1. Oxidative Stress, Unfolded Protein Response, and Apoptosis in Developmental Toxicity	1
Allison Kupsco, Daniel Schlenk	
1. Introduction	4
2. Oxidative Stress	4
3. Unfolded Protein Response	16
4. Apoptosis	25
5. Integration of Oxidative Stress, UPR, and Apoptosis	31
6. Intersection of UPR, Apoptosis, and Oxidative Stress in Developmental Toxicity	37
7. Conclusions	47
Acknowledgment	48
References	49
2. New Insights into the Organization of Plasma Membrane and Its Role in Signal Transduction	67
Kenichi G.N. Suzuki	
1. Introduction	68
2. Actin-Based Membrane Skeleton	69
3. Lipid Rafts	72
4. Receptor Clustering	76
5. Signal Transduction	81
6. Conclusion	88
Acknowledgments	88
References	89
3. Regulators of G-Protein-Signaling Proteins: Negative Modulators of G-Protein-Coupled Receptor Signaling	97
Geoffrey E. Woodard, Isaac Jardín, A. Berna-Erro, Gines M. Salido, Juan A. Rosado	
1. Introduction	98
2. A/RZ Subfamily of RGS Proteins	102
3. B/R4 Subfamily of RGS Proteins	117

4. C/R7 Subfamily of RGS Proteins	136
5. D/R12 Subfamily of RGS Proteins	142
6. RGS22 Subfamily of RGS Proteins	151
7. Concluding Remarks	152
Acknowledgments	153
References	153
 4. New Insights into the Role of Podoplanin in Epithelial-Mesenchymal Transition	 185
Jaime Renart, Patricia Carrasco-Ramírez, Beatriz Fernández-Muñoz, Ester Martín-Villar, Lucía Montero, María M. Yurrita, Miguel Quintanilla	
1. Introduction	187
2. Podoplanin	188
3. Epithelial-Mesenchymal Transition	208
4. Podoplanin and EMT	215
5. Concluding Remarks	223
Acknowledgments	224
References	224
 5. Microtubule-Depolymerizing Kinesins in the Regulation of Assembly, Disassembly, and Length of Cilia and Flagella	 241
Zhangfeng Hu, Yinwen Liang, Dan Meng, Liang Wang, Junmin Pan	
1. Introduction	242
2. Flagellar and Ciliary Kinesins	243
3. Family of MT-Depolymerizing Kinesins	246
4. Ciliary Function and Regulation of Kinesin-13 Family	249
5. Maintenance of Ciliary Length by Kinesin-8 Member KIF19A	256
6. Concluding Remarks	258
Acknowledgments	259
References	259
 6. Nuclear Envelope and Chromatin, Lock and Key of Genome Integrity	 267
Sophie Gay, Marco Foiani	
1. Introduction	268
2. Interaction between Nuclear Envelope Components and Chromatin	269

3. Chromatin Positioning and Nuclear Envelope	280
4. Impact of Chromatin and Nuclear Envelope on Transcription	291
5. Impact of Chromatin and Nuclear Envelope on Replication	297
6. Impact of Chromatin and Nuclear Envelope on Repair	300
7. Impact of Chromatin and Nuclear Envelope on Mitosis	307
8. Nuclear Mechanotransduction: An Echo between Mechanostress and Chromatin	311
9. Concluding Remarks	314
Acknowledgments	315
References	315
7. Role of Ocr1 in Primary Cilia Assembly	331
Kayalvizhi Madhivanan, Swetha Ramadesikan, R. Claudio Aguilar	
1. Introduction to Lowe Syndrome	332
2. Ocr1	332
3. Functions of Ocr1	335
4. LS as Ciliopathy or Ciliopathy-Associated Disease	343
5. Conclusion	344
References	344
