Contributors

ix

1. Epidermal Growth Factor Signaling in Transformed Cells	1
Stephan Lindsey, Sigrid A. Langhans	
1. Introduction	2
2. Hallmarks of Transformation	3
3. The ErbB/HER Receptor Family in Normal and Transformed Cells	8
4. EGFR Signaling in Normal and Transformed Cells	13
5. Cross Talk between EGFR Signaling and Other Major Signaling Pathways in Transformed Cells	21
6. Therapy	25
7. Concluding Remarks	29
Acknowledgments	29
References	29
2. New Insights into Antimetastatic and Antiangiogenic Effects of Cannabinoids	43
Robert Ramer, Burkhard Hinz	
1. Introduction	46
2. Cannabinoids as Systemic Anticancer Drugs	48
3. Cannabinoids and Tumor Angiogenesis	61
4. Effects of Cannabinoids on Tumor Cell Metastasis	84
5. Conclusion	97
References	97
3. Insight into the Role of Wnt5a-Induced Signaling in Normal and Cancer Cells	117
Mitsuharu Endo, Michiru Nishita, Masanori Fujii, Yasuhiro Minami	
1. Introduction	118
2. Wnt5a-Ror2 Axis in Developmental Morphogenesis	119
3. Roles of Wnt5a-Ror2 Axis in Normal Cell Functions	124
4. Wnt5a-Ror2 and Ror1 Axes in Cancer Cells	131
5. Concluding Remarks	138
Acknowledgments	140
References	140

4. New Insight into Cancer Aneuploidy in Zebrafish	149
GuangJun Zhang, Jer-Yen Yang, Zhibin Cui	
1. Introduction	150
2. The Cause of Aneuploidy	151
3. Biological Effects of Aneuploidy	152
4. Zebrafish as a Cancer Model for Human Cancers	155
5. Cancer Driver Genes on Aneuploid Chromosomes	159
6. Future Directions	162
Acknowledgments	164
References	164
5. The Amazing Ubiquitin-Proteasome System: Structural Components and Implication in Aging	171
Eleni N. Tsakiri, Ioannis P. Trougakis	
1. Introduction	173
2. Aging	175
3. The Ubiquitin System	179
4. The Proteasome	184
5. Regulation of the Ub System during Cellular Senescence and <i>In vivo</i> Aging	202
6. Implication of ERAD and OMMAD in Cellular Senescence and <i>In vivo</i> Aging	203
7. Alterations of the Proteasome Functionality during Cellular Senescence and <i>In vivo</i> Aging	204
8. Modulation of the UPS as an Antiaging Approach	208
9. Conclusive Remarks and Perspectives	211
Acknowledgments	212
Conflict of Interest	212
References	212
6. Biogenesis and Function of the NGF/TrkA Signaling Endosome	239
M. Caleb Marlin, Guangpu Li	
1. Introduction	240
2. NGF	242
3. TrkA	243
4. The Signaling Endosome	246
5. Concluding Remarks	252
Acknowledgments	253
References	253

7. Multiple Myeloma as a Model for the Role of Bone Marrow Niches in the Control of Angiogenesis	259
Domenico Ribatti, Beatrice Nico, Angelo Vacca	
1. Introduction	259
2. EPCs and MSCs	261
3. Vascular Niche	262
4. Osteoblastic Niche	263
5. MM Niche and Angiogenesis	265
6. Targeting Angiogenesis in the MM Niche	269
7. Concluding Remarks	273
Acknowledgments	274
References	274
<i>Index</i>	283
