

CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xiii</i>
1. Proteostasis Maintenance of Cys-Loop Receptors	1
Yan-Lin Fu, Ya-Juan Wang, and Ting-Wei Mu	
1. Introduction	2
2. Folding, Assembly, and Degradation of Cys-Loop Receptors in the ER	5
3. Trafficking of Cys-Loop Receptors from ER to Golgi and to Plasma Membrane	10
4. Protein Quality Control of Cys-Loop Receptors on the Plasma Membrane	11
5. Other Regulations of Cys-Loop Receptors	13
6. Disease and Therapy	15
References	16
2. Harnessing the Flow of Excitation: TRP, Voltage-Gated Na⁺, and Voltage-Gated Ca²⁺ Channels in Contemporary Medicine	25
Roman V. Frolov and Matti Weckström	
1. Introduction	26
2. TRP Channels	31
3. Voltage-Gated Na ⁺ Channels	36
4. Voltage-Gated Ca ²⁺ Channels	47
5. Channelopathies of TRP, Nav, and Cav Channels	60
6. Harnessing the Flow of Excitation in Neural Circuits	77
7. Conclusion and Perspectives	80
Acknowledgments	81
References	81
3. Ion Channels in Neurological Disorders	97
Pravir Kumar, Dhiraj Kumar, Saurabh Kumar Jha, Niraj Kumar Jha, and Rashmi K. Ambasta	
1. Introduction	98
2. Aberrant Channels in NDDs	103
3. Therapeutics Approach to Correct Altered Channel Function in NDDs	121
4. Conclusion	125

Acknowledgments	125
Glossary	126
References	126
4. Acid-Sensing Ion Channels as Potential Pharmacological Targets in Peripheral and Central Nervous System Diseases	137
Beatrice Mihaela Radu, Adela Banciu, Daniel Dumitru Banciu, and Mihai Radu	
1. Acid-Sensing Ion Channels: General View	138
2. PNS Pathologies: ASICs as a Pharmacological Target	143
3. CNS Pathologies: ASICs as a Pharmacological Target	147
4. Conclusions	157
Acknowledgments	157
References	158
5. Glutamatergic NMDA Receptor as Therapeutic Target for Depression	169
Gislaine Z. Réus, Helena M. Abelaira, Talita Tuon, Stephanie E. Titus, Zuleide M. Ignácio, Ana Lúcia S. Rodrigues, and João Quevedo	
1. Introduction	170
2. Glutamatergic System	171
3. NMDA Receptor Binding and Modulators with Antidepressant Properties	174
4. Conclusion	187
Acknowledgments	188
References	189
6. AMPA Receptors as Therapeutic Targets for Neurological Disorders	203
Kevin Lee, Lucy Goodman, Chantelle Fourie, Susan Schenk, Beulah Leitch, and Johanna M. Montgomery	
1. AMPA Receptor Structure and Function	205
2. Synaptic Plasticity and AMPA Receptor Dynamics	207
3. AMPA Receptor Interactions with Postsynaptic Density Proteins	215
4. AMPA Receptors in Neurodegenerative Diseases	223
5. AMPA Receptors and ASD	228
6. AMPA Receptors in the Treatment of Drug Addiction	231
7. AMPA Receptors and Epilepsy	233
8. Translating Data from Animal Models to the Human Brain	236
9. Conclusions and Future Directions	237
References	237

7. pH-Sensitive K^+ Currents and Properties of K_2P Channels in Murine Hippocampal Astrocytes	263
Johannes Weller, Christian Steinhäuser, and Gerald Seifert	
1. Introduction	264
2. Materials and Methods	266
3. Results	273
4. Discussion	282
Acknowledgment	289
References	289
8. SUMOylation and Potassium Channels: Links to Epilepsy and Sudden Death	295
Hongmei Wu, Xu Chen, Jinke Cheng, and Yitao Qi	
1. Introduction	296
2. SUMOylation and De-SUMOylation Machinery	297
3. SUMOylation and Potassium Ion Channels	302
4. Role of SUMOylation in Epilepsy and Sudden Death	307
5. Conclusions and Outlook	312
Acknowledgment	313
References	313
Author Index	323
Subject Index	377
