Part I

Identification and Biochemical Analysis of Lamin-Associated Proteins

1. BiOLD Identification of Lamin-Associated Proteins

3

Aaron A. Mehus, Ruthellen H. Anderson, and Kyle J. Roux

1. Introduction

4

2. BiOLD Method

9

3. Anticipated Results

17

4. Conclusions

18

Acknowledgment

20

References

20

2. Proximity-Dependent Biotin Identification (BiOLD) in *Dictyostelium* Amoebae

23

Petros Batsios, Irene Meyer, and Ralph Gräf

1. Introduction

24

2. Materials

31

3. Methods

35

4. Conclusions

40

References

40

3. Purification and Structural Analysis of LEM-Domain Proteins

43

Isaline Herrada, Benjamin Bourgeois, Camille Samson, Brigitte Buendia,

Howard J. Worman, and Sophie Zinn-Justin

1. Introduction

44

2. "Divide and Conquer" Approach to Study LEM-Domain Proteins

45

3. Analysis of Predicted Unstructured Regions in LEM-Domain Proteins

51

4. LEM-Domain Proteins with Their Partners

55

5. Concluding Remarks

57

Acknowledgments

58

References

58

4. Purification and Structural Analysis of SUN and KASH Domain Proteins	63
F. Esra Demircioglu, Victor E. Cruz, and Thomas U. Schwartz	
1. Introduction	64
2. Purification of SUN Proteins and SUN-KASH Complexes	66
3. Structural Analysis of Human SUN2 and SUN2-KASH1/2 Complexes	72
4. Conclusions and Pitfalls	76
Acknowledgments	76
References	76
5. Purification of Lamins and Soluble Fragments of NETs	79
Alexandr A. Makarov, Andrea Rizzotto, Peter Meinke, and Eric C. Schirmer	
1. Introduction	80
2. Purification Parameters	83
3. Lamin A Purification	85
4. NET Fragment Purification	92
5. Gel Extraction of Proteins	95
6. Conclusions and Potential Applications	98
Acknowledgments	98
References	98
6. Simple Separation of Functionally Distinct Populations of Lamin-Binding Proteins	101
Jason M. Berk and Katherine L. Wilson	
1. Introduction	102
2. Cell Culture (with or without Transfection) and Harvesting	104
3. Separate Nuclei from Cytoplasm	105
4. Fractionate Nuclei to Separate "Easy-" Versus "Sonication-Dependent" Proteins	108
5. Analysis by Immunoprecipitation and Immunoblotting	109
6. Conclusions	111
Acknowledgments	112
References	112

Part II

General Methods for Analysis of Intermediate Filament-Associated Proteins

7. Development of a Novel Green Fluorescent Protein-Based Binding Assay to Study the Association of Plakins with Intermediate Filament Proteins	117
Bertrand Favre, Nadja Bègré, Jamal-Eddine Bouameur, and Luca Borradori	

1. Introduction	118
2. Recombinant Proteins	123
3. Fluorescence Measurement of Soluble EGFP	127
4. Expression of EGFP-Fusion Proteins in Mammalian Cells	128
5. Analysis of the Interaction of EGFP-Fusion Recombinant Plakins with IF Proteins	129
6. Concluding Remarks	133
Acknowledgments	133
References	134
8. Functional Analysis of Keratin-Associated Proteins in Intestinal Epithelia: Heat-Shock Protein Chaperoning and Kinase Rescue	139
Anastasia Mashukova, Radia Forteza, and Pedro J. Salas	
1. Introduction	140
2. Isolation of Keratin Intermediate Filaments for Functional Assays	142
3. Detection of Chaperoning Activity on Keratin Intermediate Filaments, Relative to Cytosolic Activity	146
4. Refolding of α PKC by Hsp70/40 in Keratin Intermediate Filaments	147
5. Supplementation Assays Using Cytosol (S) and Isolated Keratin Intermediate Filaments (kP)	149
6. Summary	151
Acknowledgments	152
References	152
9. Purification of Protein Chaperones and Their Functional Assays with Intermediate Filaments	155
Ming-Der Perng, Yu-Shan Huang, and Roy A. Quinlan	
1. Introduction	156
2. Purification of sHSPs	159
3. Purification of IF Proteins	162
4. Analysis of sHSP and IF Proteins Interaction	164
Acknowledgments	170
References	170
10. Purification and Structural Analysis of Plectin and BPAG1e	177
José A. Manso, Inés García Rubio, María Gómez-Hernández, Esther Ortega, Rubén M. Buey, Ana M. Carballido, Arturo Carablas, Noelia Alonso-García, and José M. de Pereda	
1. Introduction	178

