

CONTENTS

Contributors	xi
Preface	xiii
1. Diversity of Entomopathogenic Fungi: Which Groups Conquered the Insect Body?	1
J.P.M. Araújo, D.P. Hughes	
1. Introduction	2
2. The Major Groups of Entomopathogenic Fungi and Oomycetes	4
3. Methods	12
4. Results	14
5. Discussion	27
6. Conclusion	31
Acknowledgments	32
Supplementary Data	32
References	32
2. Utilizing Genomics to Study Entomopathogenicity in the Fungal Phylum <i>Entomophthoromycota</i>: A Review of Current Genetic Resources	41
H.H. De Fine Licht, A.E. Hajek, J. Eilenberg, A.B. Jensen	
1. Introduction	42
2. Genetic Tools Used for Phylogenetic Inference, Evolution, and Epizootiology	45
3. Host-Pathogen Interactions	49
4. Genome Characteristics	53
5. Insights to Be Gained From <i>Entomophthoromycota</i> Genomic Resources	55
Acknowledgments	59
References	59
3. Advances in Genomics of Entomopathogenic Fungi	67
J.B. Wang, R.J. St. Leger, C. Wang	
1. Introduction	68
2. Evolutionary Relationships of Entomopathogenic Fungi	70
3. Evolution of Sex in Entomopathogenic Fungi	72
4. Evolution of Fungal Host Specificity	77
5. Protein Family Expansions and Contractions	80

6. Horizontal Gene Transfer	94
7. Conclusions and Future Perspectives	96
Acknowledgments	97
References	97
4. Insect Pathogenic Fungi as Endophytes	107
S. Moonjely, L. Barelli, M.J. Bidochka	
1. Introduction	108
2. Evolution of Endophytic Insect Pathogenic Fungi	109
3. Multifunctional Lifestyles	110
4. Relationship Between Insect Pathogen Genes and Endophytism	116
5. Application of Endophytic Insect Pathogenic Fungi	122
6. Secondary Metabolites	126
References	127
5. Genetically Engineering Entomopathogenic Fungi	137
H. Zhao, B. Lovett, W. Fang	
1. Introduction	138
2. Improving Virulence	139
3. Improving the Efficacy of Mycoinsecticides to Control Vector-Borne Diseases	149
4. Improve Tolerance to Abiotic Stresses	151
5. Promoters Used for Genetic Engineering of Entomopathogenic Fungi	154
6. Methods to Mitigate the Safety Concerns of Genetically Modified Entomopathogenic Fungi	155
7. Conclusion	157
Acknowledgments	158
References	158
6. Molecular Genetics of <i>Beauveria bassiana</i> Infection of Insects	165
A. Ortiz-Urquiza, N.O. Keyhani	
1. Introduction	166
2. The Infection Process	207
3. Techniques for Molecular Manipulation of <i>Beauveria bassiana</i>	211
4. What Constitutes a Virulence Factor?	213
5. Genetic Dissection in <i>Beauveria bassiana</i>	215
6. Conclusions and Future Prospects	236
Acknowledgments	237
References	237

7. Insect Immunity to Entomopathogenic Fungi	251
H.-L. Lu, R.J. St. Leger	
1. Behavioral Avoidance of Pathogens	254
2. The Impact of Physiological State on Immune Functions in Insects	256
3. Cuticle as a Barrier to Microbial Infections	259
4. Overview of Insect Immune Defense Mechanisms	261
5. Immune Recognition of Fungi	262
6. Cellular Immune Responses to Fungi	264
7. Interaction of Fungi with the Phenoloxidase and Coagulation Responses	266
8. Humoral Immune Responses to Fungi	268
9. The Evolutionary Genetics of Insect Immunity	269
10. Fungal Countermeasures to Host Immunity	273
11. Tolerance versus Resistance	274
12. Concluding Remarks and Future Perspectives	275
Acknowledgments	277
References	277
8. Disease Dynamics in Ants: A Critical Review of the Ecological Relevance of Using Generalist Fungi to Study Infections in Insect Societies	287
R.G. Loreto, D.P. Hughes	
1. Introduction	288
2. Origin and Trends of Using Generalist Fungal Parasites to Study Ant-Fungal Parasite Interactions	291
3. The Ecological Relevance of Laboratory Experimentation With <i>Beauveria</i> and <i>Metarhizium</i> in Ants	292
4. Natural Occurrence of <i>Beauveria</i> and <i>Metarhizium</i> in Ants: Opportunistic Parasites?	297
5. Future Perspectives	300
Acknowledgments	301
Supplementary Data	302
References	302
9. Entomopathogenic Fungi: New Insights into Host-Pathogen Interactions	307
T.M. Butt, C.J. Coates, I.M. Dubovskiy, N.A. Ratcliffe	
1. Introduction	308
2. Pre-adhesion and Community-Level Immunity	309
3. Adhesion and Pre-penetration Events	317

4. Penetration of the Integument	324
5. Post-penetration HPI	328
6. Fungal Strategies to Evade and/or Tolerate the Host's Immune Response	339
7. Using Knowledge of HPI in Pest Control Programs	341
Acknowledgments	345
References	345
10. Molecular Genetics of Secondary Chemistry in <i>Metarhizium</i> Fungi	365
B.G.G. Donzelli, S.B. Krasnoff	
1. Introduction	366
2. The Small Molecule Metabolites of <i>Metarhizium</i>	368
3. Molecular Bases of Secondary Metabolism in the Genus <i>Metarhizium</i>	380
4. Conclusions	416
Supplementary Data	418
References	418
11. From So Simple a Beginning: The Evolution of Behavioral Manipulation by Fungi	437
D.P. Hughes, J.P.M. Araújo, R.G. Loreto, L. Quevillon, C. de Bekker, H.C. Evans	
1. Introduction	438
2. What Is Behavioral Manipulation?	439
3. Diversity of Fungi Controlling Animal Behavior	441
4. Tinbergen's Four Questions as They Apply to Behavioral Manipulation of Arthropods by Fungi	450
5. Mechanisms of Behavioral Manipulation	455
6. Can Behavioral Manipulation be Evolved In Silico?	462
7. Conclusion	464
Acknowledgments	464
References	465
