Foreword	xv

I

BIOLOGY OF STEM CELL NICHE AND MOLECULAR MECHANISMS

1. The Need to Study, Mimic, and Target Stem Cell Niches

AJAYKUMAR VISHWAKARMA, JEROEN ROUWKEMA,
PETER ANTHONY JONES, JEFFREY M. KARP

1. Introduction	3
2. Biology of the Stem Cell Niche	5
3. Biochemical and Biophysical Regulation of Stem Cell Behavior	7
4. Mimicking the Stem Cell Niche: Bioengineering Tools and Techniques	10
5. Bioengineering Specialized Artificial Stem Cell Niches for Clinical Therapies	12
References	12

2. Harnessing the Biology of Stem Cells' Niche

BORJA SAEZ, RUSHDIA Z. YUSUF, DAVID T. SCADDEN

1. Introduction	15
2. Components of the Stem Cell Niche	16
3. Integrative Networks Regulating the Niche	21
4. Distinct Niches for Different Stages of Differentiation	22
5. Neoplastic Transformation and Disturbance of the Tissue Ecosystem	23
6. Conclusion	25
Abbreviations and Acronyms	25
Glossary	26
References	26

3. Pluripotent Stem Cell Microenvironment

MIKO NAKANISHI, MICKIE BHATIA

1. Introduction	33
2. Pluripotent Cell Microenvironment in the Early Mammalian Embryo	34
3. Microenvironment of Pluripotent Stem Cells In Vitro	38
4. Conclusion	46
Abbreviations and Acronyms	47
Glossary	47

Acknowledgment	47
References	47

4. Regulation of Hematopoietic Stem Cell Dynamics by Molecular Niche Signaling

APARNA VENKATRAMAN, MENG ZHAO, JOHN PERRY,
XI C. HE, LINHENG LI

1. Introduction	51
2. Organization of Hematopoietic Stem Cell Niche in the Bone Marrow	51
3. Niche Signaling	52
4. Future Outlook and Challenges	57
Abbreviations and Acronyms	57
Glossary	58
References	58

5. HSC Niche: Regulation of Mobilization and Homing

SAMIKSHA WASNIK, WANQIU CHEN, ABU S.I. AHMED,
XIAO-BING ZHANG, XIAOLEI TANG, DAVID J. BAYLINK

1. Introduction	63
2. HSC Trafficking During Embryonic Development	64
3. HSC Trafficking in Adult Hematopoiesis	65
4. New Strategies to Enhance Homing and Engraftment of HSC	68
5. Techniques to Dissect the Mechanism of HPC Migration	68
6. Clinical Applications of the Mobilization Agents and Biochemical Factors	69
7. Conclusion	70
Glossary	70
References	70

6. Neuronal Stem Cell Niches of the Brain

JOANNE C. CONOVER, KRYSTI L. TODD

1. Introduction	75
2. Organization of the Brain's Neuronal Stem Cell Niches	76
3. Functional Role of the Brain's Neuronal Stem Cell Niches	81
4. Signaling in the Neural Stem Cell Niche	83
5. Neural Stem Cell Niche in Aging	85
6. Conclusion	87
Abbreviations and Acronyms	87
Glossary	88
Acknowledgment	88
References	88

7. Cardiovascular Stem Cell Niche

ANNAROSA LERI, MARCELLO ROTA, POLINA GOICHBERG,
TORU HOSODA, TIZIANO MOCCETTI, PIERO ANVERSA

1. Introduction	93
2. Myocyte Regeneration and Cardiac Progenitor Cell Niches	94
3. Lineage Tracing of the Stem Cell Progeny	96
4. Stem Cells: Studies at the Single-Cell Level	97
5. Cardiac Progenitor Cell Classes and Their Niches	98
6. c-kit-CPCs and Their Niches	100
7. Epicardial Progenitor Cell Niches	102
8. Mesenchymal Stem Cells and Cardiac Niches	103
9. Hypoxic Niches	104
10. Cardiomyocyte Proliferation and the Notch Receptor System	104
11. Cardiac Niches and the Notch Receptor System	106
12. Conclusions	106
Abbreviations and Acronyms	107
Glossary	107
References	107

