Preface	xvii
CHAPTER 1 In Vitro Systems for the Study of Microtubule-based Cell Polarity in Fission Yeast.....	1
Núria Taberner, Andries Lof, Sophie Roth, Dimitry Lamers, Hans Zeijlemaker, Marileen Dogterom	
Introduction.....	2
1. Rationale	3
2. Materials	5
3. Methods	9
Discussion and Perspectives	19
Acknowledgments.....	20
References.....	20
CHAPTER 2 Microtubules, MAPs, and Motor Patterns	23
Kasimira T. Stanhope, Jennifer L. Ross	
Introduction.....	24
1. Methods	25
2. Simple Filament-gliding Assay with Kinesin-1 and Microtubules	25
3. Gliding Assay with MAP65 Cross-linkers to Visualize Dynamic Cross-linking.....	31
4. Cell-like Patterns from Gliding Prebundled Microtubule Filaments.....	35
Discussion and Summary	36
Acknowledgments.....	37
References.....	37
CHAPTER 3 Self-organization of Motors and Microtubules in Lipid-monolayered Droplets.....	39
Hella Baumann, Thomas Surrey	
Introduction.....	40
1. Materials	41
2. Methods	44
Results and Discussion	52
Acknowledgments.....	53
References.....	53

CHAPTER 4	Reconstitution of Microtubule-based Motility Using Cell Extracts.....	57
	Swathi Ayloo, Erika L.F. Holzbaur	
	Introduction.....	58
	1. Motility Assay Using Cell Extract.....	59
	2. Particle Tracking and Data Analysis.....	64
	3. Troubleshooting.....	65
	Conclusions and Future Directions.....	66
	Acknowledgments.....	66
	References.....	66
CHAPTER 5	Building Cells for Quantitative, Live-Cell Analyses of Collective Motor Protein Functions	69
	Eric A. Kumar, David Tsao, Anand Radhakrishnan, Michael Diehl	
	Introduction.....	70
	1. Generating Cells for Inducible, Live-Cell Motility Assays.....	72
	2. Comparative Analyses of Collective Motor Behaviors	76
	Concluding Remarks and Future Perspectives.....	80
	Acknowledgments.....	80
	References.....	81
CHAPTER 6	Reconstituting Cytoskeletal Contraction Events with Biomimetic Actin—Myosin Active Gels.....	83
	José Alvarado, Gijsje H. Koenderink	
	Introduction.....	84
	1. Building Contraction Chambers.....	87
	2. Preparing Contractile Active Gels	90
	3. Manipulating Contractile Active Gels	93
	Outlook.....	99
	Acknowledgments.....	100
	References.....	101
CHAPTER 7	Building an Artificial Actin Cortex on Microscopic Pillar Arrays	105
	R. Ayadi, W.H. Roos	
	Introduction.....	106
	1. Microfabrication of the Pillar Arrays	108
	2. A Biomimetic Actin Cortex Attached at Discrete Points	111

	Discussion.....	118
	Acknowledgments.....	120
	References.....	120
CHAPTER 8	Triggering Actin Polymerization in <i>Xenopus</i> Egg Extracts from Phosphoinositide-containing Lipid Bilayers.....	125
	Astrid Walrant, Daniel S. Saxton, Guilherme Pereira Correia, Jennifer L. Gallop	
	Introduction.....	126
	1. Preparation of HSS <i>Xenopus</i> Egg Extracts	128
	2. Membrane Preparation	133
	3. Actin Polymerization Assays.....	138
	Conclusions.....	145
	Acknowledgments.....	146
	References.....	146
CHAPTER 9	Reconstituting Geometry-modulated Protein Patterns in Membrane Compartments.....	149
	Katja Zieske, Petra Schuille	
	Introduction.....	150
	1. Reagents.....	152
	2. Methods	152
	Discussion and Future Perspectives.....	159
	Acknowledgments.....	162
	References.....	162
CHAPTER 10	Structural and Functional Studies of Membrane Remodeling Machines.....	165
	Raghav Kalia, Nathaniel Talledge, Adam Frost	
	Introduction to Membrane Remodeling.....	166
	1. Methods	170
	Perspective.....	197
	Acknowledgments.....	197
	References.....	198
CHAPTER 11	Building Interconnected Membrane Networks	201
	Matthew A. Holden	
	Introduction.....	202
	The Droplet Interface Bilayer	203

