Preface

xvii

1. Comparative Biochemistry and In Vitro Pathway Reconstruction as Powerful Partners in Studies of Metabolic Diversity

1

P. Fan, G.D. Moghe, and R.L. Last

1. Introduction

2

2. Characterization of Specialized Metabolite Diversity Using LC/MS and NMR

4

3. Phylogeny-Driven Analysis of the Biochemical Basis of Specialized Metabolite Diversity

8

4. Conclusions

15

Acknowledgments

16

References

16

2. De Novo Deep Transcriptome Analysis of Medicinal Plants for Gene Discovery in Biosynthesis of Plant Natural Products

19

R. Han, A. Rai, M. Nakamura, H. Suzuki, H. Takahashi, M. Yamazaki, and K. Saito

1. Methods for Transcriptomic Study Prior to High-Throughput Sequencing

20

2. Deep Transcriptome Outline

22

3. Preparation of the Plant Materials and RNA Extraction

24

4. cDNA Library Construction

27

5. High-Throughput Sequencing

30

6. Data Interpretation

31

7. Application of RNA-Seq on Medicinal Plants and Perspectives

38

Acknowledgments

39

References

39

3. Genomics-Based Discovery of Plant Genes for Synthetic Biology of Terpenoid Fragrances: A Case Study in Sandalwood oil Biosynthesis

47

J.M. Celedon and J. Bohlmann

1. Introduction

48

2. Prior Knowledge of Sandalwood TPSs and P450s and Development of a Hypothesis

50

v |

3. Replication, Sampling, and Statistical Design	51
4. Defining Temporal and Spatial Variables for Tissue Sampling	52
5. Tissue Sampling	53
6. Metabolite Profiling	53
7. Isolation of High-Quality RNA from Recalcitrant Tissues	55
8. Transcriptome Sequencing and De Novo Assembly	56
9. Transcriptome Mining and Annotation	57
10. Expression Analysis and Candidate Gene Selection	58
11. Functional Characterization of Candidate Genes	59
12. Product Identification	63
Acknowledgments	65
References	65
4. A Workflow for Studying Specialized Metabolism in Nonmodel Eukaryotic Organisms	69
M.P. Torrens-Spence, T.R. Fallon, and J.K. Weng	
1. Introduction	70
2. "Omics"-Based Novel Specialized Metabolic Pathway Discovery	72
3. Structure-Function Analysis of Specialized Metabolic Enzymes	80
4. Reconstitution of Specialized Metabolic Pathways in Heterologous Systems	87
5. Summary	90
Acknowledgments	91
References	91
5. Gene Discovery for Synthetic Biology: Exploring the Novel Natural Product Biosynthetic Capacity of Eukaryotic Microalgae	99
E.C. O'Neill, G. Saalbach, and R.A. Field	
1. Introduction	100
2. Natural Product Synthases	102
3. Genome Mining for the Identification of Natural Products	106
4. Natural Product Discovery	113
5. Conclusions	115
Acknowledgments	116
References	116
6. <i>cis</i>-Prenyltransferase and Polymer Analysis from a Natural Rubber Perspective	121
M. Kwon, E.-J.G. Kwon, and D.K. Ro	
1. Introduction	122
2. Rationale: Observation of Revertants from <i>rer2</i> Mutant	125

3. Generation of <i>rer2</i> and <i>srt1</i> Double Knockout Yeast Strain	128
4. Complementation of <i>rer2Δ srt1Δ</i> with <i>CPT</i> and <i>CBP</i>	131
5. CPT Biochemical Assay Using Yeast Microsomes	135
6. General Discussion	142
Acknowledgments	143
References	144
 7. Generation and Functional Evaluation of Designer Monoterpene Synthases	 147
N. Srividya, I. Lange, and B.M. Lange	
1. Introduction	148
2. Equipment	150
3. Materials	150
4. Step 1—Generation of Expression Constructs	153
5. Step 2—Production of Purified, Recombinant Target Enzyme	158
6. Step 3—Functional Evaluation of Recombinant Monoterpene Synthases	161
7. Conclusions	164
Acknowledgments	164
References	164
 8. Prequels to Synthetic Biology: From Candidate Gene Identification and Validation to Enzyme Subcellular Localization in Plant and Yeast Cells	 * 167
E. Foureau, I. Carqueljeiro, T. Dugé de Bernonville, C. Mellin, F. Lafontaine, S. Besseau, A. Lanoue, N. Papon, A. Oudin, G. Glévarec, M. Clastre, B. St-Pierre, N. Giglioli-Guivarc'h, and V. Courdavault	
1. Introduction	168
2. Identification of Candidate Genes Through Transcriptomic Data Mining and Analysis	171
3. Validation of Candidate Gene Function by Biolistic-Mediated VIGS	187
4. Studying the Subcellular Localization of Biosynthetic Pathway Enzymes in Plant and Yeast Cells to Alleviate Bottlenecks in Bioengineering Approaches	191
5. Concluding Remarks	202
Acknowledgments	203
References	203

