1. Studying the Evolution of the Vertebrate Circadian Clock: The Power of Fish as Comparative Models	1
N.S. Foulkes, D. Whitmore, D. Vallone, C. Bertolucci	
1. Introduction	2
2. How Do Fish Clocks Directly Sense Light?	6
3. How Do Fish (and Clocks) Adapt During Evolution Under Perpetual Darkness?	12
4. Outlook	25
Acknowledgments	25
References	25
2. Genomic and Transcriptomic Approaches to Study Cancer in Small Aquarium Fish Models	31
J. Regneri, B. Klotz, M. Scharl	
1. Introduction	32
2. Cancer Models in Fish	33
3. Genomic Approaches	37
4. Transcriptomic Approaches	43
5. Outlook	55
Acknowledgments	57
References	57
3. Gal4 Driver Transgenic Zebrafish: Powerful Tools to Study Developmental Biology, Organogenesis, and Neuroscience	65
K. Kawakami, K. Asakawa, M. Hibi, M. Itoh, A. Muto, H. Wada	
1. Introduction	66
2. Tol2-Mediated Transgenesis in Zebrafish	67
3. The Gal4-UAS System in Zebrafish	69
4. Applications of Gal4 Drivers	74
5. Conclusion	83
Acknowledgments	84
References	84

4. Whole-Organism Cellular Pathology: A Systems Approach to Phenomics	89
K.C. Cheng, S.R. Katz, A.Y. Lin, X. Xin, Y. Ding	
1. Introduction	90
2. Lessons From Light Microscopy	95
3. Whole-Organism Cellular Pathology as a Systems Approach to Phenomics	107
4. Conclusions	111
Acknowledgments	112
References	112
5. Evolutionary Genetics of the Cavefish <i>Astyanax mexicanus</i>	117
D. Casane, S. Rétaux	
1. Introduction	118
2. The <i>Astyanax mexicanus</i> Surface Fish and Cavefish Model System	124
3. Genetics in the Premolecular Era	127
4. Genetic Determinism of Troglomorphic Traits: Insights From a Quantitative Trait Loci Approach	131
5. Genetic Determinism of Troglomorphic Traits: A Candidate Gene Approach	140
6. Genomics and Evolutionary Molecular Genetics	142
7. Functional Genetics and Molecular Tools	146
8. Conclusion	149
Acknowledgments	152
References	152
6. Transcriptional Regulation During Zygotic Genome Activation in Zebrafish and Other Anamniote Embryos	161
J. Wragg, F. Müller	
1. Zygotic Genome Activation	162
2. Two Phases of Zygotic Genome Activation Are Regulated by Distinct Mechanisms	163
3. Promoter Regulation Mechanisms During Zygotic Genome Activation	169
4. Transitions in the Utilization of Transcription Machinery at ZGA	179
5. Conclusions and Perspectives	182
Acknowledgments	184
References	184

7. The Zebrafish as Model for Deciphering the Regulatory Architecture of Vertebrate Genomes	195
S. Rastegar, U. Strähle	
1. Introduction	195
2. Enhancers Are Tricky to Find Reliably in the Genome by Computational Means	198
3. How Can the Zebrafish Model Contribute?	206
Acknowledgments	207
References	207
8. Transcriptomic Approaches in the Zebrafish Model for Tuberculosis—Insights Into Host- and Pathogen-specific Determinants of the Innate Immune Response	217
E.L. Benard, J. Rougeot, P.I. Racz, H.P. Spaink, A.H. Meijer	
1. Introduction	218
2. Zebrafish as a Model for Studying Immunity and Infection	220
3. Mycobacterial Granuloma Development in Zebrafish	221
4. Timing of Events During the <i>M. marinum</i> Infection Process in Zebrafish Embryos and Larvae	223
5. Zebrafish Transcriptomics	226
6. The Profiles of the Gene Expression Response to <i>M. marinum</i> Infection Can Be Divided Into an Early, Mid, and Late Phase	227
7. Early and Late Regulation of Transcription Factor Genes	231
8. Regulation of Pro-inflammatory Cytokine Genes	233
9. Induction of Matrix Metalloproteinase Genes	234
10. Collective and Strongly Fluctuating Regulation of Lipid Metabolism and Transport Genes	235
11. Early Induction of Complement Component Genes	236
12. Late-Phase Response Genes	237
13. Host-Specific Determinants of the Innate Immune Response	238
14. Common and Specific Pathogen-Dependent Innate Immune Responses	239
15. Concluding Remarks	242
Acknowledgments	243
References	243
Index	253