1. Methods	204
2. Functional Networks.....	212
3. Discussion	220
Conclusion	221
References.....	221
 CHAPTER 12 Using Supported Bilayers to Study the Spatiotemporal Organization of Membrane-bound Proteins.....	
Phuong A. Nguyen, Christine M. Field, Aaron C. Groen, Timothy J. Mitchison, Martin Loose	
Introduction	224
1. Equipment and Reagents	226
2. Preparation of SLBs	230
3. Fluorescence Microscopy	235
Conclusion	238
Acknowledgments.....	238
Supplementary Data.....	238
References.....	239
 CHAPTER 13 Reconstituting ParA/ParB-mediated Transport of DNA Cargo	
Anthony G. Vecchiarelli, James A. Taylor, Kiyoshi Mizuuchi	
Introduction	244
1. Methods	246
Discussion and Summary	266
Author Contributions.....	267
Acknowledgments.....	267
References.....	267
 CHAPTER 14 Cell-sized Liposomes that Mimic Cell Motility and the Cell Cortex	
Joël Lemièrre, Kevin Carvalho, Cécile Sykes	
Introduction	272
1. Liposome Preparation	273
2. Formation of an Actin Network at the Liposome Membrane..	278
Discussion and Conclusion.....	283
Acknowledgments.....	284
References.....	284

CHAPTER 15	Reconstitution of Cortical Actin Networks within Water-in-Oil Emulsions.....	287
	Enas Abu Shah, Maya Malik-Garbi, Kinneret Keren	
	Introduction.....	288
	1. Preparation of Crude M-Phase <i>Xenopus</i> Egg Extracts.....	289
	2. Preparation of Amphiphilic ActA.....	291
	3. Preparation of Actin Cortices in Water-in-Oil Emulsions.....	295
	Discussion.....	297
	References.....	299
CHAPTER 16	Engineering Artificial Cells by Combining HeLa-based Cell-free Expression and Ultrathin Double Emulsion Template.....	303
	Kenneth K.Y. Ho, Victoria L. Murray, Allen P. Liu	
	Introduction.....	304
	1. Generation of HeLa-Based Cell-Free Expression System.....	307
	2. Building Ultrathin Double Emulsion Device.....	310
	3. Encapsulation of HeLa-Based Cell-Free Expression System in Lipid Bilayer Vesicles.....	311
	Results and Discussion.....	314
	Acknowledgments.....	316
	References.....	316
CHAPTER 17	Reconstitution of Proteins on Electroformed Giant Unilamellar Vesicles.....	319
	Eva M. Schmid, David L. Richmond, Daniel A. Fletcher	
	Introduction.....	320
	1. The Power of In vitro Reconstitution.....	320
	2. Model Membranes for Reconstitution.....	321
	3. Giant Unilamellar Vesicles (GUVs).....	323
	4. Protein Attachment to GUVs.....	324
	5. Electroformation of GUVs for In vitro Reconstitution.....	325
	6. Materials for GUV Electroformation.....	325
	7. GUV Electroformation Procedure.....	327
	8. Protein-Mediated Membrane Interface Experiment.....	332
	Discussion—Emerging Opportunities.....	334
	Acknowledgments.....	335
	Supplementary Data.....	336
	References.....	336

CHAPTER 18 Reconstituting SNARE-mediated Membrane Fusion at the Single Liposome Level.....	339
Volker Kiessling, Binyong Liang, Lukas K. Tamm	
Introduction	340
1. The Role of SNAREs and Accessory Proteins in Membrane Fusion.....	341
2. SNARE-Mediated Fusion of Single Liposomes to Supported Membranes	345
3. SNARE-Mediated Fusion of Individual Surface-Immobilized Liposomes	351
Outlook	356
Acknowledgments.....	357
References.....	357
Volumes in Series	365
Index	377