9. Functional Expression and Characterization of Plant ABC Transporters in <i>Xenopus laevis</i> Oocytes for Transport Engineering Purposes	207
D. Xu, D. Veres, Z.M. Belew, C.E. Olsen, H.H. Nour-Eldin, and B.A. Halkier	
1. Introduction	208
2. Preparation of cDNA of Plant ABC Transporter Genes by In Planta "Exon Engineering"	211
3. ABC Transporter Expression in <i>Xenopus</i> Oocytes	215
4. Optimization of Transport Assay for Diffusible ABA in <i>Xenopus</i> Oocytes	217
5. Case Study: Characterization of the ABA Exporter at ABCG25 in <i>Xenopus</i> Oocytes	219
6. Conclusions	220
Acknowledgments	221
References	221
10. Quantifying the Metabolites of the Methylerythritol 4-Phosphate (MEP) Pathway in Plants and Bacteria by Liquid Chromatography-Triple Quadrupole Mass Spectrometry	225
D. González-Cabanelas, A. Hammerbacher, B. Raguschke, J. Gershenzon, and L.P. Wright	
1. Introduction	226
2. Preparation of Stable Isotope-Labeled Internal Standards	229
3. Extraction of Methylerythritol Phosphate Pathway Intermediates from Biological Sources	234
4. Analysis of Methylerythritol Phosphate Pathway Metabolites by LC-MS/MS	236
5. Discussion and Summary	244
References	245
11. Establishing the Architecture of Plant Gene Regulatory Networks	251
F. Yang, W.Z. Ouma, W. Li, A.I. Doseff, and E. Grotewold	
1. Introduction	252
2. The <i>cis</i> -Regulatory Apparatus	254
3. The <i>Trans</i> -Acting Factors	260
4. Transcription Factor Centered Approaches	266
5. Gene-Centered Approaches	274
6. Resources for Studying Plant GRNs	281
7. Conclusions	286
Acknowledgment	287
References	287

12. Engineering of Tomato Glandular Trichomes for the Production of Specialized Metabolites	305
R.W.J. Kortbeek, J. Xu, A. Ramirez, E. Spyropoulou, P. Diergaarde, I. Otten-Bruggeman, M. de Both, R. Nagel, A. Schmidt, R.C. Schuurink, and P.M. Bleeker	
1. Introduction	306
2. Materials and Technology	310
3. Proof of Concept: Targeted Expression of a Terpene Precursor Gene in Tomato Glandular Trichomes	318
4. Summary	325
Acknowledgments	326
References	327
 13. Tomato Fruits—A Platform for Metabolic Engineering of Terpenes	 333
M. Gutensohn and N. Dudareva	
1. Introduction	334
2. Terpenoid Formation in Tomato Fruits	338
3. Transgene Expression in Ripening Tomato Fruits	340
4. Overexpression of Terpene Biosynthetic Genes In Tomato Fruits	343
5. Analysis of Terpenes in Tomato Fruits	349
6. Conclusions	350
Acknowledgments	352
References	352
 14. Libraries of Synthetic TALE-Activated Promoters: Methods and Applications	 361
T. Schreiber and A. Tissier	
1. Introduction	361
2. Construction of Libraries of Synthetic Promoters Using Golden Gate Cloning	366
3. Analyzing Promoter Activity in Transient Assays	371
4. Conclusion	373
References	375
