slice Cultures	111
Anh H. Pham and David C. Chan	
1. Parasagittal Slice Cultures of the Basal Ganglia	112
2. Cerebellar Slice Cultures	118
3. Monitoring Mitochondrial Dynamics in Slice Cultures	121
References	127
8. Analysis of Mitochondrial Traffic in <i>Drosophila</i>	131
Swathi Devireddy, Hyun Sung, Pin-Chao Liao, Elisabeth Garland-Kuntz, and Peter J. Hollenbeck	
1. Introduction	132
2. Dissection Methods for <i>Drosophila</i> Larvae	133
3. Imaging	139
4. Analysis	141
5. Conclusions	148
Acknowledgment	148
References	149
9. <i>In Vivo</i> Imaging of Mitochondria in Intact Zebrafish Larvae	151
Dominik Paquet, Gabriela Plucińska, and Thomas Misgeld	
1. Introduction	152
2. Preparation of Transgenic <i>MitoFish</i> for Live Imaging	153
3. Visualizing Axonal Transport of Mitochondria in Zebrafish Sensory Neurons	157
4. Processing and Quantification of Imaging Files	160
5. Conclusions	162
Acknowledgments	162
References	163
10. The Use of miniSOG in the Localization of Mitochondrial Proteins	165
Guy A. Perkins	
1. Introduction	166
2. Requirements for CLEM Labeling	166
3. miniSOG Features	166
4. Resolution	168
5. Photooxidation Protocol for a Monolayer of Cultured Cells	169
6. Photooxidation Protocol for Tissues	174

7. Example of miniSOG Use with MCU	175
8. Conclusions and Future Work	175
Acknowledgments	178
References	178
11. Assessing the Function of Mitochondria-Associated ER Membranes	181
Estela Area-Gomez	
1. Introduction	181
2. Isolation of MAM	183
3. Assaying MAM Activity	185
References	195
12. Measurement of ROS Homeostasis in Isolated Mitochondria	199
L. Tretter and A. Ambrus	
1. Importance of Quantifying Mitochondrial ROS Homeostasis	200
2. Detection of Mitochondrial ROS Formation	205
3. Mitochondrial Elimination of H ₂ O ₂	215
4. Methods for the Detection of Oxidative Stress	217
Acknowledgments	219
References	219
13. Use of Potentiometric Fluorophores in the Measurement of Mitochondrial Reactive Oxygen Species	225
Brian M. Polster, David G. Nicholls, Shealinna X. Ge, and Brian A. Roelofs	
1. Introduction	226
2. ROS Detection Using MitoSOX—Subcellular Localization and Fluorescence Yield	228
3. Validating MitoSOX Using a Negative Control	235
4. Choosing a Correct MitoSOX Loading Paradigm—Additional Considerations	237
5. Is MitoSOX Imaging Useful?	240
6. Preparation of Primary Rat Cortical Neurons for Imaging	244
7. Optimizing MitoSOX Concentration and Establishing Mitochondrial Localization	245
8. Imaging Using MitoSOX	247
Acknowledgment	247
References	247

14. Spatial, Temporal, and Quantitative Manipulation of Intracellular Hydrogen Peroxide in Cultured Cells	251
Ishraq Alim, Renee E. Haskew-Layton, Hossein Aleyasin, Hengchang Guo, and Rajiv R. Ratan	
1. Introduction	252
2. Production of H_2O_2 Using DAAO	254
3. Two-Photon Fluorescence Imaging of H_2O_2	265
4. Summary	269
Acknowledgments	270
References	270
15. Biochemical and Biophysical Methods for Studying Mitochondrial Iron Metabolism	275
Gregory P. Holmes-Hampton, Wing-Hang Tong, and Tracey A. Rouault	
1. Introduction	276
2. Measurement of Total Iron Concentration	277
3. <i>In Situ</i> Analysis of Iron in the Mitochondria	282
4. Biophysical Methods for Studying Iron in Isolated Mitochondria	290
5. Conclusions	299
Acknowledgments	299
References	299
16. Analysis and Interpretation of Microplate-Based Oxygen Consumption and pH Data	309
Ajit S. Divakaruni, Alexander Paradyse, David A. Ferrick, Anne N. Murphy, and Martin Jastroch	
1. Introduction	310
2. The Oxygen Consumption Rate	311
3. The Extracellular Acidification Rate	330
Summary	347
Acknowledgments	347
References	347
17. Imaging Changes in the Cytosolic ATP-to-ADP Ratio	355
Mathew Tantama and Gary Yellen	
1. Introduction	356
2. Methods	361
3. Expected Results	366

4. Summary	369
References	369
18. The Use of Mitochondria-Targeted Endonucleases to Manipulate mtDNA	373
Sandra R. Bacman, Sion L. Williams, Milena Pinto, and Carlos T. Moraes	
1. Mitochondrial DNA	374
2. Mitochondria-Targeted Restriction Nucleases to Cleave mtDNA and Model OXPHOS Diseases	375
3. mtDNA Heteroplasmy and Approaches to Alter the Balance Between Wild-Type and Mutant mtDNA	377
4. mtDNA Heteroplasmy Shift Using Restriction Endonucleases	379
5. Designer Endonucleases for the Modulation of mtDNA Heteroplasmy	382
6. mtDNA Heteroplasmy Shift Using Zinc-Finger Nucleases	384
7. Heteroplasmy Shift Using TAL Effector Nucleases	384
8. Single-Strand Annealing Assay to Analyze the Efficacy and Specificity of Designer Nuclease	387
9. The Use of Cybrid Cells to Test Approaches to Change Mitochondrial DNA Heteroplasmy	388
10. Immunodetection and Mitochondrial Localization in Cells and Tissues	389
11. Changing mtDNA Heteroplasmy in Cultured Cells with mito-TALENs	390
12. Evaluation of the mtDNA Content	392
13. Future Perspectives	393
Acknowledgments	393
References	394
19. Induced Pluripotent Stem Cell-Derived Models for mtDNA Diseases	399
Riikka H. Hämäläinen	
1. Introduction	400
2. Induced Pluripotent Stem Cells	400
3. Mitochondrial Disease	402
4. Conclusion	407
5. Generation of iPSCs from mtDNA Disease Patients	408
Acknowledgment	411
References	411

20. The Use of ^{18}F-BCPP-EF as a PET Probe for Complex I Activity in the Brain	417
Hideo Tsukada	
1. Introduction	418
2. Design and Assessment of Candidate Compounds for MC-I Imaging Probes	419
3. Application for Stroke/Ischemic Damage Imaging	421
4. Application for Imaging of Aging Effects on MC-I Activity	425
5. Conclusion	429
References	430
21. MR OEF Imaging in MELAS	433
Sheng Xie	
1. Introduction of Magnetic Resonance Imaging Techniques	434
2. Significance of OEF Imaging in MELAS	437
3. Cerebral OEF Changes in Our Study of MELAS	439
References	443
