Biography	xvii
Preface	xix

PART I: GENERAL ANALYTICAL METHODS

Chapter 1 Determination of Carbohydrates Metabolism Molecules.....	3
1.1 Introduction	3
1.2 Determination of Reducing Sugars by the Somogyi–Nelson Method.....	4
1.3 Determination of Total Sugars by the Anthrone Method	5
1.4 Determination of Total Sugars by the Phenol–Sulfuric Acid Assay	7
1.5 Enzymatic Determination of Glucose and Fructose.....	9
1.6 Enzymatic Determination of Sucrose	10
1.6.1 Spectrophotometric Method (Measurement of NADPH Absorption)	11
1.6.2 Direct Fluorometric Method (Measurement by NADPH Native Fluorescence).....	12
1.6.3 Assay With Fluorescence Enhancement.....	12
1.7 Determination of Glucose and Galactose by an Enzymatic Colorimetric Method.....	13
1.8 Determination of Glucose by an Enzymatic Fluorometric Method.....	14
1.9 Determination of Amino Sugars by the Elson–Morgan Method.....	15
1.10 Determination of Acetyl Amino Sugars by the Morgan–Elson Method.....	16
1.11 Determination of Uronic Acids by the Carbazole Assay	17
1.12 Determination of Pentoses by the Orcinol Procedure	17
1.13 Determination of Fructose Derivatives by the Thiobarbituric Acid Assay	18
1.14 Determination of Inorganic Phosphate by the Fiske–Subbarow Assay.....	19
1.15 Determination of Inorganic Phosphate by the Chifflet’s Method.....	21

1.16	Determination of Uridine Diphosphate by the Measurement of Pyruvate	22
1.16.1	Colorimetric Method Using 2,4-Dinitrophenylhydrazine	23
1.16.2	Spectrophotometric Method Using Lactic Dehydrogenase	24
1.17	Determination of UDP-Glucose Using UDP-Glucose Dehydrogenase	25
1.18	Determination of UDP-Glucose Using UDP-Glucose Pyrophosphorylase	25
	Further Reading and References	26

PART II: PURIFICATION AND ANALYSIS OF PROTEINS AND CARBOHYDRATES

Chapter 2 Preparation of Protein Extracts..... 31

2.1	Introduction	31
2.2	Extraction of Proteins.....	32
2.2.1	Source Material	32
2.2.2	Homogenization Buffer Composition.....	33
2.2.3	Breakdown of Biological Material (Cells and Tissues Disruption).....	34
2.2.4	Cell Permeabilization.....	35
2.3	Laboratory Procedures for Protein Extraction.....	36
2.3.1	Preparation of Acetone Powder from Wheat Leaves.....	36
2.3.2	Preparation of Plant Tissue Extracts	37
2.3.3	Preparation of Extracts from Photosynthetic Microorganisms.....	39
2.4	Protein Extract Desalting	42
	Further Reading and References	43

Chapter 3 Protein and Carbohydrate Separation and Purification 45

3.1	Introduction	45
3.2	Enzymatic Protein Purification	46
3.2.1	Methods Based on Protein Solubility	47
3.2.2	Protein Fractionation by Batch Adsorption	49
3.2.3	Protein Fractionation by Chromatographic Techniques.....	50
3.3	Carbohydrates Separation	58
3.3.1	Partition Chromatography	58
3.3.2	Paper Chromatography	58
3.3.3	Thin Layer Chromatography.....	59
3.3.4	Carbohydrate Detection on Chromatograms	59
3.3.5	High-Performance Liquid Chromatography	61
	Further Reading and References	62

Chapter 4 Measurement of Enzyme Activity.....	65
4.1 Introduction	65
4.2 Measurement of Velocity	66
4.3 Enzyme Assay Conditions	67
4.4 Enzyme Assay Methods	68
4.5 General Considerations for Planning an Enzyme Assay	69
Further Reading and References	70

Chapter 5 General Introduction to Mass Spectrometry and Nuclear Magnetic Resonance	71
5.1 Introduction	71
5.2 Mass Spectrometry	71
5.3 Applications of Mass Spectrometry	74
5.4 Nuclear Magnetic Resonance.....	74
5.5 Applications of Nuclear Magnetic Resonance	75
Further Reading and References	76

