Section I

Recombinant Expression of Membrane Proteins

1. Engineering <i>Escherichia coli</i> for Functional Expression of Membrane Proteins	3
Franz Y. Ho and Bert Poolman	
1. Introduction	4
2. Preparation of Erythromycin-Sensitive <i>E. coli</i> Strain	8
3. Preparation of Expression Plasmid	10
4. Selecting Cells for Better Expression	14
5. Characterizing Evolved Strains	15
6. Summary	17
Acknowledgments	18
References	18
2. ACEMBLING a Multiprotein Transmembrane Complex: The Functional SecYEG-SecDF-YajC-YidC Holotranslocon Protein Secretase/Insertase	23
Joanna Komar, Mathieu Botte, Ian Collinson, Christiane Schaffitzel, and Imre Berger	
1. Introduction	24
2. ACEMBLING the HTL Multiprotein Complex	27
3. Purifying the HTL	28
4. HTL Integrity and Activity	32
5. Discussion and Conclusions	43
Acknowledgments	46
References	46
3. Expression and Purification of OsVDAC4	51
Ashwini Godbole, Ashvini K. Dubey, Rohan Mitra, Palakolanu S. Reddy, and M.K. Mathew	
1. Introduction	52
2. Equipment	53

3. Materials	53
4. Protocols	57
Acknowledgments	74
References	74
4. Membrane Protein Expression in <i>Lactococcus lactis</i>	77
Martin S. King, Christoph Boes, and Edmund R.S. Kunji	
1. Introduction	78
2. Equipment and Materials	84
3. Buffers and Media	85
4. Protocol	87
5. Step 1: Cloning the Target Gene into pNZ8048 and Transformation into <i>L. lactis</i>	89
6. Step 2: Growth of <i>L. lactis</i> , Expression of the Target Protein and Preparation of Membrane Vesicles	94
Acknowledgment	96
References	96
5. An Unconventional Anaerobic Membrane Protein Production System Based on <i>Wolinella succinogenes</i>	99
Michael Lafontaine and C. Roy D. Lancaster	
1. Introduction	100
2. Methods	106
3. Purification of Proteins Expressed in <i>W. succinogenes</i>	111
Acknowledgments	118
References	119
6. Membrane Protein Expression and Analysis in Yeast	123
Katrien Claes, Mouna Guerfal, and Nico Callewaert	
1. Theory	124
2. Equipment	125
3. Materials	126
4. Protocol	128
5. Step 1: Transformation of <i>Y. lipolytica</i>	129
6. Step 2: Small-Scale Membrane Protein Expression	132
7. Step 3: Membrane Protein Preparation	133
8. Step 4: Membrane Protein Analysis: Expression Levels	134
9. Step 5: Membrane Protein Analysis: Functionality	135
References	139
Further reading	140

7. Heterologous Expression of G-Protein-Coupled Receptors in Yeast	141
Nicolas Bertheleme, Shweta Singh, Simon Dowell, and Bernadette Byrne	
1. Introduction	142
2. <i>Pichia pastoris</i>	142
3. <i>Saccharomyces cerevisiae</i>	144
4. Which System to Choose?	146
5. Generating <i>P. pastoris</i> Expression Plasmids	146
6. Generating and Screening the <i>P. pastoris</i> Expression Clones	147
7. Some Considerations	150
8. Generating <i>S. cerevisiae</i> Expression Clones	151
9. In-Gel Fluorescence	152
10. Confocal Microscopy	153
11. Assessment of Protein Expression Levels	155
12. Yeast Cell Growth Assay	156
13. Optimization of the Assay Conditions	157
14. Outcome of the Functional Analysis	158
15. Conclusions	159
Acknowledgments	159
References	160
8. Recombinant G Protein-Coupled Receptor Expression in <i>Saccharomyces cerevisiae</i> for Protein Characterization	165
Kory M. Blocker, Zachary T. Britton, Andrea N. Naranjo, Patrick M. McNeely, Carissa L. Young, and Anne S. Robinson	
1. Introduction	166
2. Plasmid Design	167
3. Characterization	169
4. Conclusion	179
Acknowledgments	180
References	180
9. Baculovirus-Mediated Expression of GPCRs in Insect Cells	185
Tuulia Saarenpää, Veli-Pekka Jaakola, and Adrian Goldman	
1. Introduction	186
2. Cell Maintenance	188
3. Recombinant Bacmid DNA	191
4. Transfection, Amplification, and Storage of Virus	208
5. Protein Expression	213
References	216

