

CONTENTS

Contributors

ix

1. New Insights into Mechanisms and Functions of Nuclear Size Regulation

1

Lidija D. Vuković, Predrag Jevtić, Lisa J. Edens, Daniel L. Levy

1. Introduction 2
2. Overview of Cellular Structures and Activities that Contribute to Nuclear Size Determination 3
3. Model Systems to Elucidate Mechanisms of Nuclear Size Regulation 18
4. Functional Significance of Nuclear Size and Morphology 33
5. Conclusions 40
- Acknowledgments 41
- References 42

2. Rho Signaling in *Dictyostelium discoideum*

61

Francisco Rivero, Huajiang Xiong

1. Introduction 62
2. *D. discoideum* Rho GTPases 66
3. Effectors 125
4. Guanine Nucleotide Dissociation Inhibitors 143
5. Guanine Nucleotide Exchange Factors 145
6. GTPase Activating Proteins 152
7. Proteins With RhoGEF and Rho GAPDomains 156
8. Processes Regulated by Rho GTPases in *D. discoideum* 157
9. Concluding Remarks 169
- Acknowledgments 170
- References 170

3. Building Blocks of Functioning Brain: Cytoskeletal Dynamics in Neuronal Development

183

Shalini Menon, Stephanie L. Gup-ton

1. Introduction 184
2. Cytoskeletal Dynamics and Organization During Neuronal Development 184

3. Concluding Remarks	227
Acknowledgments	228
References	228
4. Membrane Trafficking in Neuronal Development: Ins and Outs of Neural Connectivity	247
Cortney Chelise Winkle, Stephanie L. Gupton	
1. Introduction	248
2. Exocytosis	251
3. Endocytosis	263
4. ER and Golgi	268
5. Other Regulators of Membrane Traffic	270
6. Conclusion and Future Directions	270
Acknowledgments	271
References	272
5. Leukocytes Crossing the Endothelium: A Matter of Communication	281
Ilse Timmerman, Anna E. Daniel, Jeffrey Kroon, Jaap D. van Buul	
1. Introduction	283
2. Rolling and Adhesion: Leukocyte Perspective	284
3. Rolling and Adhesion: Endothelial-Cell Perspective	289
4. Diapedesis: Endothelial Cell-Cell Junction Regulation	300
5. Hemodynamic Shear Forces During Leukocyte TEM	309
6. Concluding Remarks	311
References	312
6. Membrane Dynamics and Signaling of the Coxsackievirus and Adenovirus Receptor	329
Fabien Loustalot, Eric J. Kremer, Sara Salinas	
1. Introduction	330
2. CAR Gene and Protein	330
3. CAR Membrane Dynamics	335
4. CAR Signaling and Role in Protein Trafficking	346
5. Concluding Remarks	353
References	353

7. Catecholaminergic System of Invertebrates: Comparative and Evolutionary Aspects in Comparison with the Octopaminergic System	361
Valentina P. Gallo, Fiorenza Accordi, Claudio Chimenti, Annalena Civinini, Enrico Crivellato	
1. Introduction	362
2. "Protozoa" Protists	364
3. Porifera	365
4. Cnidaria and Ctenophora	365
5. Protostomia	367
6. Deuterostomia	377
7. Catecholamines During Development and Metamorphosis	380
8. Concluding Remarks	383
Acknowledgments	385
References	385
Index	393

Enrico Crivellato

Department of Environmental Biology
of Udine, Italy

Anna E. Daniel

Department of Molecular Cell Biology and Biophysics, University of Illinois at Chicago
Academic Medical Center, Chicago, Illinois

Lisa J. Edsall

Department of Molecular Biology, University of California, San Diego, La Jolla,
California, U.S.A.

Valentina P. Gallo

Department of Biology and Biotechnology, University of Udine, Italy

Josephine L. Grigori

Department of Cell Biology and Physiology, University of Maryland, Baltimore,
United States of America

Neuroscience Center and Center for the Study of the Brain

Chapel Hill, NC, United States of America

Linberger Comprehensive Cancer Center

United States of America

Fredrick J. Miller

Department of Molecular Biology, University of Illinois at Chicago, Chicago,
Illinois, U.S.A.
