Preface

xvii

1. Chemical Posttranslational Modification with Designed Rhodium(II) Catalysts

1

S.C. Martin, M.B. Minus, and Z.T. Ball

1. Introduction 2
2. Synthesis of Rhodium(II) Conjugates as Protein Modification Catalysts 4
3. Modification of an SH3 Domain and Gel-Based Visualization Thereof 11
- References 18

2. Cell-Binding Assays for Determining the Affinity of Protein-Protein Interactions: Technologies and Considerations

21

S.A. Hunter and J.R. Cochran

1. Introduction 22
2. General Binding Theory and Relevance of K_d 23
3. General Pitfalls in Cell-Based Binding Assays 25
4. Measuring Binding on the Surface of Yeast 30
5. Measuring Binding on the Surface of Mammalian Cells 35
6. Other Methods of Measuring Binding: Kinetic Exclusion Assay and Surface Plasmon Resonance 37
7. Summary 42
- Acknowledgments 42
- References 42

3. Protein and Antibody Engineering by Phage Display

45

J.C. Frei and J.R. Lai

1. Introduction 46
2. Equipment 48
3. Materials 50
4. Phage Display and Library Design 57
5. Library Production 66
6. Library Selections and Screening 73
- References 85

4. Incorporation of Unnatural Amino Acids into Proteins Expressed in Mammalian Cells	89
R. Serfling and I. Coin	
1. Introduction	90
2. Fluorescence Assay for Straightforward Evaluation of Uaa-Incorporating Systems	92
3. Incorporation of Uaas into Membrane Proteins	99
4. Conclusion	104
References	104
5. Method for Enzyme Design with Genetically Encoded Unnatural Amino Acids	109
C. Hu and J. Wang	
1. Introduction	110
2. The General Procedure for Enzyme Design with Unnatural Amino Acids	112
3. Unnatural Amino Acid Design	112
4. Synthetic Chemistry-Guided Unnatural Amino Acid Design	116
5. Synthetic Methods for Unnatural Amino Acids	117
6. Aminoacyl-tRNA Synthetase Screening	125
7. Protein Design	127
8. Protein Expression	128
9. Conclusion and Perspective	129
References	130
6. Methods for Solving Highly Symmetric De Novo Designed Metalloproteins: Crystallographic Examination of a Novel Three-Stranded Coiled-Coil Structure Containing D-Amino Acids	135
L. Ruckthong, J.A. Stuckey, and V.L. Pecoraro	
1. Introduction	136
2. Materials	140
3. Methods	141
Acknowledgments	146
References	146
7. SpyRings Declassified: A Blueprint for Using Isopeptide-Mediated Cyclization to Enhance Enzyme Thermal Resilience	149
C. Schoene, S.P. Bennett, and M. Howarth	
1. Introduction	150
2. Isopeptide-Mediated Enzyme Cyclization	151
3. Characterization of Enzyme Resilience After SpyRing Cyclization	159

4. Concluding Remarks	164
Acknowledgments	164
References	164
8. Engineering and Application of LOV2-Based Photoswitches	169
S.P. Zimmerman, B. Kuhlman, and H. Yumerefendi	
1. Introduction	170
2. Engineering LOV2-Based Photoswitches	171
3. Using LOV2-Based Photoswitches	181
4. Summary and Perspectives	188
References	188
9. Minimalist Design of Allosterically Regulated Protein Catalysts	191
O.V. Makhlynets and I.V. Korendovych	
1. Introduction	192
2. Methods	193
Acknowledgments	201
References	201
10. Combining Design and Selection to Create Novel Protein–Peptide Interactions	203
E.B. Speltz, N. Sawyer, and L. Regan	
1. Introduction	204
2. Structure-Guided Rational Design	206
3. Split Fluorescent Protein Assays for Identifying PPIs	207
4. Validation	216
5. Future Perspective: Modular Design of PPI	218
6. Conclusion	218
References	219
11. Metal-Directed Design of Supramolecular Protein Assemblies	223
J.B. Bailey, R.H. Subramanian, L.A. Churchfield, and F.A. Tezcan	
1. Introduction	224
2. Metal-Directed Protein Self-Assembly	227
3. Metal-Templated Interface Redesign	231
4. Methods	237
5. Conclusion	247
Acknowledgments	247
References	247

12. Designing Fluorinated Proteins	251
E.N.G. Marsh	
1. Introduction	252
2. Methods	265
Acknowledgments	272
References	272
13. Solid Phase Synthesis of Helically Folded Aromatic Oligoamides	279
S.J. Dawson, X. Hu, S. Claerhout, and I. Huc	
1. Introduction	280
2. Materials	285
3. Synthetic Protocols	286
4. Characterization of Foldamers	297
References	299
14. Conformational Restriction of Peptides Using Dithiol Bis-Alkylation	303
L. Peraro, T.R. Siegert, and J.A. Kritzer	
1. Introduction	304
2. Using Thiol Alkylation to Constrain Peptides	309
3. Protocols for Peptide Synthesis and Cross-Linking	312
4. Applications, Tips, and Troubleshooting	316
5. Future Directions	327
References	327
15. Engineering Short Preorganized Peptide Sequences for Metal Ion Coordination: Copper(II) a Case Study	333
L.M.P. Lima and O. Iranzo	
1. Introduction	334
2. Design of Preorganized Peptidic Scaffolds for Metal Ion Coordination	340
3. Synthesis and Characterization of the Peptidic Scaffolds	341
4. Preparation of Analytical Stock Solutions	345
5. Study of the Metal Ion Coordination Properties	349
6. Concluding Remarks	360
Acknowledgments	360
References	361