10. Expression of Membrane Proteins in the Eyes of Transgenic <i>Drosophila melanogaster</i>	219
Yvonne Hackmann, Lisa Joedicke, Valérie Panneels, and Irmgard Sinning	
1. Introduction	220
2. Protein Expression in Transgenic <i>Drosophila melanogaster</i>	221
3. Protocol	224
4. Case Study: Signal Peptide Peptidase	236
5. Conclusions and Outlook	236
References	238
11. Rapid Method to Express and Purify Human Membrane Protein Using the <i>Xenopus</i> Oocyte System for Functional and Low-Resolution Structural Analysis	241
Benjamin Cléménçon, Michael Fine, Philipp Schneider, and Matthias A. Hediger	
1. Introduction	242
2. Subcloning in pMJB08 and cRNA Production	243
3. Frog Surgery, Oocytes Preparation and Injection	244
4. Determination of Maximal Level Expression	251
5. Membrane Preparation and Detergent Screening	253
6. Membrane Protein Purification: Ion Metal Affinity Chromatography	256
7. Posttranslational Verification Using Deglycosylation	258
8. Determination of Surface Membrane Expression Using Surface Biotinylation	259
9. Functional Verification of Membrane Proteins in the Oocyte	260
10. Grids Preparation and Negative Staining	261
11. Image Processing	261
12. Conclusion	264
Acknowledgments	264
References	264
12. Expression of G Protein-Coupled Receptors in Mammalian Cells	267
Raja Chakraborty, Bing Xu, Rajinder P. Bhullar, and Prashen Chelikani	
1. Introduction	268
2. Materials and Supplies	270
3. Procedure	273
Acknowledgments	279
References	280

13. Construction of Stable Mammalian Cell Lines for Inducible Expression of G Protein-Coupled Receptors	283
Chikwado A. Opefi, Dale Tranter, Steven O. Smith, and Philip J. Reeves	
1. Introduction	284
2. Construction of Stable HEK293S Cell Lines Containing Integrated Genes Regulated by Tetracycline	286
3. Growth of Tetracycline-Inducible Stable Cell Lines in Suspension Culture	299
4. Purification of Membrane Proteins Tagged with the Antirhodopsin Rho-1D4 Antibody	301
Acknowledgments	304
References	304
14. Rapid and Facile Recombinant Expression of Bovine Rhodopsin in HEK293S GnTI⁻ Cells Using a PiggyBac Inducible System	307
Lydia N. Caro, Zhijie Li, Aidin R. Balo, Ned Van Eps, James M. Rini, and Oliver P. Ernst	
1. Theory	308
2. Protocol	310
3. Step 1: Subcloning of Wild-Type and Mutant Opsin cDNA into Plasmid, PB-T-PAF	313
4. Step 2: Transfection, Transient Expression, and Generation of Stable Bulk Cell Cultures	317
5. Step 3: Scale-Up of Bulk Cell Cultures in Roller Bottles	320
6. Step 4: Induction and Cell Harvesting	321
7. Step 5: Rhodopsin Purification and Spin Labeling	323
8. Conclusion	326
Acknowledgments	328
References	328
15. Semliki Forest Virus-Based Expression of Recombinant GPCRs	331
Kenneth Lundstrom	
1. Introduction	332
2. SFV Expression System	333
3. Expression of GPCRs	339
4. Summary	346
References	348

16. Screening for Lipid Requirements of Membrane Proteins by Combining Cell-Free Expression with Nanodiscs	351
Erik Henrich, Volker Dötsch, and Frank Bernhard	
1. Introduction	352
2. General Considerations	353
3. Protocol: CF Lysate Preparation	354
4. Protocol: Preparation of NDs and Liposomes	356
5. Protocol: Optimizing the Efficiency of CF Expression	359
6. Protocol: CF Expression Reactions in the L-CF Mode	360
7. Protocol: Lipid Modulation of Membrane Protein Activity: The Example of MraY Translocases	363
8. Protocol: Purification of CF-Expressed Membrane Proteins	365
9. Conclusion and Outlook	367
Acknowledgments	367
References	367
 Section II	
Reconstitution and Functional Characterization of Membrane Proteins	
17. Liposome Reconstitution and Transport Assay for Recombinant Transporters	373
Zachary Lee Johnson and Seok-Yong Lee	
1. Introduction	373
2. Reconstitution of Protein into Liposomes	375
3. Assaying Transport	378
4. Summary	381
Acknowledgment	382
References	382
 18. Lipid Reconstitution and Recording of Recombinant Ion Channels	 385
Randy B. Stockbridge and Ming-Feng Tsai	
1. Introduction	386
2. Liposome Reconstitution of Ion Channels	386
3. Liposome Flux Assays	391
4. Electrical Recording of Reconstituted Protein	395
5. Summary	402
Acknowledgments	402
References	402