2. Purification of Fragments of Plectin and BPAG1e for Structural Analysis	179
3. Structural Analysis of Plectin and BPAG1e	183
4. Analysis of Multi-Domain Structures Combining MX, DEER, and SAXS	192
5. Conclusion	194
Acknowledgments	194
References	194
11. Purification and Structural Analysis of Desmoplakin	197
Hee-Jung Choi and William I. Weis	
1. Introduction	198
2. Purification and Structural Analysis of DPNT	200
3. Purification and Structural Analysis of DPCT	205
4. Future Directions	210
Acknowledgments	211
References	211
12. Degradation of the Intermediate Filament Family by Gigaxonin	215
Pascale Bomont	
1. Introduction	215
2. Gigaxonin Expression and Localization	216
3. Analyzing Gigaxonin Role in IF Organization	221
4. Future Perspectives	228
Acknowledgments	229
References	229
Part III	
Functional and Genetic Analysis of the Plakin and Other Cytoskeletal Cross-Linkers	
13. Functional and Genetic Analysis of Plectin in Skin and Muscle	235
Günther A. Reznicek, Lilli Winter, Gernot Walko, and Gerhard Wiche	
1. Introduction	236
2. Main Challenges	240
3. Tools	241
4. Methods, Pearls, and Pitfalls	243
5. Conclusions	256
Acknowledgments	257
References	257

2. MACF1 Domains	336
3. Methods to Study Plakin Domain Interactions	338
4. Tissue-Specific Functions of MACF1 in Mammals	343
5. Conclusions	349
References	349
18. Functional and Genetic Analysis of Neuronal Isoforms of BPAG1	355
Anisha Lynch-Godrei and Rashmi Kothary	
1. Introduction	356
2. Mouse Models	358
3. Cell Culture System	362
4. BPAG1 Isoform Knockdown in Immortalized Cell Lines	366
5. BPAG1 Expression Analysis	367
6. BPAG1 Fusion Protein Constructs	369
7. Concluding Remarks	369
Acknowledgments	370
References	370
19. Functional and Genetic Analysis of Spectraplakins in <i>Drosophila</i>	373
Ines Hahn, Matthew Ronshaugen, Natalia Sánchez-Soriano, and Andreas Prokop	
1. Introduction	374
2. Strategies to Manipulate Shot Function	378
3. Functional Analyses of <i>shot</i> In Vivo	387
4. Functional Analyses of Shot in Cell Culture	390
5. Informatics Approaches to Shot Protein Function	394
6. Conclusion	395
Acknowledgments	395
References	396
20. Functional and Genetic Analysis of VAB-10 Spectraplakin in <i>Caenorhabditis elegans</i>	407
Christelle Gally, Huimin Zhang, and Michel Labouesse	
1. Introduction	408
2. Tools	409
3. High-Throughput RNAi Screen in L4 Worms	418
4. 2D Gel on Intermediate Filaments	422
5. Conclusion	427
Acknowledgments	427
References	427

Part IV

Functional and Genetic Analysis of Lamin-Associated Proteins**21. Tagged Chromosomal Insertion Site System: A Method to Study Lamina-Associated Chromatin 433**

Jennifer C. Harr and Karen L. Reddy

1. Introduction 434
2. Design and Preparation of the TCIS System Construct 435
3. Generation of Stable Mammalian TCIS Clonal Lines via Random Integration 440
4. Insert Your "DNA of Interest" into a Genomic TCIS Site 442
5. Design and Use a Customized (or Standard) EGFP-LacI Construct for TCIS Visualization 445
6. Detect and Localize TCIS Sites by Immunofluorescence 446
7. Applications 448
8. Concluding Remarks 451
- Acknowledgments 451
- References 452

22. Lamin-Binding Proteins in *Caenorhabditis elegans* 455

Agnieszka Dobrzynska, Peter Askjaer, and Yosef Gruenbaum

1. Introduction 456
2. Mos1-Mediated Single-Copy Insertion 463
3. CRISPR/Cas9-Mediated Genome Engineering 468
4. DamID Analysis of LBP Interactions with Chromatin 471
5. Chromatin Immunoprecipitation of LBPs 476
6. Physiological Assays for LBP Function 477
7. FRAP and FLIP Analysis 479
8. Summary 480
- Acknowledgments 480
- References 480

23. Pathologically Relevant Prelamin A Interactions with Transcription Factors 485

Arantza Infante and Clara I. Rodríguez

1. Introduction 486
2. Prelamin A Accumulation in hMSCS 489
3. Identification of Transcription Factors dysregulated due to Prelamin A Accumulation 494

4. Conclusions	499
Acknowledgments	499
References	499
24. MCLIP Detection of Novel Protein-Protein Interactions at the Nuclear Envelope	503
Mohammed Hakim Jafferli, Ricardo A. Figueroa, and Einar Hallberg	
1. Introduction	503
2. MCLIP Method	509
3. Method for Isolating Nuclei from Tissue Culture Cells	511
4. Conclusions	512
Acknowledgments	512
References	512
25. Preparation of the Human Cytomegalovirus Nuclear Egress Complex and Associated Proteins	517
Mayuri Sharma, Jeremy P. Kamil, and Donald M. Coen	
1. Introduction	518
2. Sample Preparation for Isolation of the NEC	519
3. Concluding Remarks	524
Acknowledgments	525
References	525
Author Index	527
Subject Index	563
