

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xi
1. Overview of PAF-Degrading Enzymes	1
Ken Karasawa and Keizo Inoue	
1. Introduction	2
2. Intracellular PAF-AH I	5
3. Intracellular PAF-AH II	10
4. Plasma PAF-AH	13
5. Conclusion	15
References	16
2. Intracellular PAF-Acetylhydrolase Type I	23
Mitsuharu Hattori and Hiroyuki Arai	
1. Introduction and History	24
2. Identification of Intracellular PAF-AH, Isoform Ib	24
3. Nomenclature of PAF-AH Ib Subunits	25
4. Structure of PAF-AH Ib	26
5. Physiological Roles of PAF-AH Ib	28
6. Remaining Questions and Future Prospects	32
Acknowledgments	33
References	33
3. Platelet-Activating Factor Acetylhydrolase and Brain Development	37
Gary D. Clark	
1. Introduction	38
2. Genetics of Human Lissencephaly and Recognition of the <i>LSI</i> -Encoded Protein as PAFAH1B1	38
3. Role of Pafah1b and Platelet-Activating Factor in Brain Development	39
4. Coordination of Brain Platelet-Activating Factor Acetylhydrolase Signaling and Reelin Signaling in Mouse Brain	40
5. Roles of "Brain" Platelet-Activating Factor Acetylhydrolase in Testicular Development and Spermatogenesis	41
6. Conclusions	41
References	41

4. Intracellular Platelet-Activating Factor Acetylhydrolase, Type II: A Unique Cellular Phospholipase A₂ That Hydrolyzes Oxidatively Modified Phospholipids	43
Nozomu Kono and Hiroyuki Arai	
1. Introduction	44
2. Structure of PAF-AH (II)	44
3. Substrate Specificity of PAF-AH (II)	46
4. Biological Roles of PAF-AH (II)	48
5. Regulation of PAF-AH (II)	50
6. Future Prospects	51
Acknowledgments	51
References	52
5. Trafficking and Oligomeric Regulation of Platelet-Activating Factor Acetylhydrolase Type II	55
Meghan M. Klems and Brian J. Bahnson	
1. Introduction	56
2. Trafficking of PAF-AH-II	62
3. Oligomeric Regulation of PAF-AH-II	65
4. Conclusions and Future Work	67
Acknowledgment	68
References	68
6. Plasma PAF-AH (PLA2G7): Biochemical Properties, Association with LDLs and HDLs, and Regulation of Expression	71
Diana M. Stafforini	
1. Introduction and Perspectives	72
2. Biochemical Properties of Plasma PAF-AH	73
3. Association with Lipoproteins	76
4. Regulation of PAF-AH Expression	79
5. Conclusions	88
Acknowledgments	88
References	88
7. Crystal Structure and Atomic Level Analysis of Plasma PAF-AH	95
Tara D. Gonzalez and Brian J. Bahnson	
1. Introduction	96
2. Plasma PAF-AH Structural Overview	98
3. Lipoprotein Particle and Membrane Interactions	101

4. Plasma PAF-AH Ligand Complexes at the Active Site	104
5. Conclusions	111
Acknowledgments	113
References	113
8. Naturally Occurring Missense Mutation in Plasma PAF-AH Among the Japanese Population	117
Ken Karasawa	
1. Introduction	118
2. Effect of Plasma PAF-AH Mutation on Enzyme Substrates	119
3. Mutation in Plasma PAF-AH and Atherosclerosis	122
4. Mutation in Plasma PAF-AH and Asthma	131
5. Mutation in Plasma PAF-AH and Other Diseases	133
6. Conclusion	134
References	135
9. Plasma PAF-AH/PLA2G7 Genetic Variability, Cardiovascular Disease, and Clinical Trials	145
Sonia Karabina and Ewa Ninio	
1. PAF-AH in Cardiovascular Disease	146
2. Development of PAF-AH-Specific Inhibitor and Preclinical Studies	147
3. Clinical Trials with PAF-AH-Specific Inhibitor Darapladib	148
4. Genetic Variability of PAF-AH/PLA2G7	149
5. Conclusions	151
Acknowledgments	151
References	152
10. Diverse Functions of Plasma PAF-AH in Tumorigenesis	157
Diana M. Stafforini	
1. Introduction and Perspectives	158
2. Biological Consequences of Altered PAF-AH Expression/Function	159
3. Specific Examples	165
4. PAF-AH Mutations in Cancer	169
5. PAF-AH as a Cancer Biomarker and Therapeutic Target	169
6. Conclusions	173
Acknowledgments	173
References	174