19. Reconstitution of Membrane Proteins: A GPCR as an Example	405
Alan D. Goddard, Patricia M. Dijkman, Roslin J. Adamson, Rosana Inácio dos Reis, and Anthony Watts	
1. Introduction	406
2. Production of Liposomes	406
3. Reconstitution into Liposomes	409
4. Reconstitution into Nanodiscs	413
5. Reconstitution into Lipodisks	416
6. Determination of Lipid-to-Protein Ratio	418
7. Concentration Methods	421
8. Summary	421
Acknowledgments	422
References	422
20. Ion Channel Reporter for Monitoring the Activity of Engineered GPCRs	425
Christophe J. Moreau, Katarzyna Niescierowicz, Lydia N. Caro, Jean Revilloud, and Michel Vivaudou	
1. Introduction	426
2. ICCR Design	440
3. Functional Characterization	446
4. Current Advantages and Limitations of the ICCR Technology	451
Acknowledgments	452
References	452
21. Methods for Labeling Skeletal Muscle Ion Channels Site-Specifically with Fluorophores Suitable for FRET-Based Structural Analysis	455
Mohana Mahalingam and James D. Fessenden	
1. Introduction	456
2. Fluorescent Protein (FP) Fusions	458
3. Labeling of Tetracysteine (Tc) Tags by Biarsenical Fluorophores	461
4. Labeling of Poly-Histidine Tags by Fluorescent NTA Conjugates	464
5. Three-Way FRET Using a Combination of Site-Specific Labeling Methods	469
6. Summary	471
Acknowledgments	471
References	471

22. Structural and Functional Studies of NirC from <i>Salmonella typhimurium</i>	475
Adriana Rycovska-Blume, Wei Lü, Susana Andrade, Klaus Fendler, and Oliver Einsle	
1. Introduction	476
2. Production and Isolation of StNirC	477
3. Structural Analysis of StNirC	480
4. Functional Assays for StNirC	484
5. Conclusions	494
Acknowledgments	495
References	495
23. Surface Plasmon Resonance Analysis of Seven-Transmembrane Receptors	499
Tonia Aristotelous, Andrew L. Hopkins, and Iva Navratilova	
1. Introduction	500
2. Surface Plasmon Resonance	501
3. SPR Approaches to FBDD	503
4. SPR Applications for GPCRs	507
5. SPR Applications for Allosteric Compounds	514
6. SPR Fragment Screening of Thermostabilized GPCRs	516
7. SPR Fragment Screening of Fully Functional GPCRs	517
8. Confirmation of SPR Fragment Hits	521
9. Conclusion	522
References	523
24. Cross-linking Strategies to Study Peptide Ligand-Receptor Interactions	527
Jeffrey M. Becker and Fred Naider	
1. Introduction	528
2. Photochemical Cross-linking	529
3. Chemical Cross-linking	534
4. Cross-Linking by Unnatural Amino Acid Replacement into the Receptor	537
5. Identifying the Cross-link Site	539
6. Concluding Remarks	543
Acknowledgments	544
References	544

25. From Recombinant Expression to Crystals: A Step-by-Step Guide to GPCR Crystallography	549
Anun K. Shukla, Punita Kumari, Eshan Ghosh, and Kumari Nidhi	
1. Introduction	550
2. Target Selection, Construct Design, and Protein Engineering	550
3. Recombinant Expression and Selection of Host System	553
4. Functional Solubilization and Homogenous Purification	554
5. Approaches for Crystallogenesis and Optimization	556
6. Conclusion and Future Perspectives	558
Acknowledgments	558
References	558
26. Structure-Based Biophysical Analysis of the Interaction of Rhodopsin with G Protein and Arrestin	563
Martha E. Sommer, Matthias Elgeti, Peter W. Hildebrand, Michal Szczepek, Klaus Peter Hofmann, and Patrick Scheerer	
1. Introduction	564
2. Preparation of Proteins and Peptides	567
3. Protein X-ray Crystallography	572
4. UV-Vis Absorption Spectroscopy: "Extra Meta II"	578
5. Site-Directed Fluorescence Spectroscopy	582
6. FTIR Difference Spectroscopy	589
7. Molecular Dynamics Simulations	595
Acknowledgments	601
References	602
Author Index	609
Subject Index	639
