1. Toward Modeling the Resistance and Resilience of "Below-ground" Fungal Communities: A Mechanistic and Trait-Based Approach	1
Ruth E. Falconer, Wilfred Otten and Nia A. White	
1. Introduction	2
2. Linking the Spatiotemporal Dynamics of Fungal Communities to the Environment	4
3. Disturbances and Subsequent Effect on Community Structure and Function	14
4. Toward Modeling Resistance and Resilience to Disturbances Mechanistically	18
5. Challenges	34
6. Conclusions	36
References	36
2. The Importance of the Microbial N Cycle in Soil for Crop Plant Nutrition	45
Penny R. Hirsch and Tim H. Mauchline	
1. Importance of N for Plants and Crop Production	46
2. Nitrogen Cycling	48
3. Agricultural Influences on the N Cycle	54
4. Future Perspectives	60
5. Summary	64
Acknowledgments	65
References	65
3. Polyhydroxyalkanoates: Much More than Biodegradable Plastics	73
Nancy I. López, M. Julia Pettinari, Pablo I. Nikel and Beatriz S. Méndez	
1. Introduction	74
2. Stress Resistance and Survival	75
3. Global Regulation	80
4. PHA Accumulation and Coordinated Regulation of Central Metabolism	85
5. Environmental Applications of PHA-Producing Organisms	91
6. Relationship of PHAs with Other Polymers and Extracellular Substances	94
7. Concluding Remarks	99
References	99

4. Catabolism of Phenol and Its Derivatives in Bacteria: Genes, Their Regulation, and Use in the Biodegradation of Toxic Pollutants	107
Jan Nešvera, Lenka Rucká and Miroslav Pátek	
1. Introduction	109
2. Catabolic Pathways of Phenol and Its Derivatives in Bacteria	110
3. Enzymes Involved in the Catabolism of Phenol and Its Derivatives in Bacteria	116
4. Genes Encoding Enzymes Involved in the Catabolism of Phenol and Its Derivatives in Bacteria	126
5. Regulation of Catabolism of Phenol and Its Derivatives in Bacteria	135
6. Applications for the Biodegradation of Phenolic Compounds	142
Acknowledgments	150
References	150
Index	161
Contents of Previous Volumes	165
