Preface

xiii

1. Oxygen and Nitrate Respiration in *Streptomyces coelicolor* A3(2) 1

R.G. Sawers, D. Falke, and M. Fischer

1. Introduction 2
2. General Aspects of Respiration 4
3. The Aerobic Respiratory Chain of *S. coelicolor* 8
4. Respiration with Nitrate 16
5. Respiratory Enzyme Complexes—An Outlook and Perspectives 30
- Acknowledgements 31
- References 32

2. Anaerobic Metabolism in *Haloferax* Genus: Denitrification as Case of Study 41

J. Torregrosa-Crespo, R.M. Martínez-Espinosa, J. Esclapez, V. Bautista,

C. Pire, M. Camacho, D.J. Richardson, and M.J. Bonete

1. Introduction 42
2. General Characteristics of the *Haloferax* Genus 44
3. Anaerobic Metabolism in the *Haloferax* Genus 48
4. Enzymes Involved in Anaerobic Metabolism in *Haloferax* Genus: Denitrification as Study of Case 52
5. Genes Coding for the Enzymes Sustaining Denitrification 63
6. Potential Uses of the Denitrification Carried Out by *Haloferax* in Biotechnology 71
7. Conclusions and Future Perspectives 76
- Acknowledgement 77
- References 77

3. Mechanisms of Bacterial Extracellular Electron Exchange 87

G.F. White, M.J. Edwards, L. Gomez-Perez, D.J. Richardson,

J.N. Butt, and T.A. Clarke

1. Introduction 88
2. Diversity of Microbe–Mineral Metabolism 89
3. Biological Electron Transport Across the Cell Envelope 98

4. Structures at the Interface of Microbe–Mineral Interaction	110
5. Summary of Electron Transport Models Across the Outer Membrane	121
6. Future Perspectives	128
Acknowledgements	129
References	129
4. Cooperation of Secondary Transporters and Sensor Kinases in Transmembrane Signalling: The DctA/DcuS and DcuB/DcuS Sensor Complexes of <i>Escherichia coli</i>	139
G. Uden, S. Wörner, and C. Monzel	
1. Transporters as Coregulators of Sensor Kinases	142
2. Polar Localization of DcuS and of the DcuS/DctA Sensor Complex	146
3. DcuS as Membrane-Bound Sensor Kinase for Transmembrane Signalling	148
4. The DctA/DcuS (or DcuB/DcuS) Sensor Complexes and Their Role for DcuS Function	153
Acknowledgements	162
References	162
5. Pivotal Role of Iron in the Regulation of Cyanobacterial Electron Transport	169
A. González, E. Sevilla, M.T. Bes, M.L. Peleato, and M.F. Fillat	
1. Introduction	170
2. A Survey of Different Roles of Iron-Containing Proteins in the Photosynthetic Process	172
3. Control of Iron Homeostasis in Cyanobacteria	179
4. Iron-Responsive Proteins and Photosystem Performance	181
5. Iron-Dependent Proteins Involved in Nitrogen Metabolism: Roles and Regulation	189
6. Relationship Between Iron and Respiratory Electron Transport in Cyanobacteria	194
7. Iron-Regulated RNAs Related to the Control of Cyanobacterial Electron Transport	196
8. Insights into the Mechanisms of Genetic Regulation of Cyanobacterial Electron Transport Operated by FurA	198
Acknowledgements	205
References	205
6. Bacterial Electron Transfer Chains Primed by Proteomics	219
H.J.C.T. Wessels, N.M. de Almeida, B. Kartal, and J.T. Keltjens	
1. Introduction	221
2. Methodology of Proteomics	224

3. Bacterial Electron Transfer Chains and Their Regulation: Global Approaches	252
4. Respiratory Protein Complexes in Assembly	276
5. Assemblages of Respiratory Protein Complexes	302
6. Perspectives	313
Acknowledgements	315
References	315
7. Nitrous Oxide Metabolism in Nitrate-Reducing Bacteria: Physiology and Regulatory Mechanisms	353
M.J. Torres, J. Simon, G. Rowley, E.J. Bedmar, D.J. Richardson, A.J. Gates, and M.J. Delgado	
1. Introduction	355
2. N ₂ O Metabolism in Nitrate-Ammonifying Bacteria	359
3. N ₂ O Metabolism in Denitrifying Bacteria	378
4. <i>B. japonicum</i> as a Model of Legume-Associated Rhizobial Denitrifiers	398
5. NO and N ₂ O Metabolism in Other Rhizobia-Legume Symbiosis	406
6. Conclusions	411
Acknowledgements	414
References	414
8. The Model [NiFe]-Hydrogenases of <i>Escherichia coli</i>	433
F. Sargent	
1. Introduction	434
2. [NiFe]-Hydrogenase-1: An O ₂ -Tolerant Paradigm	436
3. [NiFe]-Hydrogenase-2: A Bidirectional Redox Valve	446
4. [NiFe]-Hydrogenase-3: A Central Component of Formate Hydrogenlyase	452
5. [NiFe]-Hydrogenase-4: Fossil or Functional?	465
6. Biosynthesis of Hydrogenases	469
7. Concluding Remarks	491
Acknowledgements	492
References	492
Author Index	509
Subject Index	567