16. De Novo Construction of Redox Active Proteins	365
C.C. Moser, M.M. Sheehan, N.M. Ennist, G. Kodali, C. Bialas, M.T. Englander, B.M. Discher, and P.L. Dutton	
1. Introduction	366
2. Sequence Selection: Binary Patterning	367
3. Sequence Selection: Cofactor Self-Assembly	370
4. Binding Heme Redox Cofactors	371
5. Electron-Transfer Reactions of Heme Maquettes	374
6. Binding Light-Activated Zn Tetrapyrrole Cofactors	377
7. Iron-Sulfur Cluster Cofactors	378
8. Redox Metal Binding Sites	379
9. Flavín Cofactor Binding and Electron Transfer	380
10. Translating Aqueous Redox Maquette Designs into Membranes	382
References	384
17. Design Strategies for Redox Active Metalloenzymes: Applications in Hydrogen Production	389
R. Alcalá-Torano, D.J. Sommer, Z. Bahrami Dizicheh, and G. Ghirlanda	
1. Introduction	390
2. Design of FeS Clusters	392
3. Design of [FeFe]-Hydrogenase Mimics	399
4. Design of Porphyrin Redox Sites	404
5. Conclusion and Future Outlook	409
References	411
18. Equilibrium Studies of Designed Metalloproteins	417
B.R. Gibney	
1. Introduction	418
2. Metalloprotein Thermodynamics	419
3. Essential Equilibrium Measurements	426
4. Thermodynamic Analysis of a Heme Binding Four Helix Bundle, $[\Delta 7\text{-His}]_2$	430
5. Experimental Procedures	435
6. Summary	436
Acknowledgment	437
References	437

19. Reconstitution of Heme Enzymes with Artificial Metalloporphyrinoids	439
K. Oohora and T. Hayashi	
1. Introduction	440
2. Design and Synthesis of Artificial Metalloporphyrinoids	442
3. Reconstitution of Hemoproteins	446
4. Representative Characteristics of Reconstituted Hemoproteins	451
Acknowledgments	453
References	453
20. Creation of a Thermally Tolerant Peroxidase	455
Y. Watanabe and H. Nakajima	
1. Introduction	456
2. Molecular Design for Cyt c_{552} to Acquire Peroxidase Activity	458
3. Gene Constructs of Recombinant Wild Type and Mutant Cyt c_{552}	459
4. Expression and Purification of the Recombinant Proteins	460
5. Thermal Stability of the Cyt c_{552} Mutants	461
6. Analysis of a Key Intermediate in the Peroxidase Reaction of Cyt c_{552} V49D/M69A Mutant	462
7. Effect of Trp45 on the Active Intermediate of Mutants	465
References	468
21. Designing Covalently Linked Heterodimeric Four-Helix Bundles	471
M. Chino, L. Leone, O. Maglio, and A. Lombardi	
1. Introduction	472
2. Selection of the Best Docking Hotspot Given a Predefined Anchor Bolt	477
3. Broadening the Hotspot and Linker Selections	486
4. Concluding Remarks	493
Acknowledgments	494
References	495
22. Design of Heteronuclear Metalloenzymes	501
A. Bhagi-Damodaran, P. Hosseinzadeh, E. Mirts, J. Reed, I.D. Petrik, and Y. Lu	
1. Step 1: Computational Design of Heteronuclear Metal-Binding Sites in Mb or CcP	505
2. Step 2: Purification and Structural Characterization of Rationally Designed Proteins	513
3. Step 3: Functional Characterization of Designed Heterobinuclear Metalloenzymes	518

4. Step 4: Further Improvement of Designed Heteronuclear Metalloenzymes: Case Studies	527
5. Conclusions	529
Acknowledgments	529
References	529
23. Periplasmic Screening for Artificial Metalloenzymes	539
M. Jeschek, S. Panke, and T.R. Ward	
1. Introduction	540
2. Anchoring Strategies	541
3. Increasing the Throughput	543
4. Advantages of Periplasmic Screening	544
5. Periplasmic Screening for ArMs	546
6. Summary	553
References	554
24. De Novo Designed Imaging Agents Based on Lanthanide Peptides Complexes	557
A.F.A. Peacock	
1. Introduction	558
2. Lanthanide Coordination Chemistry	558
3. Lanthanide Imaging Agents	558
4. Lanthanide Peptides and Proteins	560
5. Strategies for Designing CCs for Lanthanide Coordination	562
6. Conclusions and Perspectives	576
Acknowledgments	576
References	577
25. Peptide Binding for Bio-Based Nanomaterials	581
N.M. Bedford, C.J. Munro, and M.R. Knecht	
1. Introduction	582
2. Materials	585
3. Methods	587
4. Conclusions	596
Acknowledgments	596
References	596
