vii

1. Regulation of CD4 and CD8 Coreceptor Expression and CD4 Versus CD8 Lineage Decisions	1
Takeshi Egawa	
1. Introduction	2
2. CD4 and CD8 Coreceptors and Thymocyte Selection	4
3. Cis-Regulatory Elements for Genes Encoding CD4 and CD8 Coreceptors	10
4. Transcription Factors Regulating CD4 and CD8 Expression and Lineage Choice in the Thymus	19
5. Regulation of CD4 and CD8 in Mature T Cells	27
6. Cytokine Receptor Signals and CD4/CD8 Lineage Commitment	30
7. Concluding Remarks	32
Acknowledgments	33
References	33
2. Mast Cells' Integrated Actions with Eosinophils and Fibroblasts in Allergic Inflammation: Implications for Therapy	41
Nadine Landolina, Roopesh Singh Gangwar, and Francesca Levi-Schaffer	
1. Introduction	42
2. Mast Cells and Eosinophils in Allergic Inflammation	45
3. Mast Cell Eosinophil Cross Talk: The Allergic Effector Unit	48
4. Fibroblasts from Repair to Fibrosis in Allergic Inflammation	57
5. Mast Cells and Fibroblasts: Bidirectional Interactions	59
6. Eosinophils and Fibroblasts: Bidirectional Interactions	62
7. Therapeutic Implications of Mast Cells, Eosinophils, and Fibroblasts Cross Talks for Allergic Inflammation	63
8. Future Drugs	68
9. Conclusions	69
Acknowledgments	70
References	70
3. Positive-Selection-Inducing Self-Peptides Displayed by Cortical Thymic Epithelial Cells	87
Kensuke Takada and Yousuke Takahama	
1. Introduction	88
2. Characterization of Positive-Selection-Inducing Peptides	90

3. Antigen Processing in Cortical Thymic Epithelial Cells	97
4. Concluding Remarks	103
Acknowledgment	104
References	104
4. Group 2 Innate Lymphoid Cells in the Regulation of Immune Responses	111
Ben Roediger and Wolfgang Weninger	
1. Introduction	112
2. Meet the Family	113
3. Drawing Parallels Between ILC Cells and T Cells	114
4. Human and Murine ILC2 Cell Phenotypes	115
5. ILC2 Cell Development	116
6. The Cytokine Factory	120
7. Sensing of the Environment by ILC2 Cells	124
8. The Black Sheep of the Family: The Dermal ILC2 Cell	135
9. Are ILC2 Cells Upstream or Downstream of T Cells?	138
10. Concluding Remarks	140
References	141
5. Microbes and B Cell Development	155
Duane R. Wesemann	
1. Microbiota	156
2. Early-Life B Cell Development and the Gut	158
3. Microbial Influence on Immunoglobulin Production	167
4. B Lineage Cell Influence on Commensal Microbe Ecology	169
5. Concluding Remarks	172
Acknowledgments	172
References	172