PART III: CASE STUDIES

Chapter 6 Case Study: Sucrose	79
6.1 Introduction	79
6.2 Description of Enzyme Reactions.....	81
6.2.1 Biosynthesis of Sucrose	81
6.2.2 Sucrose Cleavage and Hydrolysis	81
Experimental Protocols.....	83
6.3 Sucrose Extraction.....	83
6.4 Enzyme Activity Assays	83
6.4.1 Determination of SuS (Sucrose Synthesis Direction) or SPS Activity.....	84
6.4.2 Determination of SuS Activity (in the Sucrose Cleavage Direction).....	90
6.4.3 Determination of SPP Activity	90
6.4.4 Determination of Invertase and Amylosucrase Activity	91
6.5 Reaction Stoichiometry	92
6.6 Isolation and Characterization of Reaction Products	92
6.6.1 Paper Chromatography	93
6.6.2 Separation by Anion Exchange Borate Column	93
Further Reading and References	94

Chapter 7 Case Study: Trehalose.....	97
7.1 Introduction	97
7.2 Trehalose Biosynthesis and Degradation.....	99
Experimental Protocols.....	101
7.3 Trehalose Extraction	101
7.4 Enzyme Activity Assays	101
7.4.1 TPS Activity Assay	102
7.4.2 Trehalase Activity Assay	105
7.4.3 Trehalose Phosphorylase Activity Assay	106
7.4.4 Trehalose-6-Phosphate Hydrolase Activity Assay	107
7.4.5 Trehalose-6-Phosphate Phosphorylase Activity Assay	107
7.5 Stoichiometry	108
7.6 Isolation and Characterization of Reaction Products	108
Further Reading and References	109
Chapter 8 Case Study: Raffinose.....	111
8.1 Introduction	111
8.2 Enzymatic Reactions.....	113
8.2.1 Biochemical Pathway of RFO Synthesis.....	113
8.2.2 Hydrolysis of Raffinose Family Oligosaccharides.....	114
Experimental Protocols.....	114
8.3 Extraction of Raffinose Polymers.....	114
8.3.1 Extraction from Leaf Material	114
8.3.2 Extraction from Algal Cells.....	115
8.3.3 Extraction from Seeds.....	115
8.4 Galactinol Synthase Activity Assay.....	116
8.5 Raffinose and Stachyose Synthase Activity Assays.....	117
8.6 Galactan-Galactan-Galactosyl Transferase Activity Assay.....	117
8.7 Degradation of Raffinose Polymers by α -Galactosidase	118
8.8 Separation of Raffinose Polymers	119
Further Reading and References	119
Chapter 9 Case Study: Fructans.....	121
9.1 Introduction	121
9.2 Biosynthesis and Degradation of Fructans	123
Experimental Protocols.....	124

9.3	Fructan Extraction	124
9.3.1	General Considerations	124
9.3.2	Extraction from Underground Organs	125
9.3.3	Extraction from Leaves.....	125
9.4	Determination of Sucrose-Sucrose-Fructosyl Transferase Activity	126
9.4.1	Nonradioactive Assay	126
9.4.2	Radioactive Assay	127
9.4.3	Determination of Fructosyl-Sucrose After Ion Chromatography Separation.....	127
9.5	Determination of Sucrose-Fructan-6-Fructosyl Transferase (6-SFT) Activity	128
9.6	Determination of Fructan: Fructan 1-Fructosyltransferase Activity	130
9.7	Determination of Fructan Hydrolase Activity	131
9.8	Separation of Fructans.....	132
	Further Reading and References	134

Chapter 10 Case Study: Polysaccharides 137

10.1	Introduction	137
10.2	Plant Polysaccharides: Mannans	138
10.2.1	Structure and Classification	138
10.2.2	Occurrence.....	139
10.2.3	Biosynthesis and Degradation	139
10.3	Algal Polysaccharides	140
10.4	Cyanobacterial Polysaccharides.....	141
	Experimental Procedures	143
10.5	Extraction of Mannans	143
10.6	Determination of Mannans.....	144
10.7	Extraction and Determination of Cyanobacterial Insoluble Polysaccharides	145
10.8	Extraction and Quantification of Cyanobacterial Exopolysaccharides.....	145
10.9	Extraction of Soluble Oligosaccharides from <i>Anabaena</i> and <i>Nostoc</i> Strains.....	146
	Further Reading and References	147

