Preface	xxi

CHAPTER 1	Imaging Centrosomes and Cilia in the Mouse Kidney.....	1
	Masato Hoshi, Jinzhi Wang, Sanjay Jain, Moe R. Mahjoub	
	Introduction.....	2
	1. Methods	4
	Conclusion	13
	References	14
CHAPTER 2	Ependymal Cell Differentiation, from Monociliated to Multiciliated Cells.....	19
	Nathalie Delgehyr, Alice Meunier, Marion Faucourt, Montserrat Bosch Grau, Laetitia Strehl, Carsten Janke, Nathalie Spassky	
	Introduction.....	20
	1. Methods	20
	Conclusion	32
	Acknowledgments	32
	References	32
CHAPTER 3	Observing Planar Cell Polarity in Multiciliated Mouse Airway Epithelial Cells.....	37
	Eszter K. Vadar, Yin Loon Lee, Tim Stearns, Jeffrey D. Axelrod	
	Introduction.....	38
	1. Acquisition or Generation of Multiciliated Airway Epithelial Cells.....	41
	2. Assessment of Ultrastructural Planar Polarity of Motile Cilia...42	
	3. Localization of PCP Signaling Pathway Proteins in Multiciliated Airway Epithelial Cells.....	48
	Conclusions.....	52
	Acknowledgments	52
	References	52

CHAPTER 4	Imaging and Analyzing Primary Cilia in Cardiac Cells.....	55
	Nicolas Diguët, Jean-François Le Garrec, Tommaso Lucchesi, Sigolène M. Meilhac	
	Introduction.....	56
1.	Imaging Cilia In situ, in Fixed Hearts.....	57
2.	Imaging and Manipulating Cilia in Primary Cultures of Cardiac Cells.....	61
3.	Quantitative Analysis of Cilium Orientation.....	67
	Conclusion.....	72
	Acknowledgments.....	72
	Supplementary Data.....	72
	References.....	72
CHAPTER 5	Cilia in Photoreceptors.....	75
	Linjing Li, Manisha Anand, Kollu Nageswara Rao, Hemant Khanna	
	Introduction.....	76
1.	Methods.....	77
	Conclusions.....	91
	Acknowledgments.....	91
	References.....	92
CHAPTER 6	Analysis of Primary Cilia in the Developing Mouse Brain.....	93
	Judith T.M.L. Paridaen, Wieland B. Huttner, Michaela Wilsch-Bräuninger	
	Introduction.....	94
1.	Neurogenesis in the Developing Neocortex.....	94
2.	Primary Cilia in the Developing Neocortex.....	96
3.	Material.....	97
4.	Methods.....	103
	Conclusion.....	126
	Acknowledgments.....	126
	References.....	126
CHAPTER 7	In Vivo Investigation of Cilia Structure and Function Using <i>Xenopus</i>.....	131
	Eric R. Brooks, John B. Wallingford	
	Introduction.....	132
1.	A Brief Introduction to <i>Xenopus</i> Husbandry and Manipulation.....	133

2. Imaging of Cilia in Fixed <i>Xenopus</i> Embryos and Tissues	134
3. Methods for Live Cell Analysis of Cilia in <i>Xenopus</i>	139
4. Mounting <i>Xenopus</i> Embryos	142
5. Image Acquisition	145
6. Quantitative Analysis of Ciliary Properties	151
Conclusion	154
Acknowledgments	155
References	155
CHAPTER 8 A Quantitative Approach to Study Endothelial Cilia Bending Stiffness During Blood Flow Mechanodetection In Vivo	161
Francesco Boselli, Jacky G. Goetz, Gilles Charvin, Julien Vermot	
Introduction	162
1. The Challenge of Measuring Ciliary Mechanics	162
2. Live Imaging	164
3. Image Processing	168
4. Bending Rigidity Estimation through Modeling	168
5. Material	172
Conclusion	172
Acknowledgments	173
References	173
CHAPTER 9 Quantitative Description of Fluid Flows Produced by Left-Right Cilia in Zebrafish	175
Craig Fox, M. Lisa Manning, Jeffrey D. Amack	
Introduction	176
1. Methods	177
2. Application	183
Conclusion	185
Acknowledgments	185
References	185
CHAPTER 10 Efficient Live Fluorescence Imaging of Intraflagellar Transport in Mammalian Primary Cilia	189
Hiroaki Ishikawa, Wallace F. Marshall	
Introduction	190
1. Preparation of Cells for IFT Imaging	191
2. Live Imaging of IFT	193

