

CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xiii</i>
1. Assays for Necroptosis and Activity of RIP Kinases	1
Alexei Degterev, Wen Zhou, Jenny L. Maki, and Junying Yuan	
1. Introduction	2
2. Cellular Models of Necroptosis	5
3. Measurement of Necroptotic Cell Death	9
4. Recapitulation of RIP1 Kinase Expression in RIP1-Deficient Jurkat Cells	16
5. Analysis of Necrosome Complex Formation	18
6. Endogenous RIPK Autophosphorylation Assays	21
7. Analysis of Recombinant RIPK1 Kinase Activity and Inhibition by Necrostatins	23
8. Conclusions	28
Acknowledgments	29
References	29
2. IAP Family of Cell Death and Signaling Regulators	35
John Silke and Domagoj Vucic	
1. Identification of IAPs, Structure, and Domain Function	36
2. IAP Proteins and Cell Death Pathways	39
References	55
3. Activation of the NLRP3 Inflammasome by Proteins That Signal for Necroptosis	67
Tae-Bong Kang, Seung-Hoon Yang, Beata Toth, Andrew Kovalenko, and David Wallach	
1. Introduction	68
2. Altered Expression or Function of Enzymes That Control Induction of Necroptosis Results in Altered Generation of IL-1 β and IL-18 by Mouse DCs	69
3. Signaling Proteins Controlling Necroptosis Affect Assembly of the NLRP3 Inflammasome	72

4. Does the Similarity Between the Regulation of Necroptosis and of Assembly of the NLRP3 Inflammasome Reflect Activation of the Inflammasome by Products of Necrotic Cells?	75
5. Concluding Remarks	78
Acknowledgments	79
References	79
4. Characterization of the Ripoptosome and Its Components: Implications for Anti-inflammatory and Cancer Therapy	83
Ramon Schilling, Peter Geserick, and Martin Leverkus	
1. Introduction	84
2. The Ripoptosome: Cellular Model Systems to Study Its Formation	87
3. Biochemical Analysis of the Ripoptosome: Analysis of Ripoptosome Formation and Identification of Novel Components via Immunoprecipitation and Mass Spectrometry	94
4. Outlook: Future Implications of the Function and Regulation of the Ripoptosome	97
References	100
5. Tools and Techniques to Study Ligand-Receptor Interactions and Receptor Activation by TNF Superfamily Members	103
Pascal Schneider, Laure Willen, and Cristian R. Smulski	
1. Introduction	104
2. Methods	106
3. Conclusions	123
Acknowledgments	124
References	124
6. Necrotic Cell Death in <i>Caenorhabditis elegans</i>	127
Vassiliki Nikolettou and Nektarios Tavernarakis	
1. Introduction	128
2. Necrotic Cell Death Paradigms During <i>C. elegans</i> Development	130
3. Nondevelopmental Necrotic Death	134
4. Execution of Necrosis	140
5. <i>C. elegans</i> as a Model for Human Diseases Entailing Necrosis	142
6. Concluding Remarks	147
Acknowledgments	149
References	149

7. Noncanonical Cell Death in the Nematode *Caenorhabditis elegans* 157

Maxime J. Kinet and Shai Shaham

1. Introduction	158
2. Pathological Cell Death Induced by Genome Lesions and Environmental Stress	159
3. Developmental Cell Deaths That Do not Follow the Canonical Apoptotic Pathway	168
4. Nonapoptotic, Caspase-Independent Linker Cell Death	172
5. Conclusion	175
Acknowledgments	175
References	175

8. Autophagy and Cell Death in the Fly 181

Charles Nelson and Eric H. Baehrecke

1. Introduction	182
2. Materials and Methods	184
3. Data Analysis and Interpretation	191
Acknowledgments	198
References	198

9. Structural Studies of Death Receptors 201

Paul C. Driscoll

1. Introduction. Signaling by the Tumor Necrosis Receptor Superfamily	202
2. Outline Death Ligand and DR Domain Structure	204
3. DR Ectodomain Structure	206
4. Physiological Complexes of Death Ligands with DRs	213
5. A Decoy Receptor–Ligand Complex	214
6. The DR Preligand Association Domain	215
7. Death Ligand Structure–Activity Relationships	217
8. Structural Analysis of AntiTNF Agents	219
9. Structural Analysis of the Blockade of DR Function	220
10. DR Cytoplasmic Domains	221
11. DD Structure	222
12. The DD Superfamily	225
13. DD Assembly Revealed by the Structure of the PIDDosome Core	226
14. Structural Characterization of CD95:FADD-DD Complexes	228
15. Relevance of CD95:FADD-DD Assemblies to Physiological CD95 Signaling	230
16. Unanswered Questions and Future Prospects	233
Acknowledgments	234
References	234

10. Use of E2~Ubiquitin Conjugates for the Characterization of Ubiquitin Transfer by RING E3 Ligases Such as the Inhibitor of Apoptosis Proteins	243
Adam J. Middleton, Rhessa Budhidarmo, and Catherine L. Day	
1. Introduction	244
2. Synthesis of E2~Ub Conjugates	246
3. Characterization of RING-E2~Ub Complexes	251
4. Conclusion	259
Acknowledgments	260
References	260
11. Multidimensional Profiling in the Investigation of Small-Molecule-Induced Cell Death	265
Adam J. Wolpaw and Brent R. Stockwell	
1. Introduction	266
2. Gene Expression Profiling	271
3. Protein Quantification	277
4. Gene-Small-Molecule Interactions	280
5. Small-Molecule Combination Interactions	282
6. Cell Line Viability Profiling	284
7. Quantitative Imaging	288
8. Modulatory Profiling	290
9. Conclusions	296
References	297
