Preface

xvii

Part I

Chromatin Structure and Histones

1. In Vitro Chromatin Assembly: Strategies and Quality Control 3

U. Muthurajan, F. Mattioli, S. Bergeron, K. Zhou, Y. Gu,

S. Chakravarthy, P. Dyer, T. Irving, and K. Luger

1. Introduction 4
2. Chromatin Reconstitution Strategies 7
3. Quality Control Strategies for In Vitro Reconstituted Chromatin 16
4. Summary and Conclusion 36
- References 38

2. Preparation, Crystallization, and Structure Determination of Chromatin Enzyme/Nucleosome Complexes 43

R.K. McGinty, R.D. Makde, and S. Tan

1. Introduction 44
2. Prepare Nucleosome Core Particles 44
3. Prepare Chromatin Protein 47
4. Purify Chromatin Complex 47
5. Concentrate Chromatin Complex 54
6. Crystallize Chromatin Complex 56
7. Postcrystallization Soaks to Improve Diffraction 61
- References 63

3. Preparation of Recombinant Centromeric Nucleosomes and Formation of Complexes with Nonhistone Centromere Proteins 67

N. Sekulic and B.E. Black

1. Introduction 68
2. Preparation of Histones for CENP-A Nucleosome Assembly 69
3. Preparation of DNA for CENP-A Nucleosome Assembly 79
4. CENP-A Nucleosome Assembly 84
5. Complex of CENP-A Nucleosome with CENP-C 90

v

Acknowledgments	95
References	95
4. Functional Characterization of Histone Chaperones Using SNAP-Tag-Based Imaging to Assess De Novo Histone Deposition	97
C. Clément, I. Vassias, D. Ray-Gallet, and G. Almouzni	
1. Introduction	98
2. The SNAP-Tag System to Visualize in vivo New Histone Incorporation into Chromatin: A De Novo Histone Deposition Assay in Cells	100
3. De Novo Histone Deposition Assay Coupled with Histone Chaperone Depletion and Labeling of Replicating Cells	106
4. De Novo Histone Deposition Assay Coupled with Histone Chaperone Depletion in Response to UV-DNA Damage	108
5. Imaging and Quantifying SNAP Labeling	111
6. Interpreting the De Novo Histone Deposition Assay Coupled with Histone Chaperone Depletion	113
7. Conclusion and Perspectives	113
Acknowledgments	115
References	115
5. Analysis of Nucleosome Sliding by ATP-Dependent Chromatin Remodeling Enzymes	119
C.Y. Zhou and G.J. Narlikar	
1. Introduction	119
2. Reconstituting Nucleosomes for FRET-Based Method	121
3. ATP-Dependent Chromatin Remodeling Assays	128
4. Data Analysis	134
5. Adaptation to Other Types of Remodeling Reactions	134
Acknowledgments	134
References	135
Part II	
Posttranslational Histone Modification Enzymes and Complexes	
6. In Vitro Activity Assays for MYST Histone Acetyltransferases and Adaptation for High-Throughput Inhibitor Screening	139
C.E. McCullough and R. Marmorstein	
1. Introduction	140

2. Preparation of Recombinant MYST Proteins	142
3. Kinetic Analysis	144
4. Thermofluor Assay to Investigate Cofactor and Inhibitor Binding	147
5. Inhibitor Screening	149
6. Prospects and Conclusions	157
Acknowledgments	158
References	158
7. Preparation and Biochemical Analysis of Classical Histone Deacetylases	161
A. Villagra, E. Sahakian, and E. Seto	
1. Introduction	162
2. Generation of HDAC Stable Cell Lines Using Lentivirus	164
3. Conventional HDAC Activity Assay	167
4. Assessment of Selective Inhibition of HDACs Using HDAC Knockout Cells	169
5. HDAC Chromatin Immunoprecipitation Assay	174
6. Identification of Specific HDAC Substrates	179
Acknowledgments	180
References	180
8. Recombinant Preparation, Biochemical Analysis, and Structure Determination of Sirtuin Family Histone/Protein Deacylases	183
B. Suenkel and C. Steegborn	
1. Sirtuins—Evolutionary Conserved Epigenetic Regulators	184
2. Recombinant Sirtuin Preparation—Constructs and Expression Systems	188
3. Purification of a Mammalian Sirtuin Recombinantly Expressed in <i>E. coli</i>	189
4. Biochemical Characterizations Using Purified, Recombinant Sirtuins	198
Acknowledgments	205
References	205
9. Preparation, Biochemical Analysis, and Structure Determination of SET Domain Histone Methyltransferases	209
E. Bergamin and J.F. Couture	
1. Introduction	210
2. Experimental Procedures	218
3. Conclusions	231
Acknowledgments	231
References	232

