

Contents

CHAPTER 1	Introduction	1
	Overview of the Cancer Genome Atlas	1
	Scope, Implementation, and Applicability of This Guide	3
	Policy Considerations	4
	References	5
CHAPTER 2	Gathering Project Requirements	7
	Introduction	7
	Establish the Purpose of the Project	7
	Identify Key Stakeholders	9
	Set Project Milestones	9
	Design a Pipeline for the Project	10
	Examples of Pipeline Activities	13
	Conclusion	14
	References	14
CHAPTER 3	Communications Strategies	15
	<i>With contribution by Emma Spaulding, Center for Cancer Genomics, National Cancer Institute, National Institutes of Health</i>	
	Introduction	15
	Why Develop a Communications Strategy?	15
	A Note on Press Releases	16
	A Communications Strategy Applies Tactics to Share Messages	16
	How to Develop a Communications Strategy	17
	Step 1: Audiences: Who Are the Audiences and Stakeholders?	17
	Step 2: Challenges: What Are Their Concerns?	18
	Step 3: Consideration: Are the Audience's Concerns Valid?	19
	Step 4: Messaging: What Should Be Said in Response?	20
	Step 5: Tactics: What Is the Best Way to Reach the Audience?	21
	Step 6: Priority: Which Audiences and Messages Are Most Important?	21
	Step 7: Tactic Evaluation: Were the Communications Messages Received?	22
	Step 8: Strategy Evaluation: Are the Tactics Working?	22
	Project and Policy Changes: A Part of Strategy Evaluation	23
	Examples from Communications Strategies	23
	Communications Devices: Symposia and Visual Identity	26
	Annual Scientific Symposia	26
	Visual Identity	27

Conclusion	28
References.....	29
CHAPTER 4 Pipeline: Sample Acquisition	31
Introduction.....	31
Define the Sample Set for the Project	31
Establish a Central Biospecimen Processing Facility.....	32
Establish Sample Qualification Metrics.....	33
Sample Processing and Distribution to Data Generation Centers.....	34
Establish Consent Protocols	35
Handling Institutional Review Boards in Multi-Center Studies.....	36
Implications of Using a Centralized IRB.....	36
Implications of Honoring Individual IRB Approval Rulings.....	36
Identify Potential Tissue Source Sites	37
Establish Contractual Obligation and Payment Plans for Tissue Source Sites.....	37
Management of Clinical Data Collection	38
Sharing Clinical Data	40
Practical Considerations for Clinical Data Collection and Management.....	40
References.....	41
CHAPTER 5 Pipeline: Data Generation	43
Introduction.....	43
Building a Data Generation Model	43
What Data Types Should Be Generated?	43
What Technologies and Methods Should Be Employed to Generate Data?	45
Who Will Be Generating the Data?.....	45
Establishing a Data Generation Pipeline and Quality Control Measures	47
Proper Tracking of Data Generation.....	48
Conclusion	48
References.....	49
CHAPTER 6 Pipeline: Data Storage and Dissemination	51
Introduction.....	51
Creation of Centralized Data Management Center.....	51
Define Standard Data and Metadata Formats.....	52
Collect, Store, and Version Data and Metadata	53
Implement Quality Control Measures for Submitted Data.....	55
Put in Place Appropriate Security and Access Controls	56

Redistribute Data and Metadata Tailored to Diverse Project Stakeholders and End Users	56
Conclusion	57
References.....	58
CHAPTER 7 Pipeline: Data Analysis.....	59
Introduction.....	59
Preconceived Questions to Answer.....	59
Establishment of Data Analysis Teams	61
Analysis Teams and Diversity of Expertise.....	61
Managing Contributions	61
Analysis Structure and Methodology	62
Study Design.....	62
Emerging Analytical Tools	63
Outliers/Exceptional Cases.....	63
Practical Considerations	64
Falling Into a “Formula”	64
Aiming for Journals.....	64
Authorship Models	65
Timeliness Versus Scientific Merit.....	65
Conclusion	66
References.....	67
CHAPTER 8 Quality Control, Auditing, and Reporting	69
Introduction.....	69
Establish Quality Metrics for Each Component of the Pipeline.....	69
Ensure Ethical Management of Samples, Information, and Derived Data Sets	70
Provide Quality Reports to Stakeholders to Help Improve Processes	71
Example of a Quality Management Issue.....	71
Conclusion	72
CHAPTER 9 Project Closure.....	73
Introduction.....	73
Levels of Closure.....	73
Publication Level	73
Institutional Level.....	73
Program Level	77
Budgetary Considerations.....	77
Budgetary Vigilance by Program Office	78
Budgetary Vigilance by Data Providers	78

Conclusion	78
References.....	79

Conclusion.....	81
Flexibility.....	81
Transparency.....	82
Collaboration	82
Communication.....	82
References.....	83

Appendix A: Glossary of Terms	85
Appendix B: TCGA Workflow Diagrams	91
Appendix C: Publication Guidelines as of July 14, 2015	97
Appendix D: Mutation Annotation Format (MAF) Specification.....	103
Appendix E: MAGE-TAB.....	111
Appendix F: Data Use Certification Agreement	115
Appendix G: TCGA Analysis Working Group Charter	127
Index	133
