vii

1. Microbiota Regulation of the Mammalian Gut-Brain Axis	1
Aurelijus Burokas, Rachel D. Moloney, Timothy G. Dinan and John F. Cryan	
1. Introduction	2
2. Pathways of Microbiota-Gut-Brain Communication	4
3. Microbiota Regulation	14
4. Disorders of the Microbiota-Gut-Brain Axis	23
5. Implications and Future Perspectives	36
Acknowledgments	38
References	38
2. Aromatic Metabolism of Filamentous Fungi in Relation to the Presence of Aromatic Compounds in Plant Biomass	63
Miia R. Mäkelä, Mila Marinović, Paula Nousiainen, April J.M. Ljwanag, Isabelle Benoit, Jussi Sipilä, Annele Hatakka, Ronald P. de Vries and Kristiina S. Hildén	
1. Introduction	65
2. Plant Biomass Degrading Fungi	66
3. Aromatic Compounds in Plant Biomass	69
4. Sensitivity of Fungi to Aromatic Compounds	79
5. Enzymatic Release of Aromatics Compounds from Plant Biomass by Fungi	83
6. Conversion of Lignin Model Compounds	88
7. Aromatic Metabolism in Fungi	98
8. Applications of Plant-Based Aromatic Compounds	117
9. Concluding Remarks	119
Acknowledgments	119
References	119
3. <i>Candida</i> Survival Strategies	139
Melanie Polke, Bernhard Hube and Ilse D. Jacobsen	
1. Introduction	140
2. The Role of Yeast-to-Hyphae Transition and Other Phenotypic Changes for <i>C. albicans</i> Survival	143
3. How to Deal with Stress—Lessons from <i>C. albicans</i>	153

4. Genetic Flexibility—Adaptation on Genomic, Transcriptional, and Translational Level	160
5. Metabolic Adaptation—Nutrient and Micronutrient Acquisition in the Human Host	163
6. From Attachment to Disease: Adhesion, Invasion, and Damage	167
7. Interaction with the Immune System—Evading Elimination	172
8. Living within a Community	178
9. Conclusion	198
Acknowledgments	199
References	199
 4. Tailoring Specialized Metabolite Production in <i>Streptomyces</i>	237
Jana K. Hiltner, Iain S. Hunter and Paul A. Hoskisson	
1. Introduction	237
2. Interplay of Primary and Secondary Metabolism in Streptomycetes	239
3. Streptomycetes as Specialized Metabolite Producers	239
4. Evolution of Primary and Specialized Metabolism	241
5. The PEP-PYR-OAA Node as Target for Metabolic Engineering	244
6. Concluding Remarks	251
Acknowledgments	252
References	252
 Index	257
Contents of Previous Volumes	265