3. Image Processing and Data Analysis	195
4. Discussion	198
Acknowledgments	199
Supplementary Data	199
References	199
CHAPTER 11 Analysis of Soluble Protein Entry Into Primary Cilia Using Semipermeabilized Cells	203
David K. Breslow, Maxence V. Nachury	
Introduction	204
1. Methods	205
2. Conclusions and Future Outlook	219
Acknowledgments	219
References	220
CHAPTER 12 Methods for Imaging Individual Cilia in Living Echinoid Embryos	223
Robert L. Morris, Hans W. Pope, Adam N. Sholi, Leah M. Williams, Chelsea R. Ettinger, Gwendolyn M. Beacham, Tatsushi Shintaku, Zachary D. Abbott, Elyse M. Doherty	
Introduction	224
1. Methods	225
Conclusion	240
Acknowledgments	240
Supplementary Data	240
References	240
CHAPTER 13 The planarian <i>Schmidtea Mediterranea</i> as a Model for Studying Motile Cilia and Multiciliated Cells	243
Cyril Basquin, Anne-Marie Orfila, Juliette Azimzadeh	
Introduction	244
1. Maintaining Planarians in the Lab	247
2. RNA Interference	251
3. Whole-Mount Immunofluorescence Staining	255
4. Electron Microscopy	258
5. Live Imaging	260
Acknowledgments	261
References	261

CHAPTER 14	Quantitative Analysis of Flagellar Proteins in <i>Drosophila</i> Sperm Tails	263
	Teresa Mendes Maia, Perrine Paul-Gilloteaux, Renata Basto	
	Introduction	264
1.	Methods	266
	Concluding Remarks	276
	Acknowledgments	276
	References	276
CHAPTER 15	Imaging Cilia in <i>Drosophila melanogaster</i>	279
	Jennifer Vieillard, Jean-Luc Duteyrat, Elisabeth Cortier, B��n��dicte Durand	
	Introduction	280
1.	Immunodetection of Cilia	283
2.	Observation of Cilia Ultrastructure by Transmission Electron Microscopy	293
	Acknowledgments	298
	References	298
CHAPTER 16	Studying G Protein-coupled Receptors: Immunoblotting, Immunoprecipitation, Phosphorylation, Surface Labeling, and Cross-linking Protocols	303
	Kasturi Pal, Hemant Badgandi, Saikat Mukhopadhyay	
	Introduction	305
1.	Reagents	307
2.	Protocol for Immunoblotting GPCRs	311
3.	Protocol for Immunoprecipitating GPCRs	313
4.	GPCR Labeling and Cross-Linking Studies	317
5.	Comments on Biochemical Assays Involving GPCRs and Multipass Transmembrane Proteins	319
	Conclusions	320
	Acknowledgments	320
	References	320
CHAPTER 17	Image Analysis of <i>Caenorhabditis elegans</i> Ciliary Transition Zone Structure, Ultrastructure, Molecular Composition, and Function	323
	Anna A.W.M. Sanders, Julie Kennedy, Oliver E. Blacque	
	Introduction	324

