Section I

RNA Structure Prediction

1. Automated 3D RNA Structure Prediction Using the RNAComposer Method for Riboswitches	3
K.J. Purzycka, M. Popenda, M. Szachniuk, M. Antczak, P. Lukasiak, J. Blazewicz, and R.W. Adamiak	
1. Introduction	4
2. RNA FRABASE—Opening the Route to RNAComposer	7
3. RNAComposer—From the RNA Secondary Structure to RNA 3D Structure	8
4. Predicting the Tertiary Structure of Riboswitches with RNAComposer	16
5. Conclusions and Perspectives	28
Acknowledgments	31
References	31
2. Modeling Complex RNA Tertiary Folds with Rosetta	35
Clarence Yu Cheng, Fang-Chieh Chou, and Rhiju Das	
1. Introduction	36
2. Setting the Stage for 3D Modeling Using Experimental Data	37
3. Making Models of RNA Tertiary Folds	41
4. Evaluation	51
5. Conclusion	52
Acknowledgments	53
Appendix. Example Command Lines and Files for RNA Modeling in Rosetta	53
References	62
3. Computational Methods Toward Accurate RNA Structure Prediction Using Coarse-Grained and All-Atom Models	65
Andrey Krokhotin and Nikolay V. Dokholyan	
1. Introduction	66
2. Discrete Molecular Dynamics	68
3. Three-Bead Model	69

4. Use of Hydroxyl-Radical Probing to Refine RNA Three-Dimensional Structure	75
5. All-Atom Structure Reconstruction	85
6. iFoldRNA	86
7. Conclusions	87
References	87
4. Improving RNA Secondary Structure Prediction with Structure Mapping Data	91
Michael F. Sioma and David H. Mathews	
1. Introduction	92
2. Overview of Probing methods	94
3. Improving the Accuracy of Secondary Structure Prediction Using Probing Data	98
4. Using SHAPE Data on a Single Sequence to Improve Secondary Structure Prediction Accuracy	100
5. Open Questions	105
6. Conclusions	108
References	109
5. Computational Prediction of Riboswitch Tertiary Structures Including Pseudoknots by RAGTOP: A Hierarchical Graph Sampling Approach	115
Namhee Kim, Mai Zahran, and Tamar Schlick	
1. Introduction	116
2. Hierarchical Graph Folding Approach	122
3. Application to Riboswitch Structure Prediction	124
4. Future Challenges and Perspectives	130
Acknowledgments	132
References	132
Section II	
RNA Dynamics and Thermodynamics	
6. Using Reweighted Pulling Simulations to Characterize Conformational Changes in Riboswitches	139
Francesco Di Palma, Francesco Colizzi, and Giovanni Bussi	
1. Introduction	140
2. Methods and Theory	142

3. Results and Discussion	150
4. Conclusions	159
Acknowledgments	159
References	159
7. Force Field Dependence of Riboswitch Dynamics	163
Christian A. Hanke and Holger Gohlke	
1. Introduction	164
2. Methods	167
3. Results and Discussion	172
Acknowledgments	188
References	188
8. Thermodynamic and Kinetic Folding of Riboswitches	193
Stefan Badelt, Stefan Hammer, Christoph Flamm, and Ivo L. Hofacker	
1. Introduction	194
2. Characterization and Prediction of Riboswitches	195
3. Thermodynamic RNA folding	196
4. RNA Folding Kinetics on Static Landscapes	205
5. RNA Folding Kinetics on Dynamic Landscapes	208
6. Conclusion	210
Acknowledgments	211
References	211
9. Integrating Molecular Dynamics Simulations with Chemical Probing Experiments Using SHAPE-FIT	215
Serdal Kirmizialtin, Scott P. Hennelly, Alexander Schug, Jose N. Onuchic, and Karissa Y. Sanbonmatsu	
1. Introduction	216
2. Materials and Methods	219
3. Results	224
4. Discussions	229
Acknowledgments	231
References	231

10. Using Simulations and Kinetic Network Models to Reveal the Dynamics and Functions of Riboswitches **235**

Jong-Chin Lin, Jeseong Yoon, Changbong Hyeon, and D. Thirumalai

1. Introduction and Scope of the Review 236
2. Hydration Dynamics Around the Folded State: All Atom Simulations 238
3. Stability of Isolated Helices Control the Folding Landscapes of Purine Riboswitches 242
4. Folding Landscapes of SAM Riboswitch 247
5. Is SAM Riboswitch Under Thermodynamic Control? 249
6. Kinetic Network Model of Gene Regulation and the Role of Negative Feedback in Control of Transcription 251
7. Concluding Remarks 255
- Acknowledgments 256
- References 256

Section III

Ions, Ligands, and RNA Interactions

11. Computational Methods for Prediction of RNA Interactions with Metal Ions and Small Organic Ligands **261**

Anna Philips, Grzegorz Łach, and Janusz M. Bujnicki

1. Introduction 262
2. Computational Modeling of RNA-Ligand Complex Structures 263
3. MetalionRNA and LigandRNA 269
- Acknowledgments 282
- References 283

12. Computational Prediction of Riboswitches **287**

P. Clote

1. Introduction 287
2. Riboswitches 289
3. Riboswitch gene finders 293
4. Conformational switches 299
5. Conclusion 307
- Acknowledgments 307
- References 307

13. Computational and Experimental Studies of Reassociating RNA/DNA Hybrids Containing Split Functionalities	313
Kirill A. Afonin, Eckart Bindewald, Maria Kireeva, and Bruce A. Shapiro	
1. Introduction	314
2. Thermodynamic Prediction of Different Compositions of RNA and DNA Strand Associations	317
3. Sequence Design of RNA/DNA Hybrids	323
4. Enzyme-Assisted <i>In Vitro</i> Production of RNA/DNA Hybrids	325
5. Experimental Testing of RNA/DNA Hybrids	329
6. Concluding Remarks	330
Acknowledgments	330
References	330
14. Multiscale Methods for Computational RNA Enzymology	335
Maria T. Panteva, Thakshila Dissanayake, Haoyuan Chen, Brian K. Radak, Erich R. Kuechler, George M. Giambaşu, Tai-Sung Lee, and Darrin M. York	
1. Introduction	336
2. The "Problem Space" of Computational RNA Enzymology	338
3. Multiscale Modeling Strategy	340
4. Catalytic Strategies for Cleavage of the RNA Backbone	340
5. Modeling Ion and Nucleic Acid Interactions	341
6. Modeling pH-Rate Profiles for Enzymes	346
7. Modeling Conformational States	351
8. Modeling the Chemical Steps of Catalysis	356
9. Computing KIEs to Verify Transition State Structure	361
10. Conclusions	363
Acknowledgments	364
References	364
Author Index	375
Subject Index	395
