Acknowledgments	ix	5. Feline Electrocardiography	31
1. Electrocardiography in Preclinical Safety	1	Introduction	31
Introduction	1	Etiology, Pathophysiology, and Gross Pathology	31
Regulatory Guidance Versus Good Science Versus		Rhythm Diagnosis	31
Rationale Drug Development	1	6. Canine Electrocardiography	39
Safety Pharmacology Versus Toxicology	3	Introduction	39
Safety Pharmacology Studies: Core-Battery and		Etiology, Pathophysiology, and Gross Pathology	39
Second-Tier Testing for Cardiotoxicity	4	Rhythm Diagnosis	39
Why Study Electrocardiography Preclinically?	4	7. Handling and Restraint of Nonhuman	
Typical Cardiovascular Safety Pharmacology Designs	5	Primates	53
Cardiotoxicity Endpoints in Toxicology	7	Cynomolgus and Rhesus	53
Regarding ECGs	7	Machine Setup and Configuration	54
Serum Enzymes	7	Lead Placement	54
Postmortem Evaluations	8	Obtaining the Tracing	55
The ECG and Drug Safety	8	Chemical Restraint	55
2. Fundamental Principles of	11	Tracing Handling and Storage	55
Electrocardiography		8. Electrocardiography of Nonhuman	
ECG in Toxicology Studies	11	Primates	57
Recording the ECG	13	Fundamental Principles of Electrocardiography	57
Evaluation of the ECG	13	Electrocardiography of Cynomolgus and Rhesus	
Transmembrane Action Potentials	15	Monkeys	58
Evaluation of Waveforms	15	Cardiac Arrhythmias	59
Mean Electrical Axis	18	Electrocardiography of Chimpanzees	68
Equipment Considerations	18	9. Electrocardiography of Neonates/	
Cardiac Effects of Systemic Potassium and Calcium—	18	Juveniles	73
Abnormalities		Normal Electrocardiogram of Neonatal	
3. Electrocardiography of Rodents	21	Minipigs	73
Electrocardiography of Mice	21	Normal Variants	73
Normal Electrocardiogram of Mice	21	Normal Ranges of Commonly Measured Parameters in	
Normal Ranges of Commonly Measured Parameters in		Neonatal Minipigs	73
Mice	21	Normal Electrocardiogram of Juvenile Dogs	74
Electrocardiography of Rats	22	Normal Variants	74
Normal Electrocardiogram of the Rat	22	Normal Ranges of Commonly Measured Parameters in	
Normal Ranges of Commonly Measured Parameters in		Juvenile Beagles	74
Rats	22	10. Electrocardiography of Minipigs	77
ECG Abnormality Examples in Rats	22	Normal Values	77
4. Electrocardiography of Rabbits	29	Normal Variants in Order of Occurrence	
Normal Electrocardiogram of Rabbits	29	(Commonality)	77
Normal Variants	29		
Abnormalities	29		

Lead Placement	77	12. PR (PQ), QRS, QT, and Other Issues	89
Fundamental Principles of Electrocardiography	77	The PR (PQ) Interval	89
Electrocardiography of Minipigs (<i>Sus scrofa</i>)	78	QRS Complex Duration	89
Cardiac Arrhythmias	79	QT Interval Duration	89
SA Arrhythmias	80	13. Blood Pressure	91
Abnormalities of Impulse Conduction	84	14. Self-Assessment	95
Bundle Branch Blocks	85	References	103
11. Telemetry in Preclinical Safety Studies	87	Index	107
Safety Pharmacology Study Design Examples	87