10. Expression, Purification, and Biochemical Analysis of the LSD1/KDM1A Histone Demethylase	241
B. Laurent and Y. Shi	
1. Introduction	242
2. Expression and Purification of LSD1 Proteins	245
3. In Vitro Enzymatic Assays	251
4. Analysis of LSD1 Demethylase Activity	253
Acknowledgments	257
References	258
11. LSD1 Histone Demethylase Assays and Inhibition	261
D. Hayward and P.A. Cole	
1. Introduction and Background	262
2. LSD1 Assays	264
3. Inhibitors of LSD1	268
4. Applications of LSD1 Inhibitors	272
5. Summary and Future Directions	274
Acknowledgments	275
References	275
12. Purification, Biochemical Analysis, and Structure Determination of JmjC Lysine Demethylases	279
S. Krishnan and R.C. Trievel	
1. Introduction	280
2. Purification	282
3. KDM Assay Methodology	287
4. Structure Determination of JmjC KDMs	293
5. Summary and Future Perspectives	295
Acknowledgment	296
References	296
13. Preparation and Analysis of Native Chromatin-Modifying Complexes	303
Y. Doyon and J. Côté	
1. Introduction	304
2. Methods	305
3. Conclusion	317
Acknowledgments	317
References	318

Part III**Histone Modification Binders (Readers)****14. Preparation, Biochemical Analysis, and Structure****Determination of the Bromodomain, an Acetyl-Lysine Binding Domain****321**

C. Ren, L. Zeng, and M.-M. Zhou

1. Introduction 322
 2. General Equipment 324
 3. General Materials 324
 4. Preparation of BrDs 326
 5. Biochemical Analysis of BrDs 330
 6. Structural Determination of BrDs 334
 7. Conclusions and Perspectives 338
- Acknowledgments 340
- References 340

15. Preparation, Biochemical Analysis, and Structure**Determination of Methyllysine Readers****345**

C.A. Musselman and T.G. Kutateladze

1. Introduction 345
 2. Preparation of Methyllysine Readers 347
 3. Screening for Methyllysine Recognition 355
 4. Measuring Affinity for Methylated Substrate 356
 5. Analysis of Binding Using NMR Spectroscopy 358
 6. Structure Determination by X-ray Crystallography 360
- Acknowledgments 361
- References 361

Part IV**DNA Modifications and Nucleic Acid Regulators****16. Quantification of Oxidized 5-Methylcytosine Bases and TET****Enzyme Activity****365**

M.Y. Liu, J.E. DeNizio, and R.M. Kohli

1. Introduction 366
 2. Analysis of Cytosine Modifications *In Cellular DNA* 366
 3. Analysis of Cytosine Modifications *In Vitro* 373
- Acknowledgments 383
- References 383

17. Characterization of How DNA Modifications Affect DNA Binding by C2H2 Zinc Finger Proteins	387
A. Patel, H. Hashimoto, X. Zhang, and X. Cheng	
1. Introduction	387
2. Soluble Expression and Purification of ZnF Proteins	391
3. Fluorescence Polarization Assay for Analysis of DNA Binding	393
4. Crystallization of ZnF Proteins in Complex with DNA	396
Acknowledgments	397
References	398
18. Crystallographic Studies of Telomerase	403
H. Hoffman and E. Skordalakes	
1. Introduction	404
2. Crystal Structure Determination of the Catalytic Subunit of <i>Triebolium castaneum</i> Telomerase (tcTERT)	407
3. Crystal Structure Determination of a Partial Telomerase Elongation Complex	414
4. Conclusions	417
Acknowledgments	417
References	417
19. Detection and Analysis of Long Noncoding RNAs	421
F. Lai, E. Blumenthal, and R. Shiekhattar	
1. Introduction	422
2. Traditional Methods for lncRNA Detection	423
3. Genome-Wide Detection of lncRNAs Through Direct RNA Sequencing Approaches	423
4. Indirect Sequencing Methods Coupled with Transcription	428
5. Protein-Based Approaches for Genomic Characterization of lncRNAs	435
6. Future Directions and Conclusion	441
References	442
20. Identifying Centromeric RNAs Involved in Histone Dynamics In Vivo	445
D. Quénet, D. Sturgill, and Y. Dalal	
1. Introduction	446

2. Materials	446
3. Methods	450
Acknowledgments	464
References	464
Author Index	467
Subject Index	497
