1. Physical Methods for Gene Transfer

1

Mohammad Alsaggar and Dexi Liu

- | | |
|--|----|
| 1. Introduction | 2 |
| 2. Most Commonly Used Physical Methods | 4 |
| 3. Future Perspectives | 15 |
| References | 16 |

2. Nonviral Gene Delivery Systems by the Combination of Bubble Liposomes and Ultrasound

25

Daiki Omata, Yoichi Negishi, Ryo Suzuki, Yusuke Oda,
Yoko Endo-Takahashi and Kazuo Maruyama

- | | |
|--|----|
| 1. Introduction | 26 |
| 2. Microbubbles and Ultrasound | 27 |
| 3. Bubble Liposomes | 28 |
| 4. <i>In vitro</i> pDNA Delivery with BLs | 30 |
| 5. <i>In vivo</i> pDNA Delivery with BLs | 31 |
| 6. <i>In vitro/In vivo</i> Small Interfering RNA Delivery with BLs | 33 |
| 7. siRNA-Loaded BLs | 35 |
| 8. MicroRNA-Loaded BLs | 38 |
| 9. Endosomal Escape Enhanced by BLs | 38 |
| 10. Conclusions | 43 |
| Acknowledgments | 43 |
| References | 43 |

3. Electroporation-Mediated Gene Delivery

49

Jennifer L. Young and David A. Dean

- | | |
|--|----|
| 1. Introduction | 50 |
| 2. Theory of Membrane Electroporation | 51 |
| 3. Mechanism(s) of Electroporation-Mediated Gene Delivery | 53 |
| 4. Pulse Parameters | 58 |
| 5. Electrodes | 60 |
| 6. Tissues that can be Directly Injected: Liver and Skeletal Muscle | 63 |
| 7. Electroporation of Skeletal Muscle: DNA Vaccines and Use as Bioreactors | 65 |
| 8. Electroporation of Skin: Vaccination, Wound Healing, and Cancer | 67 |

9. Electroporation of the Cardiovascular System	71
10. Gene Delivery into the Lung Using Electroporation	73
11. Conclusions	78
Acknowledgments	78
References	78
4. Hydrodynamic Delivery	89
Takeshi Suda and Dexi Liu	
1. Fundamentals of Hydrodynamic Delivery	89
2. Applications of Hydrodynamic Gene Delivery	95
3. Hydrodynamic Delivery in Large Animals—Toward Clinic Application	100
4. Future Prospective	103
Acknowledgments	103
References	104
5. Sustained Expression from DNA Vectors	113
Suet Ping Wong, Orestis Argyros and Richard P. Harbottle	
1. Introduction	114
2. Immune Responses	115
3. Preventing Epigenetic Silencing	116
4. Position Effect	117
5. Persistent Nonintegrating Episomal DNA Vectors	118
6. Episomal DNA Vectors Based on Replication-Deficient Viruses	118
7. Episomal DNA Vectors Based on Chromosomal Elements	121
8. Mammalian Artificial Chromosomes	121
9. Episomally Maintained pDNA Vectors	122
10. Scaffold/Matrix Attachment Regions	123
11. Insulator Function	124
12. Transcription Augmentation	125
13. Mitotic Stability	127
14. Persistent Expression Mediated by S/MAR DNA Vectors	127
15. Alternative Elements to Modulate Transcription Levels of DNA Vectors	128
16. Optimization of Episomal Vectors for Gene Therapy	129
17. Promoters and Enhancers	130
18. The CMV Promoter	131
19. The UbC Promoter	131
20. The AAT Promoter	132
21. Enhancers	132
22. Posttranscriptional Regulation	133

23. Effect of CpG Depletion	135
24. Studies Demonstrating Passive Episomal State of Minicircles <i>In vivo</i>	138
25. Conclusions	142
References	143
6. Noncoding Oligonucleotides: The Belle of the Ball in Gene Therapy	153
Ka-To Shum and John J. Rossi	
1. Introduction	154
2. Noncoding Oligonucleotides-Based Therapeutics in Gene Therapy	155
3. Challenges for Successful Gene Therapy Using Noncoding Oligonucleotides	171
Acknowledgments	172
Conflict of Interest Statement	172
References	172
7. Self-Amplifying mRNA Vaccines	179
Luis A. Brito, Sushma Kommareddy, Domenico Maione, Yasushi Uematsu, Cinzia Giovani, Francesco Berlanda Scorza, Gillis R. Otten, Dong Yu, Christian W. Mandl, Peter W. Mason, Philip R. Dormitzer, Jeffrey B. Ulmer and Andrew J. Geall	
1. Introduction	180
2. History of Nucleic Acid Vaccines	181
3. Introduction to mRNA Vaccines	183
4. Self-Amplifying mRNA	184
5. Delivery of Self-Amplifying mRNA Vaccines	185
6. Production and Purification of Self-Amplifying mRNA	211
7. Stability of mRNA	215
8. Future Prospects for Nonviral Delivery of Self-Amplifying mRNA Vaccines	220
Acknowledgments	222
References	222
8. Gene Electrotransfer Clinical Trials	235
Richard Heller and Loree C. Heller	
1. Introduction	236
2. GET in Clinical Trials	237
3. Summary and Conclusions	254
References	257