8. Intestinal Epithelial Lgr5⁺ Stem Cell Niche and Organoids

NOBUO SASAKI, TOSHIRO SATO, HANS CLEVERS

1. Introduction	111
2. Intestinal Stem Cell	112
3. The Stem Cell Niche	113
4. Ex Vivo Intestinal Stem Cells Culture—Organoids	119
5. Application of Organoid System	120
6. Concluding Remarks	122
Acknowledgment	123
References	123

9. The Epithelial Stem Cell Niche in Skin

GÉRALDINE GUASCH

1. Introduction	127
2. The Adult Skin: A Model to Study Various Epithelial Stem Cells	128
3. The Multiple Actors in Adult Epithelial Stem Cell Niche in the Skin	136
4. Do the Niche Cells From Various Locations Regulate the Epithelial Stem Cell Fate Differently?	140
5. Conclusions	140
Abbreviations and Acronyms	141
Glossary	141
Acknowledgments	141
References	141

10. The Satellite Cell Niche in Skeletal Muscle

CAROLINE E. BRUN, FABIEN P. CHEVALIER,
NICOLAS A. DUMONT, MICHAEL A. RUDNICKI

1. Introduction	145
2. The Quiescent Satellite Cell Niche	146
3. The Activated Satellite Cell Niche	150
4. Alterations of the Satellite Cell Niche	157
5. Conclusion	161
Abbreviations and Acronyms	161

Glossary	162
Acknowledgments	162
References	162

11. The Cancer Stem Cell Niche

NANIYE MALLI CETINBAS, JATIN ROPER, ÖMER H. YILMAZ

1. Introduction	167
2. Cancer Stem Cells and Niche Interactions	169
3. Cancer Stem Cell Niche Promotes Tumor Growth and Progression	172
4. The Role of the Cancer Stem Cell Niche in Metastasis	175
5. Therapeutic Targeting of Cancer Stem Cell Niche	177
6. Conclusion	180
Abbreviations and Acronyms	180
Glossary	181
Acknowledgment	181
References	181

12. Cellular Senescence and Stem Cell Niche

ARTHUR KRAUSE, MICHAEL J. CONBOY, IRINA M. CONBOY

1. Introduction	185
2. Cellular Senescence	185
3. p16 ^{INK4a}	185
4. Senescence-Associated Secretory Phenotype	186
5. Senescence and Tissue Repair	187
6. Stem Cell Niche	188
7. Effects of Aging and Senescence on the Stem Cell Niche	189
References	191

II

BIOCHEMICAL AND PHYSICAL CUES
IN THE STEM CELL NICHE DIRECTING
CELL FATE

13. Matrix Chemistry Controlling Stem Cell Behavior

CHRISTINA KLECKER, LAKSHMI S. NAIR

1. Introduction	195
2. Effect of Chemical Functional Groups on Stem Cell Behavior	196
3. Conclusions and Future Directions	211
Abbreviations and Acronyms	211
Glossary	212
References	212

14. Matrix Growth Factor and Surface Ligand Presentation

EIKE MÜLLER, TILO POMPE, UWE FREUDENBERG,
CARSTEN WERNER

1. Introduction	215
2. Modulating Factor-Mediated Signaling	217
3. Cell–Cell Ligand Presentation	224
4. Adhesion Ligand Presentation	224

5. Synergistic Interaction Between Adhesion Ligands and Soluble Factors	226	6. Hypoxia-Preconditioning-Enhanced Therapeutic Function After Transplantation	284
6. Outlook	227	Abbreviations and Acronyms	287
Abbreviations and Acronyms	227	References	288
References	228		