1. Cilium Compartmentalization and the Transition Zone	324
2. <i>Caenorhabditis elegans</i> Sensory Neuronal Cilia Model.....	326
3. Methods	328
Concluding Remarks.....	344
References	344
CHAPTER 18 Genetic and Genomic Approaches to Identify Genes Involved in Flagellar Assembly in <i>Chlamydomonas Reinhardtii</i>	349
Huawen Lin, Susan K. Dutcher	
Introduction.....	350
1. Identifying the Causative Genes Using Forward Genetics.....	351
2. Identifying Gene Function Using Reverse Genetics.....	370
3. Identifying Genes Using the RNA Transcriptome.....	373
4. Identifying Genes Using Genetic Interactions.....	375
5. Summary	378
Acknowledgments	378
References	378
CHAPTER 19 Axonemal Motility in <i>Chlamydomonas</i>.....	387
Ken-ichi Wakabayashi, Ritsu Kamiya	
Introduction.....	388
1. Methods	389
Acknowledgments	400
References	400
CHAPTER 20 Posttranscriptional Control Over Rapid Development and Ciliogenesis in <i>Marsilea</i>.....	403
Stephen M. Wolniak, Thomas C. Boothby, Corine M. van der Weele	
Introduction.....	404
1. The Development of Experimental Protocols in a Nonmodel System	409
2. Centrin Translation is Necessary for Formation of the Blepharoplast	412
3. Cell Fate in the Male Gametophyte of <i>Marsilea</i> : Only Two Types of Cells are Produced.....	415
4. Spermidine Provides a Driving Force behind Rapid Development in the Male Gametophyte	417
5. Spermidine Levels Change in the Gametophyte.....	418

6. Stored mRNAs are Transcribed during the Natural Process of Spore Desiccation.....	420
7. Mago Nashi and Speckle mRNA Dynamics.....	423
8. Emerging Themes from the Transcriptome of the Rapidly Developing Male Gametophyte of <i>Marsilea</i>	423
9. Many of the Stored Transcripts in the Spore Nucleus are Partially Processed Pre-mRNAs.....	425
10. NudC, an Archetype IRT in the Gametophyte.....	426
11. IRT Splicing as a Means to Regulate the Timing and Location of Translation.....	427
12. Polyadenylation as a Late Regulator of Translation.....	430
Conclusions, Predictions, and a Working Model for the Control of Rapid Development.....	430
Acknowledgments.....	438
References.....	438
CHAPTER 21 Total Internal Reflection Fluorescence Microscopy of Intraflagellar Transport in <i>Tetrahymena thermophila</i>	445
Yu-Yang Jiang, Karl Lehtreck, Jacek Gaertig	
Introduction.....	446
1. TIRF Microscope Configuration and Data Analysis in Application to IFT in <i>Tetrahymena</i>	447
2. Using a TIRF microscope to Image <i>Tetrahymena</i> cilia.....	447
3. Limitations.....	453
Acknowledgments.....	454
Supplementary Data.....	454
References.....	454
CHAPTER 22 Ciliary Heterogeneity within a Single Cell: The <i>Paramecium</i> Model	457
Anne Aubusson-Fleury, Jean Cohen, Michel Lemullos	
1. The <i>Paramecium</i> Model.....	458
2. Cilia in <i>Paramecium</i> Organization.....	460
3. Staining the Cilia with Antitubulin Antibodies.....	465
4. Protocols.....	470
5. Conclusion.....	478
6. Chemical Reagents and Buffers.....	479
Acknowledgments.....	479
References.....	479

CHAPTER 23 Imaging Intraflagellar Transport in Trypanosomes	487
Julien Santi-Rocca, Nicolas Chenouard, Cécile Fort, Thibault Lagache, Jean-Christophe Olivo-Marin, Philippe Bastin	
Introduction	488
1. Producing Trypanosomes Expressing Fluorescent IFT Fusion Proteins	490
2. Visualization of IFT and Acquisition of Time-Lapse Videos	498
3. Quantification of IFT	500
Conclusion	504
Acknowledgments	504
Supplementary Data	504
References	504
CHAPTER 24 Scanning and Three-Dimensional Electron Microscopy Methods for the Study of <i>Trypanosoma brucei</i> and <i>Leishmania mexicana</i> Flagella	509
Eva Gluenz, Richard John Wheeler, Louise Hughes, Sue Vaughan	
Introduction	510
1. Rationale	515
2. Methods	516
3. Materials	535
4. Discussion	537
Acknowledgments	538
References	538
Volumes in Series	543
Index	555
