Foreword

xi

1. An Illustrative History of Artificial Photosynthesis 1

D. Gust

1. Introduction	2
2. Early Musings and Promising Findings	4
3. The Beginnings of Modern Artificial Photosynthesis: Donor-Acceptor Dyads	5
4. More Complex Artificial Reaction Centres	11
5. Metal Complex-Based Artificial Reaction Centres	18
6. Artificial Antennas	20
7. Photoprotection	25
8. Harvesting the Energy of Charge Separation – Solar Fuel Production	30
9. Conclusions	36
References	37

2. 'Direct Conversion': Artificial Photosynthesis With Cyanobacteria 43

Q. Chen, D. Montesarchio and K.J. Hellingwerf

1. Introduction	44
2. Oxygenic Photosynthesis	46
3. 'Direct Conversion'	48
4. Optimization of 'Direct Conversion' through Natural Photosynthesis	53
5. The Use of Large, Closed, Outdoor Photobioreactors	55
6. Outlook	57
Acknowledgements	59
References	59

3. Bioinspired Photocatalysis 63

A. Aukauloo and W. Leibl

1. Introduction	64
2. Strategies	67
3. Chromophores	70
4. Molecular Catalysts for Oxidation	73

5. Molecular Catalysts for Reduction	82
6. Driving Catalysts by Light	85
7. Challenges and Bottlenecks	87
8. Concluding Remarks	91
References	92
4. Artificial Photosynthesis – An Inorganic Approach	99
S. Fiechter	
1. Introduction	100
2. Artificial Photosynthesis	104
3. Photoelectrodes and Device Structures	106
4. Application of Energy-Converting Devices for CO ₂ Reduction	113
5. Present Research Topics	118
6. Technical and Scientific Challenges	120
7. Summary	124
References	125
5. Artificial Photosynthesis: Theoretical Background	129
D. Abramavicius and L. Valkunas	
1. Introduction	130
2. Generic Hamiltonian of the Coupled System	131
3. Master Equations for the Density Matrix	136
4. Stochastic Wavefunction Approaches	146
5. Electron Transfer in a Mesoscopic Molecular Network	155
6. Example: Excitation Dynamics in a Heterodimer	157
Acknowledgement	163
References	163
6. Resolving Energy and Electron Transfer Processes in Dyads With the Help of Global and Target Analysis	169
I.H.M. van Stokkum, J. Ravensbergen, J.J. Snellenburg, R. van Grondelle, S. Pillai, T.A. Moore, D. Gust, A.L. Moore and J.T.M. Kennis	
1. Introduction	170
2. Methodology	174
3. Applications to Synthetic Systems	177
4. Conclusion	190
Acknowledgements	190
References	190

7. European and International Initiatives in the Field of Artificial Photosynthesis	193
V. Artero, F. Chandezon, D.T. Co and B. Dietzek	
1. Introduction	194
2. Artificial Photosynthesis: Academic and Industrial Context	196
3. European and International Initiatives	204
4. Conclusion and Perspectives	219
Acknowledgement	219
References	220
<i>Subject Index</i>	223
<i>Author Index</i>	235
