Preface

xv

1. How to Measure Load-Dependent Kinetics of Individual Motor Molecules Without a Force-Clamp **1**

J. Sung, K.I. Mortensen, J.A. Spudich, and H. Flyvbjerg

- 1. Introduction 2
- 2. HFS: Basic Concept 4
- 3. Experimental Setup 8
- 4. Sample Preparations: Proteins, Reagents, and Buffers 9
- 5. Experimental Protocols 12
- 6. Trap Calibration 19
- 7. HFS: Theory and Data Analysis 21
- 8. Results and Discussion 26
- 9. Conclusion and Outlook 27
- Acknowledgments 27
- References 28

2. Studying the Mechanochemistry of Processive Cytoskeletal Motors With an Optical Trap **31**

V. Belyy and A. Yildiz

- 1. Introduction 32
- 2. Experimental Setup and Troubleshooting 38
- 3. Experimental Protocols 41
- 4. Conclusion 51
- Acknowledgments 52
- References 52

3. Single-Molecule Optical-Trapping Techniques to Study Molecular Mechanisms of a Replisome **55**

B. Sun and M.D. Wang

- 1. Introduction 56
- 2. Instrument Design, Experimental Configuration, and Sample Preparation 57
- 3. Molecular Mechanisms of Individual Proteins in the Replisome Revealed by Optical-Trapping Techniques 61

4. Single-Molecule Studies of the Response of a Replisome to DNA Damage	69
5. Data Analysis	74
6. Unique Features of the Bacteriophage T7 Replisome Revealed by Single-Molecule Optical-Trapping Techniques	79
7. Conclusions	81
Acknowledgments	81
References	81
4. Recent Advances in Biological Single-Molecule Applications of Optical Tweezers and Fluorescence Microscopy	85
M. Hashemi Shabestari, A.E.C. Meijering, W.H. Roos, G.J.L. Wuite, and E.J.G. Peterman	
1. Introduction	86
2. Instrumentation	88
3. Applications	95
4. Experimental Protocol	111
5. Conclusion	113
Acknowledgments	114
References	114
5. Direct Visualization of Helicase Dynamics Using Fluorescence Localization and Optical Trapping	121
C.-T. Lin and T. Ha	
1. Introduction	122
2. Materials	123
3. Methods	125
Acknowledgments	135
References	135
6. High-Resolution Optical Tweezers Combined With Single-Molecule Confocal Microscopy	137
K.D. Whitley, M.J. Comstock, and Y.R. Chemla	
1. Introduction	138
2. Optical Trapping and Single-Molecule Fluorescence	140
3. Instrument Design	143
4. Instrument Alignment	152
5. Combined Optical Trap/smFRET Assay	157
Acknowledgments	167
References	167

7. Integrating Optical Tweezers, DNA Tightropes, and Single-Molecule Fluorescence Imaging: Pitfalls and Traps	171
J. Wang, J.T. Barnett, M.R. Pollard, and N.M. Kad	
1. Introduction	172
2. Elongating Bundled DNA for Imaging	173
3. Integrating Laser Tweezers Into Biological Experiments	175
4. Controlling and Detecting the Nanoprobe	178
5. Applying the Nanoprobe to Biological Study Systems	186
6. Conclusions and Outlook	189
References	189
8. Single-Stranded DNA Curtains for Studying Homologous Recombination	193
C.J. Ma, J.B. Steinfeld, and E.C. Greene	
1. Introduction	194
2. Methods	198
3. Applications	210
4. Data Collection and Analysis	213
5. Conclusion and Future Directions	216
Acknowledgments	216
References	217
9. Inserting Extrahelical Structures into Long DNA Substrates for Single-Molecule Studies of DNA Mismatch Repair	221
M.W. Brown, A. de la Torre, and I.J. Finkelstein	
1. Introduction	222
2. Materials	223
3. Methods	226
4. Notes	236
Acknowledgments	237
References	237
10. Single-Molecule Insight Into Target Recognition by CRISPR-Cas Complexes	239
M. Rutkauskas, A. Krivoy, M. Szczelkun, C. Rouillon, and R. Seidel	
1. Introduction	240
2. Single-Molecule Magnetic Tweezers Experiments: Technical Aspects	245
3. Studying CRISPR-Cas Systems of <i>Streptococcus thermophilus</i>	251
4. Studying <i>E. coli</i> Cascade	263

