Contributors.....	xi
Preface	xvii
CHAPTER 1 Correlative Light and Electron Microscopy Analysis of the Centrosome: a Step-by-step Protocol.....	1
Dong Kong, Jadranka Loncarek	
Introduction.....	2
1. Experimental Procedure	3
Acknowledgments.....	16
Supplementary Data.....	17
References.....	17
CHAPTER 2 Generation of a Conditional Analog-sensitive Kinase in Human Cells Using CRISPR/Cas9-mediated Genome Engineering.....	19
Tyler C. Moyer, Andrew J. Holland	
Introduction.....	20
1. CRISPR/Cas System.....	21
2. Analog-Sensitive Kinases	21
3. Methods	22
4. Functional Analysis.....	33
Conclusion	34
References.....	34
CHAPTER 3 Studying Centrosome Function Using Three-dimensional Cell Cultures.....	37
Teresa Arnandis, Susana A. Godinho	
Introduction.....	38
1. Methods	41
Conclusion	49
Acknowledgments.....	49
References.....	49
CHAPTER 4 Analysis of Centrosomes in Human Cancer.....	51
Stefan Duensing	
Introduction.....	52
Centrosomes and Cancer.....	52
Centrosome Aberrations and Mitotic Outcomes	53
Not All Centrosome Aberrations are Created Equal.....	53

CHAPTER 12	New Insights into Centrosome Imaging in <i>Drosophila</i> and Mouse Neuroepithelial Tissues	211
	Maria A. Rujano, Renata Basto, Véronique Marthiens	
	Introduction	212
1.	Imaging Centrosomes in <i>Drosophila</i> Neuroepithelial Cells	214
2.	High Spatial Resolution Imaging of Centrosomes in Neural Stem Cells of the Mouse Neocortex	220
	Conclusion	226
	Acknowledgments	226
	References	227
CHAPTER 13	Microinjection Techniques for Studying Centrosome Function in <i>Drosophila Melanogaster</i> Syncytial Embryos	229
	Paul T. Conduit, Daniel Hayward, James G. Wakefield	
	Introduction	230
1.	Protocol	231
2.	Collection and Preparation of <i>Drosophila</i> Embryos	232
3.	Preparing Samples for Microinjection	233
4.	Mounting Embryos for Spinning Disc Confocal Microscopy	235
5.	Microinjection of Embryos	238
6.	Perturbation via Cold Treatment	241
7.	Imaging and Data Analysis	242
	References	247
CHAPTER 14	A Yeast Two-hybrid Approach for Probing Protein—protein Interactions at the Centrosome	251
	Brian J. Galletta, Nasser M. Rusan	
	Introduction	252
1.	Identifying Direct Protein Interaction Have Had a Profound Impact on Understanding Centrosome Function	253
2.	Challenges to Understanding Protein—protein Interactions in the Centrosome	255
3.	Dissection of Complex, Multicomponent Protein Machines Using Y2H	256
4.	Performing an Array Based Screen for Centrosome Protein Interactions	259
5.	Generating Specific, Separation of Function Mutations by Reverse Y2H	267
	Summary	272

Acknowledgments.....	273
References.....	273

CHAPTER 15 Genome-wide RNAi Screens in S2 Cells to Identify Centrosome Components279

Jeroen Dobbelaere

Introduction.....	280
Centrosome Function and Structure	280
Early Characterization of the Molecular Composition of Centrosomes	281
Genetic Identification of Centriole Components in <i>Drosophila</i> and <i>C. elegans</i> and Other Model Systems	281
The First Genome-Wide RNA Interference Screen for Centrosomes	282
Identification of the Complete Proteome of Purified Centrosomes.....	282
Use of RNAi in <i>Drosophila</i> Cells to Study Genes Involved in MT Formation and Centrosome Function	283
1. Methods	284
2. Genome-Wide Screen	288
3. Image Acquisition.....	291
4. Scoring Phenotypes and Image Analysis	292
5. Validation of Potential Hits.....	294
Discussion.....	294
Acknowledgments.....	296
References.....	297

CHAPTER 16 Time-lapse Recording of Centrosomes and Other Organelles in *Drosophila* Neuroblasts301

**Judit Pampalona, Jens Januschke, Paula Sampaio,
Cayetano Gonzalez**

Introduction.....	302
1. Primary Cultures.....	303
2. Ex Vivo Whole Mount.....	309
3. Fluorescent Reporters	311
4. Remarks and Troubleshooting	311
Acknowledgments.....	313
Supplementary Data.....	313
References.....	313

CHAPTER 17 Centrosomes and Spindles in Ascidian Embryos and Eggs	317
Alex McDougall, Janet Chenevert, Gerard Pruliere, Vlad Costache, Celine Hebras, Gregory Salez, Remi Dumollard	
Introduction	317
1. Methods	318
References	337
CHAPTER 18 Ultrastructural Analysis of <i>Caenorhabditis elegans</i> cilia	341
Daniel Serwas, Alexander Dammermann	
Introduction	342
1. Methods	344
Discussion	363
Acknowledgments	364
References	364
CHAPTER 19 Method: In Vitro Analysis of Pericentriolar Material Assembly	369
Jeffrey B. Woodruff, Anthony A. Hyman	
Introduction	370
1. Methods	371
Conclusion	381
Acknowledgments	381
References	381
CHAPTER 20 Monitoring SPB Biogenesis in Fission Yeast with High Resolution and Quantitative Fluorescent Microscopy	383
Imène B. Bouhlef, Kathleen Scheffler, Phong T. Tran, Anne Paoletti	
Introduction	384
1. Monitoring SPB Duplication in Fixed SPB-Labeled Strains	384
2. Quantitative Analysis of SPB Biogenesis in Live Cells	387
Conclusion	390
Acknowledgments	390
References	390
Volumes in Series	393
Index	407
