1. Evolution, Regulation, and Function of N-terminal Variable Region of Troponin T: Modulation of Muscle Contractility and Beyond 1

Jian-Ping Jin

1. Introduction	2
2. Molecular Structure of Troponin T	3
3. Evolution of Troponin T Isoform Genes	6
4. Alternative Splicing	10
5. Developmental Regulations	15
6. Posttranslational Modifications	19
7. Conclusion and Perspectives	22
Acknowledgments	22
References	22

2. Phosphatidylethanolamine Metabolism in Health and Disease 29

Elizabeth Calzada, Ouma Onguka, Steven M. Claypool

1. Introduction	30
2. Heterogeneity of Biological Membranes	31
3. PE Biosynthesis and Metabolism	33
4. Cellular and Molecular Functions of PE	49
5. PE and Diseases	59
6. Concluding Remarks	69
Acknowledgment	70
References	70

3. Microtubule Dynamics in Neuronal Development, Plasticity, and Neurodegeneration 89

Lorène Penazzi, Lidia Bakota, Roland Brandt

1. Introduction	90
2. Microtubule Structure and Dynamics	91
3. Microtubules in Axonogenesis and Neuronal Plasticity	101

4. Microtubule Dynamics in Dendrites	116
5. Microtubule Alterations During Aging and Neurodegeneration	129
6. Concluding Remarks	140
References	141
4. Fish Chromatophores—From Molecular Motors to Animal Behavior	171
Helen Nilsson Sköld, Sara Aspöngren, Karen L. Cheney, Margareta Wallin	
1. Introduction	172
2. Fish Coloration and Color Change	173
3. Regulation of Color Change	186
4. Functional Aspects of Color Change	194
5. Nondermal Chromatophores	203
6. Concluding Remarks and Future Perspectives	207
Acknowledgments	208
References	208
5. Molecular Breeding of <i>Sorghum bicolor</i>, A Novel Energy Crop	221
Reynante Ordonio, Yusuke Ito, Yoichi Morinaka, Takashi Sazuka, Makoto Matsuoka	
1. Introduction	222
2. Mutant Libraries of Sorghum	223
3. Sorghum Mutants and Their Use for Gene Functional Analysis	228
4. Trait Loci Identified Through QTL Analyses and Genome-Wide Association Studies (GWAS)	242
5. Transgenic Approach for Sorghum Research and Breeding	248
6. Concluding Remarks	249
References	250
6. Cell-Nonautonomous Mechanisms Underlying Cellular and Organismal Aging	259
Younes Medkour, Veronika Svistkova, Vladimir I. Titorenko	
1. Introduction	260
2. Low Molecular Weight Transmissible Longevity Factors in Yeast Populations	261
3. Nematode Longevity Regulated by Communications Between Different Tissues	269
4. Nematode Longevity Regulated by Host-Gut Microbiota Interactions	281
5. Concluding Remarks	286
Acknowledgments	287
References	287

7. OSBP-Related Protein Family: Mediators of Lipid Transport and Signaling at Membrane Contact Sites	299
Henriikka Kentala, Marion Weber-Boyvat, Vesa M. Olkkonen	
1. Introduction	300
2. Subcellular Targeting of ORPs	306
3. Function of ORPs as Lipid Transporters or Sensors	316
4. Involvement of ORPs in Vesicle Transport	324
5. Vimentin Filament Organization is Modified by ORP4	329
6. Concluding Remarks	330
Acknowledgments	331
References	331
<i>Index</i>	341
