

Contents

Preface	xi
About the Author	xv

1. Elements of Experimentation

Reason for Investigation	2
What to Test	3
Levels and Outcome Measures	4
Site Preparation and Controls	5
Troublesome Variables	7
What Do You Do First When You Want to Run an Experiment	9
Types of Experimental Design	10
Summary	13
References	13

2. Experimental Design and Hypothesis

Hypothesis—Asking the Right Research Question	16
Null Hypothesis (H_0) and Alternative Hypothesis (H_A)	18
What is Probability Anyway?	20
Statistical Significance	21
What is a Significant Experiment?	22
One-Tailed versus Two-Tailed Tests	29
Bias	31
Summary	34
References	35

3. Statistic Essentials

Types of Data	38
Nominal Data	38
Ordinal Data	39
Interval Data	41
Ratio Data	41
Discrete and Continuous Data	42
Measures of Central Tendency	43
Variance	48
Standard Deviation	51
Standard Error of the Mean	52

Confidence Interval	53
Statistical Myth Concerning Confidence Intervals	57
What is Meant by "Effect Size"?	58
What is a Z Score?	59
Degrees of Freedom	59
Why $n-1$?	60
Summary	60
References	61
 4. Graphing Data	
How to Graph Data	64
Box and Whisker Plots	72
Scatter Plots	75
Alternative Graphing Procedures	78
Indicating Significance on a Graph	80
Summary	81
 5. Correlation and Regression	
Correlation	83
Pearson's Product-Moment Correlation Coefficient	85
Spearman's Rank Coefficient and Kendall's Tau	89
Regression (Least Squares Method)	90
Summary	95
Reference	95
 6. One-Way Analysis of Variance	
Analysis of Variance	98
Student's t -Test	99
Comparing Three or More Independent Groups	103
Completely Randomized One-Way ANOVA	103
Partitioned Variance	105
Reporting ANOVA Results	107
Homogeneity of Variance	107
Multiple Comparisons	112
Multiple t -Tests	116
False Discovery Rate	119
Common Post Hoc Tests	120
How to Choose Which MCP (Post Hoc) to Employ after an ANOVA	124
One-Way Repeated Measures (Within-Subject) Analysis of Variance	126
Sphericity	129
Summary	132
References	132

7. Two-Way Analysis of Variance

Concept of Interaction	137
Difference between One-Way and Two-Way Analysis of Variance	139
Interpreting a Two-Way Analysis of Variance	141
Two-Way Repeated Measure Analysis of Variance	146
Summary	155

8. Nonparametric Statistics

Sign Test	159
Wilcoxon Matched Pairs Signed Rank Test (Wilcoxon Signed Rank Test)	162
Median Test	163
Wilcoxon Rank Sum Test (Mann-Whitney U Test)	165
Kolmogorov-Smirnov Two-Sample Test	168
Chi-Square	169
Fisher's Exact Test	172
Kruskal-Wallis One-Way Analysis of Variance	172
Friedman One-Way Repeated Measure Analysis of Variance by Ranks	176
Spearman's Rank Order Correlation	177
Kendall Rank Order Correlation Coefficient	181
Nonparametric and Distribution-Free Are Not Really the Same	182
Summary	182
References	182

9. Outliers and Missing Data

Reasons for Outliers	185
Removing Outliers	185
Missing Data	196
Summary	199
References	199

10. Statistic Extras

Statistics Speak	201
How to Read Statistical Equations	204
Important Statistical Symbols	206

Index	209
-------	-----
