

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. A High-Throughput Fluorometric Assay for Lipid-Protein Binding	1
W. Cho, Y. Hu, K. Baek, and H. Kim	
1. Introduction	2
2. Fluorescence Quenching Assay	4
3. Data Analysis	13
Acknowledgments	15
References	16
2. Fluorescence-Based <i>In Situ</i> Quantitative Imaging for Cellular Lipids	19
W. Cho, Y. Yoon, S.-L. Liu, K. Baek, and R. Sheng	
1. Introduction	20
2. Preparation of Tunable Orthogonal Lipid Sensors	22
3. <i>In Situ</i> Quantification of Cellular Lipids	28
4. Summary	31
Acknowledgments	32
References	32
3. Preparation of the Full Set of Recombinant Mouse- and Human-Secreted Phospholipases A₂	35
F. Ghomashchi, V. Brglez, C. Payré, L. Jeammet, S. Bezzine, M.H. Gelb, and G. Lambeau	
1. Introduction	36
2. Strategies for Production of Recombinant sPLA ₂ s	39
3. Growth of Bacteria	43
4. Isolation of Inclusion Body	44
5. Preparation of Sulfonated Protein	44
6. Preparation of hGIB	45
7. Preparation of mGIB	46
8. Preparation of hGIIA	47
9. Preparation of mGIIA	48
10. Preparation of mGIIC	49

11. Preparation of hGIID	50
12. Preparation of mGIID	51
13. Preparation of hGII E	52
14. Preparation of mGII E	52
15. Preparation of hGIIF	53
16. Preparation of mGIIF	55
17. Preparation of hGIII sPLA ₂ Domain	55
18. Preparation of mGIII sPLA ₂ Domain	57
19. Preparation of hGV	58
20. Preparation of mGV	59
21. Preparation of hGX	60
22. Preparation of mGX	61
23. Preparation of hGXIIA	61
24. Preparation of mGXIIA, hGXII B, and mGXII B	62
25. Quality Control and Characterization of Refolded sPLA ₂ s by Mass Spectrometry	63
26. Enzymatic Assays	64
References	67
4. Cellular Assays for Evaluating Calcium-Dependent Translocation of cPLA₂α to Membrane	71
B. Yun and C.C. Leslie	
1. Introduction	72
2. Constructs, Cell Types, and Transfection Protocols	76
3. Protocols to Study the Role of Calcium in Regulating the Translocation of FP-cPLA ₂ α and FP-C2 Domain	81
4. Protocol for Correlating Translocation of FP-cPLA ₂ α and Arachidonic Acid Release	92
Acknowledgment	94
References	94
5. Secreted Phospholipase A₂ Specificity on Natural Membrane Phospholipids	101
K. Yamamoto, Y. Miki, H. Sato, R. Murase, Y. Taketomi, and M. Murakami	
1. Introduction	102
2. Key Factors Determining the Substrate Specificity of sPLA ₂ s <i>In Vivo</i>	103
3. Methodologies of Lipidomics Analysis	105
4. Examples for Determination of the sPLA ₂ -Intrinsic Lipid Pathways	110
5. Concluding Remarks	115

Acknowledgments	116
References	116
6. Analyses of Calcium-Independent Phospholipase A₂beta (iPLA₂β) in Biological Systems	119
S.E. Barbour and S. Ramanadham	
1. Introduction	120
2. Experimental Procedures	121
3. Summary	137
Acknowledgments	138
References	138
7. Using Hydrogen–Deuterium Exchange Mass Spectrometry to Examine Protein–Membrane Interactions	143
O. Vadas, M.L. Jenkins, G.L. Dornan, and J.E. Burke	
1. Introduction	144
2. Mechanism of Hydrogen Exchange	147
3. Hydrogen–Deuterium Exchange to Study Protein–Membrane Interactions	149
4. Experimental Considerations for HDX-MS Membrane Experiments	155
5. Case Study of a Protein–Membrane HDX-MS SETUP experiment: PI3Kδ	164
6. Conclusions	166
Acknowledgments	166
References	166
8. Reversible Chemical Dimerization by rCD1	173
M. Schifferer, S. Feng, F. Stein, and C. Schultz	
1. Introduction	174
2. Methods	179
3. Limitations	189
4. Perspectives	192
Acknowledgments	193
References	193
9. Interfacial Enzymes: Membrane Binding, Orientation, Membrane Insertion, and Activity	197
S.A. Tatulian	
1. Introduction	198
2. Methods	201

3. Strengths and Limitations	223
4. Conclusions	225
References	226
10. Measuring Diacylglycerol Kinase-θ Activity and Binding	231
B. Tu-Sekine and D.M. Raben	
1. Theory	232
2. Equipment	234
3. Materials	234
4. Solutions and Buffers	235
5. Estimated Duration	235
6. DGK θ Activity Assay	236
7. Surface Dilution Experiment: Determining the K_d^{app} , K_{MS}^{app} and V_{MAX}^{app} of DGK θ	241
8. Vesicle Pulldown to Determine Interfacial K_d	243
9. Tips for Nonspecialists	245
References	252
11. Studying Gastric Lipase Adsorption Onto Phospholipid Monolayers by Surface Tensiometry, Ellipsometry, and Atomic Force Microscopy	255
A. Bénarouche, L. Sams, C. Bourlieu, V. Vié, V. Point, J.F. Cavalier, and F. Carrière	
1. Introduction	256
2. Study of pH-Dependent Adsorption of Gastric Lipase Onto Phospholipid Monolayers Using Surface Tensiometry	259
3. Study of Gastric Lipase Adsorption Using Ellipsometry	268
4. Study of Gastric Lipase Adsorption by AFM	270
5. Conclusions	275
References	276
12. Probing Conformational Changes and Interfacial Recognition Site of Lipases With Surfactants and Inhibitors	279
E. Mateos-Díaz, S. Amara, A. Roussel, S. Longhi, C. Cambillau, and F. Carrière	
1. Introduction	280
2. Effects of Surfactants on Lipase Inhibition	282
3. X-Ray Crystallography for Studying Lipase Structures, Conformational Changes, and IRSs	284
4. Probing Lipase Lid Opening by SDSL and EPR Spectroscopy	295
5. Conclusions	302

Acknowledgment	303
References	303
13. Measuring Phospholipase D Enzymatic Activity Through Biochemical and Imaging Methods	309
F. Philip, E.E. Ha, M.A. Seeliger, and M.A. Frohman	
1. Introduction	310
2. Methods	312
3. Fluorescent-Based PLD Activity Assays	319
4. Summary	322
Acknowledgments	322
References	322
14. PLD Protein-Protein Interactions With Signaling Molecules and Modulation by PA	327
J. Gomez-Cambronero, A.J. Morris, and K.M. Henkels	
1. Introduction	328
2. PLD2 and RAC2 Protein-Protein Interaction and the Effect of PA	329
3. Protocol	330
4. Conclusions and Outlook	351
Acknowledgments	353
References	353
15. Analysis of Phosphatidic Acid Binding and Regulation of PIPKI <i>In Vitro</i> and in Intact Cells	359
L.W.R. Tay, Z. Wang, and G. Du	
1. Introduction	360
2. Bacterial Expression and Purification of PIPKI γ	361
3. Determination of the Direct Binding Between PA and PIPKI γ Using A Liposome Pulldown Assay	363
4. Measurement of PA-Stimulated PIPKI γ Activity Using Liposomes	366
5. Assessment of Actin Cytoskeletal Reorganization Induced by PIPKI γ Overexpression	369
6. Summary	371
Acknowledgments	372
References	372