Chapter 11 Case Study: Starch 151

11.1	Introduction	151
11.2	Starch Biosynthesis and Degradation	152
	Experimental Procedures.....	154

11.3	Starch Extraction	154
11.3.1	Extraction from Leaves	154
11.3.2	Extraction from Potato Tubers	155
11.3.3	Extraction of Intact Starch Granules	156
11.4	Starch Determination	158
11.4.1	Determination After Enzymatic Hydrolysis	158
11.4.2	Determination by a Colorimetric Method	159
11.5	ADP-Glucose Pyrophosphorylase Activity Assays	160
11.6	Starch Synthase Activity Assays	160
11.6.1	Granule-Bound Starch Synthase Activity Assays	160
11.6.2	Soluble Starch Synthase Activity Assay	162
11.7	Starch Branching Enzyme Activity Assay	163
11.8	Phosphorylase Activity Assay	164
11.9	Amylase Activity Assay	164
	Further Reading and References	165
Chapter 12 Case Study: Glycogen		169
12.1	Introduction	169
12.2	Synthesis and Degradation of Glycogen	170
	Experimental Procedures	172
12.3	Glycogen Extraction	172
12.4	Glycogen Determination	173
12.4.1	Determination After Enzymatic Hydrolysis	173
12.4.2	Determination by a Colorimetric Method	173
12.5	ADP-Glucose Pyrophosphorylase Activity Assays	174
12.6	Glycogen Synthase Activity Assay	174
12.6.1	Determination of ADP	174
12.6.2	Determination of Radioactivity Incorporated to Glycogen	175
12.7	Glycogen Phosphorylase Activity Assay	176
	References	177
Chapter 13 Case Study: Cellulose		179
13.1	Introduction	179
13.2	Cellulose Biosynthesis and Degradation	180
	Experimental Procedures	182
13.3	Cellulose Extraction and Determination	182
13.3.1	Cellulose Extraction After Cell Wall Fractionation	182
13.3.2	Cellulose Determination Without Extraction	183

13.4	Cellulose and Callose Synthesis Assays.....	184
13.5	Cellulose Degradation.....	186
13.5.1	Total Cellulase Activity Assay.....	186
13.5.2	Cellulose Acid Hydrolysis.....	187
	Further Reading and References.....	188
Chapter 14 Case Study: Sugar Phosphates.....		191
14.1	Introduction.....	191
14.2	General Properties of Sugar Phosphates.....	192
14.2.1	Acid and Alkaline Hydrolysis.....	192
14.2.2	Acid Strength.....	193
14.2.3	Borate Complex Formation.....	194
	Experimental Procedures.....	194
14.3	Determination of Sugar Phosphates.....	194
14.3.1	Determination of the Phosphate Group.....	194
14.3.2	Determination of the Sugar Moiety.....	194
14.3.3	Enzymatic Assays.....	195
14.4	Determination of Fructose-1,6-Diphosphate.....	195
14.5	Determination of Fructose-2,6-Diphosphate.....	196
14.6	Determination of Mannose-1-Phosphate and Mannose-6-Phosphate.....	198
14.7	Separation of Sugar Phosphates in Ion Exchange Resins.....	199
14.8	Separation of Phosphoric Esters by High-Performance Liquid Chromatography.....	200
	Further Reading and References.....	202
Chapter 15 Case Study: Nucleotide Sugars.....		205
15.1	Introduction.....	205
15.2	General Properties.....	206
15.3	Biosynthesis of Nucleotide Sugars.....	207
	Experimental Procedures.....	209
15.4	Extraction of Nucleotide Sugars.....	209
15.4.1	Extraction With Perchloric Acid.....	209
15.4.2	Extraction With Trichloroacetic Acid.....	210
15.5	Determination of Sugar Nucleotides.....	211
15.6	UDP-Glucose Pyrophosphorylase Activity Assays.....	211
15.6.1	Enzymatic Assay (Reverse Direction).....	212
15.6.2	Enzymatic Assay (Forward Direction).....	213

15.7	ADP-Glucose Pyrophosphorylase Activity Assays	214
15.7.1	Enzymatic Assay (Pyrophosphorolysis Direction)	214
15.7.2	Radioactive Assay (Pyrophosphorolysis Direction)	215
15.8	GDP-Mannose Pyrophosphorylase Activity Assay	216
15.9	UDP-Sugar-4-Epimerase Activity Assay	217
15.10	UDP-Glucuronic Acid Decarboxylase Activity Assay	218
15.11	Other Enzyme Activity Assays	219
15.12	Overview of Nucleotide-Sugars Separation Methods	219
	Further Reading and References	219
