1. The Eukaryotic Translation Initiation Factor 4E (eIF4E) as a Therapeutic Target for Cancer	1
Sara Karaki, Claudia Andrieu, Hajer Ziouziou, and Palma Rocchi	
1. Introduction	2
2. eIF4E's Structure and Expression	2
3. eIF4E's Functions	9
4. eIF4E: A Therapeutic Target in Cancer	14
5. Conclusion	20
References	21
2. Antitumor Lipids—Structure, Functions, and Medical Applications	27
Aneliya Kostadinova, Tanya Topouzova-Hristova, Albena Momchilova, Rumiana Tzoneva, and Martin R. Berger	
1. Introduction	28
2. Development of Antitumor Lipids	29
3. Combining ATLs with Other Anticancer Approaches	29
4. Structure of Antitumor Lipids	32
5. Clinical Trials and Therapeutic Effect	37
6. Anticancer Mechanism of Action	40
7. Conclusion and Perspectives	55
Acknowledgments	56
References	56
3. Telomere Repeat-Binding Factor 2 Is Responsible for the Telomere Attachment to the Nuclear Membrane	67
Nadya V. Ilicheva, Olga I. Podgornaya, and Alex P. Voronin	
1. Telomeres	68
2. Telomeres Protect Ends of Chromosomes	70
3. Shelterin: The Telomere-Specific Protein Complex	71
4. Telomeres Take Part in Chromatin Organization	77
5. Structure of the Telomere-Binding Protein TRF2	81

6. TRF2 Is Tightly Bound to the NE	85
Acknowledgments	90
References	90
4. Alterations in Gene Expression in Depression: Prospects for Personalize Patient Treatment	97
Rossen Donev and Khaled Alawam	
1. Introduction	98
2. Etiology of Depression—A Brief Summary	99
3. Mechanisms of Action of Antidepressant Treatments	100
4. Altering Gene Expression Levels in Depression	103
5. Profiling Expression Pattern of Depression-Related Genes as a Tool for Correct Diagnosing and Personalized Patient Treatment	113
6. Concluding Remarks	117
References	118
5. Evolution and Coevolution of PRC2 Genes in Vertebrates and Mammals	125
Xi Liu, Jingwen Yang, Nan Wu, Ruixian Song, and Hao Zhu	
1. Introduction	126
2. Results	128
3. Discussion	140
4. Methods	144
Acknowledgment	146
References	146
6. Quartz-Crystal Microbalance (QCM) for Public Health: An Overview of Its Applications	149
Nicola Luigi Bragazzi, Daniela Amicizia, Donatella Panatto, Daniela Tramalloni, Ivana Valle, and Roberto Gasparini	
1. Introduction	150
2. Biosensors and Nanosensors	151
3. Quartz-Crystal Microbalance	153
4. Bacteria and QCM: A New Strategy for Detecting Microbial Population	156
5. QCM and Nosocomial Infections	157
6. Bacteria and QCM: Role in Monitoring Antimicrobial Susceptibility and Drug Resistance	158
7. Influenza Virus and Other Respiratory Viruses	160
8. Sexually Transmitted Diseases	166

9. Invasive Diseases	171
10. Tropical and Tropical Neglected Diseases	172
11. Cancer	173
12. Chronic Degenerative Diseases	175
13. Occupational Hygiene	177
14. Water Safety	177
15. Veterinary Public Health	179
16. Food Hygiene	181
17. Environmental Monitoring	186
18. Biohazards and Bioterrorism	187
19. Homeland Security	188
20. Concluding Remarks	189
References	189
7. Porous Alumina as a Promising Biomaterial for Public Health	213
Nicola Luigi Bragazzi, Roberto Gasparini, Daniela Amicizia, Donatella Panatto, and Claudio Larosa	
1. Introduction	214
2. Porous Alumina for Microbiology: From Germ Culture to High-Throughput Microbiology	214
3. Porous Alumina-Based Biosensors for Pathogen Detection	219
4. Porous Alumina and its Antimicrobial Properties	220
5. Food Production and Manipulation	221
6. Food Safety Assurance	222
7. Water Safety Assurance	222
8. Environmental Monitoring	224
9. Concluding Remarks	224
References	225
8. Human Papillomavirus Vaccine: State of the Art and Future Perspectives	231
Donatella Panatto, Daniela Amicizia, Nicola Luigi Bragazzi, Emanuela Rizzitelli, Daniela Tramalloni, Ivana Valle, and Roberto Gasparini	
1. Human Papillomavirus	233
2. Genome	239
3. Proteome	240
4. L1 Protein	250
5. L2 Protein	250
6. E1 Protein	252

7. E2 Protein	253
8. E3 Protein	255
9. E4 Protein	255
10. E5 Oncoprotein	256
11. E6 Oncoprotein	257
12. E7 Oncoprotein	258
13. E8/E8 [*] E2C Protein	260
14. HPV Life Cycle	260
15. An Overview of the Current Technologies Used for Vaccines Production	262
16. Virus-Like Particles Based Vaccines	262
17. Plant-Based Vaccines	263
18. Recombinant-Based Vaccines	263
19. Prophylactic and Therapeutic Vaccines	264
20. Currently Available Prophylactic Vaccines	264
21. Future Generation Prophylactic Vaccines	266
22. Therapeutic Vaccines	275
23. Further Combined Strategies	284
24. Conclusions	293
References	293
 9. SHOPIN: Semantic Homogeneity Optimization in Protein Interaction Networks	 323
Kire Trivodaliev, Slobodan Kalajdziski, Ilinka Ivanoska, Biljana Risteska Stojkoska, and Ljupco Kocarev	
1. Introduction	324
2. Materials and Methods	327
3. Results and Discussion	338
4. Conclusions	346
References	347