15. Effect of Matrix Mechanical Forces and Geometry on Stem Cell Behavior

DEKEL ROSENFELD, SHULAMIT LEVENBERG

1. The Mechanical Microenvironment of Stem Cells	233
2. The Influence of Mechanical Forces on Stem Cell Differentiation	234
3. The Influence of Matrix Geometry and Topography on Stem Cell Behavior	238
4. How Do Stem Cells Respond to Mechanical Stimuli?	238
5. Future Directions	241
Abbreviations and Acronyms	241
Acknowledgments	241
References	241

16. Wettability Effect on Stem Cell Behavior

YINGYING LI, SHUTAO WANG, LEI JIANG

1. Introduction	245
2. The Impact of Interfacial Wettability on Cells	246
3. The Impact of Interfacial Wettability on Stem Cells	248
4. Conclusion and Future Directions	253
References	254

17. Fluid Flow Control of Stem Cells With Investigation of Mechanotransduction Pathways

BRANDON D. RIEHL, HENRY J. DONAHUE, JUNG YUL LIM

1. Introduction	257
2. Mimicking In Vivo Fluid Flow Environments	258
3. Fluid Flow Regulation of Stem Cell Function and Fate	259
4. Fluid Flow-Activated Mechanotransduction Pathways in Stem Cells	266
5. Conclusions	267
Abbreviations and Acronyms	269
Glossary	269
Acknowledgment	269
References	269

18. Hypoxia Regulation of Stem Cell: Mechanisms, Biological Properties, and Applications

WUN LIU, ANG-CHEN TSAI, XUEGANG YUAN, YAN LI, TENG MA

1. Physiological Relevance of Hypoxic Niche in Embryonic and Adult Stem Cells	274
2. Molecular Mechanism of Hypoxia-Mediated Cellular Response	275
3. Stem Cell Metabolic Adaptation Under Hypoxia	275
4. Influence of Hypoxia on Stem Cell Fate	278
5. Recapitulation of Hypoxia Niche In Vivo and In Vitro	282

III

DESIGNING SMART BIOMATERIALS TO MIMIC AND CONTROL STEM CELL NICHE

19. Polymer Design and Development

CHRISTOPHER K. ARAKAWA, COLE A. DEFOREST

1. Introduction	295
2. Natural Polymers for 3D Stem Cell Culture	296
3. Synthetic Polymers for 3D Stem Cell Culture	303
4. Smart Polymer Systems for 3D Stem Cell Culture	307
5. Concluding Remarks	310
Abbreviations and Acronyms	310
Glossary	310
References	311

20. Design and Development of Ceramics and Glasses

JIE HUANG

1. Introduction	315
2. Development of Bioceramics	317
3. Design of Bioactive Ceramics and Composites	318
4. Engineering Stem Cell Niches	325
5. Summary and Future Perspective	326
References	327

21. Surface Functionalization of Biomaterials

DEEPTI RANA, KEERTHANA RAMASAMY, MARIA LEENA, RENU PASRICHA, GEETHA MANIVASAGAM, MURUGAN RAMALINGAM

1. Introduction	331
2. Surface Modifications of Biomaterials	332
3. Biological Relevance of Surface Modification for Biomaterials	338
4. Concluding Remarks	340
Abbreviations and Acronyms	341
Glossary	341
Acknowledgments	341
References	341