5. Perspectives and Conclusion	265
Acknowledgments	269
References	269
11. Preparation of DNA Substrates and Functionalized Glass Surfaces for Correlative Nanomanipulation and Colocalization (NanoCOSM) of Single Molecules	275
C. Duboc, J. Fan, E.T. Graves, and T.R. Strick	
1. Introduction	276
2. Combining Single-Molecule Nanomanipulation and Fluorescence	278
3. Designing DNA Substrates	280
4. Overview of Experimental System	281
5. Streptavidin-Derivatized PEGylated Glass Surfaces	282
6. Antidigoxigenin-Derivatized Polystyrene-Coated Glass Surfaces	286
7. Preparation of DNA	287
8. Preparation of Antidigoxigenin-Functionalized Magnetic Beads	291
9. Assembly of Bead-DNA System and Loading of Reaction Chamber	292
10. General Considerations for Buffer Preparation	293
11. Conclusions and Perspectives	294
Acknowledgments	294
References	294
12. Measuring Force-Induced Dissociation Kinetics of Protein Complexes Using Single-Molecule Atomic Force Microscopy	297
K. Manibog, C.F. Yen, and S. Sivasankar	
1. Introduction	298
2. Models for the Mechanical Response of Receptor-Ligand Bonds	299
3. Measuring <i>in vitro</i> Force-Dependent Kinetics With an AFM	301
4. Using AFM Force Measurements to Characterize <i>In vivo</i> Unbinding Kinetics	310
5. Limitations of Current Technologies and Future Directions	314
Acknowledgments	316
References	316
13. Improved Force Spectroscopy Using Focused-Ion-Beam-Modified Cantilevers	321
J.K. Faulk, D.T. Edwards, M.S. Bull, and T.T. Perkins	
1. Introduction	322
2. Overview of Modification Process	327

3. Methods and Protocols	329
4. Improved Performance of FIB-Modified Cantilevers	347
5. Conclusions	349
Acknowledgments	349
References	350
14. Single-Molecule Characterization of DNA-Protein Interactions Using Nanopore Biosensors	353
A.H. Squires, T. Gilboa, C. Torfstein, N. Varongchayakul, and A. Meller	
1. Introduction	354
2. The Basic Properties of Nanopore Translocation Measurements	358
3. Methods for Nanopore Fabrication and Assembly	360
4. Nanopores for Mapping the Binding Sites of Proteins Along Nucleic Acids	364
5. Nanopore Force Spectroscopy	371
6. Conclusions	379
Acknowledgments	380
References	381
15. Subangstrom Measurements of Enzyme Function Using a Biological Nanopore, SPRNT	387
A.H. Laszlo, I.M. Derrington, and J.H. Gundlach	
1. Why Are High-Resolution Real-Time Measurements on Enzymes Interesting?	388
2. Introduction to SPRNT	389
3. Nanopore Measurements	389
4. Nanopore Measurements Turned Into SPRNT	397
5. Application of SPRNT: Helicase Hel308	399
6. Capabilities of SPRNT	403
7. Comparison to Other Single-Molecule Techniques	406
8. Outlook	410
9. Summary	411
Acknowledgments	412
References	412
16. Multiplexed, Tethered Particle Microscopy for Studies of DNA-Enzyme Dynamics	415
S. Ucuncuoglu, D.A. Schneider, E.R. Weeks, D. Dunlap, and L. Finzi	
1. Introduction	416

2. Materials and Methods	417
3. Summary	433
Acknowledgments	434
References	434
Author Index	437
Subject Index	459
