1. Compartmentalization and Regulation of Sulfate Assimilation Pathways in Plants	1
A.-S. Bohrer, H. Takahashi	
1. Introduction	2
2. Sulfate Transport Systems	3
3. Sulfate Assimilation	16
4. Conclusions and Future Perspectives	23
Acknowledgments	25
References	25
2. Insight Into the Role of Long Noncoding RNA in Cancer Development and Progression	33
C.H. Li, Y. Chen	
1. Introduction	35
2. Roles of lncRNA During Cancer Development	41
3. Cancer Cell Survival	46
4. lncRNA in Cancer Stem Cell	50
5. Insight of Novel lncRNA Roles in Cancer	53
6. Diagnostic and Prognostic Value of lncRNAs	56
7. Concluding Remarks	57
Acknowledgment	58
References	58
3. Endogenous Mechanisms of Cardiac Regeneration	67
M.S.W. Xiang, K. Kikuchi	
1. Introduction	68
2. Endogenous Cellular Sources for Cardiac Regeneration	70
3. Molecular Mechanisms Limiting Cardiac Regeneration	83
4. Molecular Mechanisms Stimulating Cardiac Regeneration	99

5. Nonmyocyte Regulation of Cardiac Regeneration	107
6. Summary and Prospects	116
Acknowledgments	117
References	117
4. NF-κB Signaling as a Driver of Ageing	133
F.G. Osorio, C. Soria-Valles, O. Santiago-Fernández, J.M.P. Freije, C. López-Otín	
1. Introduction	135
2. NF- κ B Signaling Pathway	135
3. NF- κ B Activation in Ageing	139
4. Monitoring NF- κ B Activity During Ageing	141
5. NF- κ B Signaling in Ageing	142
6. NF- κ B and Cancer	158
7. NF- κ B as a Biomarker of Ageing	159
8. Rejuvenation Approaches Based on NF- κ B Inhibition	160
9. Conclusions	160
Acknowledgments	162
References	162
5. Metabolic and Signaling Functions of Cancer Cell-Derived Extracellular Vesicles	175
P. Fonseca, I. Vardaki, A. Occhionero, T. Panaretakis	
1. Introduction	176
2. Cellular Metabolism and Exosomes	180
3. Future Perspectives and Directions	192
References	194
6. Mutually Supportive Mechanisms of Inflammation and Vascular Remodeling	201
J.R. Whiteford, G. De Rossi, A. Woodfin	
1. Introduction	203
2. Inflammation Promotes Angiogenesis and Vascular Remodeling	205
3. Inflammatory Angiogenesis and Disease Progression	232
4. Postischemic Revascularization	236
5. Angiogenesis Supports Chronic Inflammation	246
6. Conclusions	251
Acknowledgments	254
References	254

7. Pharmacological Actions of Glucagon-Like Peptide-1, Gastric Inhibitory Polypeptide, and Glucagon	279
R. Sekar, K. Singh, A.W.R. Arokiaraj, B.K.C. Chow	
1. Introduction	280
2. Glucagon-Like Peptide-1	281
3. GIP	309
4. Glucagon	318
Acknowledgments	322
References	322
8. Interferon Beta: From Molecular Level to Therapeutic Effects	343
M. Haji Abdolvahab, M.R.K. Mofrad, H. Schellekens	
1. Introduction	344
2. Three-Dimensional Structure of IFN β	345
3. Dynamic Conformation of IFN β	347
4. IFN β -Signaling Pathway	349
5. IFN β Activities	351
6. Therapeutic Effects of IFN β in Different Diseases	353
7. Immunogenicity, Major Issue Related to Some Types of IFN β Therapy	356
8. How to Overcome Immunogenicity of IFN β	361
9. Conclusions	363
Acknowledgments	363
References	364