22. Biofunctional Hydrogels for Three-Dimensional Stem Cell Culture

JENNA L. WILSON, TODD C. MCDEVITT

1. Introduction	345
2. Hydrogel Materials	348
3. Hydrogel Material Properties	351

5. Types of Biomaterials and Their Applications	467	33. Engineering Niches for Cartilage Tissue Regeneration	
6. Biomaterial-Based Cardiovascular Devices	473		
7. Future Direction for Cardiac Regeneration	473	TING GUO, KIMBERLY M. FERLIN, DAVID S. KAPLAN, JOHN P. FISHER	
Abbreviations and Acronyms	474		
Glossary	474	1. Introduction: The Native Cartilage Niche	531
References	474	2. Approaches for Engineering the Cartilage Niche	534
		3. Conclusion and Future Directions	542
		Abbreviations and Acronyms	543
		Glossary	543
		References	543
30. Engineering Niches for Blood Vessel Regeneration			
QUINTON SMITH, MICHAEL BLATCHLEY, SHARON GERECHT		34. Engineering Niches for Stem and Progenitor Cell Differentiation Into Immune Cells	
1. Introduction	479	SANAYA N. SHROFF, FNU APOORVA, ANKUR SINGH	
2. Elements for Recapitulating the Vascular Regeneration Niche In Vitro	483		
3. Material Design Parameters for Controlling the Vascular Niche	485	1. Introduction	547
4. Strategies in Engineering Artificial Niches for Vascular Regeneration	488	2. Hematopoiesis and Niche Signaling	547
5. Inducing Vascularization Through Biomaterials	492	3. 2D Immune Cell Culture Systems	549
6. Conclusion and Future Directions	494	4. Engineering 3D Immune Niche	551
Abbreviations and Acronyms	494	5. Future Directions and Conclusions	556
Glossary	494	Abbreviations and Acronyms	556
References	495	Glossary	556
		Acknowledgments	556
		References	557
31. Engineering Niches for Bone Tissue Regeneration		35. Engineering Niches for Skin and Wound Healing	
ANGAD MALHOTRA, CLEMENS VAN BLITTERSWIJK, PAMELA HABIBOVIC		MICHAEL W. FINDLAY, GEOFFREY C. GURTNER	
1. Introduction: The Native Bone Niche	499	Chapter Outline	560
2. Approaches to Control the Stem Cell Niche	504	1. Introduction	560
3. Conclusions and Future Directions	511	2. The Skin Stem Cell Niche From a Wound Healing Perspective	564
Abbreviations and Acronyms	513	3. Engineering of Skin Stem Cell Niches for Wound Healing	571
Glossary	513	4. Specific Targets for Niche-Based Approaches in the Skin	573
References	513	5. Conclusion	576
		Abbreviations and Acronyms	576
		References	576
32. Engineering Vascular Niche for Bone Tissue Regeneration		36. Designing Stem Cell Niche for Liver Development and Regeneration	
JOHNATHAN NG, KARA SPILLER, JONATHAN BERNHARD, GORDANA VUNJAK-NOVAKOVIC		AMRANUL HAQUE, JOSHUA GUILD, ALEXANDER REVZIN	
1. Introduction	517		
2. The Bone Tissue Engineering Paradigm: Scaffold, Cells, Bioreactor	518	1. Introduction	581
3. Strategies to Promote Bone Vascularization	520	2. LPCs Fate Selection in Developing and Injured Liver	582
4. Harnessing the Inflammatory Response to Engineer Vascularized Bone	521	3. Hepatic Stem Cell Niches	584
5. Endochondral Ossification and the Hematopoietic Niche	523	4. Engineering Biomimetic Liver Niches	589
6. Conclusions and Future Directions	525	5. Conclusion	595
Abbreviations and Acronyms	525	Abbreviations and Acronyms	595
Glossary	525	Glossary	596
Acknowledgments	525	References	596
References	525		

37. Engineering the Niche for Intestinal Regeneration

VICTOR HERNANDEZ-GORDILLO, ABIGAIL N. KOPPEL,
LINDA G. GRIFFITH, DAVID T. BREAU, REBECCA L. CARRIER

1. Introduction 602
2. Overview of Intestinal Culture Models and Regenerative Medicine Approaches 602
3. Tools and Techniques for Engineering the Intestinal Stem Cell Niche 604

4. Future Directions: Engineering the Niche for Intestinal Modeling and Development of Regenerative Medicine Therapies 610
5. Conclusions 611
- Abbreviations and Acronyms 611
- Glossary 612
- References 612
