PART I INTRODUCTION

CHAPTER 1	<i>Staphylococcus aureus</i>—A Foodborne Pathogen: Epidemiology, Detection, Characterization, Prevention, and Control: An Overview	3
DELIA GRACE AND ALEXANDRA FETSCH		
1.	Introduction	3
2.	<i>Staphylococcus aureus</i> —A Brief Overview	3
3.	<i>Staphylococcus aureus</i> as Foodborne Pathogen—The Industrialized World Perspective	5
4.	<i>Staphylococcus aureus</i> as Foodborne Pathogen—The Perspective From the Developing World	6
5.	<i>Staphylococcus aureus</i> —A Foodborne Pathogen: Epidemiology, Detection, Characterization, Prevention, and Control—What the Book Is About	6
6.	Summary and Conclusion	7
	References	8

PART II CHARACTERISTICS AND DETECTION OF *STAPHYLOCOCCUS AUREUS*

CHAPTER 2	Pathogenesis of <i>Staphylococcus aureus</i>	13
KARSTEN BECKER		
1.	Introduction	13
2.	Impact on Health	13
2.1	Colonization and Its Clinical Impact	14
2.2	Clinical Syndromes	15
3.	Genetic Basis for Virulence	15
3.1	<i>Staphylococcus aureus</i> Phages	16
3.2	<i>Staphylococcus aureus</i> Pathogenicity Islands	17
4.	Regulatory Systems	17
4.1	Global Regulators	17
5.	Adhesion	19
5.1	Cell Wall—Anchored Proteins	19
5.2	Extracellular Sugar-Based Polymers	21

6. Bacterial Interference	21
7. Aggressive Potential: Toxins	22
7.1 Pore-Forming Protein Toxins (Membrane-Damaging Toxins)	22
7.2 Superantigens and Other Nonmembrane-Damaging Toxins That Interfere With Receptor Function	23
7.3 Enzymatic Acting Toxins	23
8. Evasion: Blocking and Escaping the Host's Immune Response	24
8.1 Resisting Phagocytic Activity	24
8.2 Internalization/Invasion and Intracellular Persistence	25
9. Conclusion and Perspective	26
References	26
CHAPTER 3 <i>Staphylococcus aureus</i> Enterotoxins	39
DONG-LIANG HU, LIZHE WANG, RENDONG FANG, MASASHI OKAMURA AND HISAYA K. ONO	
1. Introduction	39
2. Superfamily of Staphylococcal Enterotoxins and Staphylococcal Enterotoxin-Like Toxins	39
3. Gene Locations of Staphylococcal Enterotoxins and Staphylococcal Enterotoxin-Like Toxins	41
3.1 <i>Staphylococcus aureus</i> Pathogenicity Islands	41
3.2 Genomic Islands (vSa)	43
3.3 Enterotoxin Gene Cluster	43
3.4 Staphylococcal Cassette Chromosome	43
3.5 Prophage	43
3.6 Plasmid	44
4. Molecular Structures of Staphylococcal Enterotoxins and Staphylococcal Enterotoxin-Like Toxins	44
5. Superantigenic Activity of Staphylococcal Enterotoxins and Staphylococcal Enterotoxin-Like Toxins	47
6. Biological Characteristics and Emetic Activity of Staphylococcal Enterotoxins and Staphylococcal Enterotoxin-Like Toxins	49
7. Conclusion	50
References	50
CHAPTER 4 Antimicrobial Resistance Properties of <i>Staphylococcus aureus</i>	57
ANDREA T. FEBLER, JUN LI, KRISTINA KADLEC, YANG WANG AND STEFAN SCHWARZ	
1. Introduction	57
2. β -Lactam Resistance	57
3. Tetracycline Resistance	63

4. Phenicol Resistance.....	64
5. Macrolide–Lincosamide–Streptogramin Resistance.....	64
5.1 Combined Resistance to Macrolides, Lincosamides, and Streptogramin B	65
5.2 Combined Resistance to Macrolides and Streptogramin B.....	65
5.3 Resistance to Macrolides Only.....	66
5.4 Resistance to Lincosamides Only	66
5.5 Resistance to Streptogramin A Only	66
5.6 Resistance to Streptogramin B Only	66
5.7 Combined Resistance to Lincosamides, Pleuromutilins, and Streptogramin A	67
6. Aminoglycoside Resistance	67
7. Aminocyclitol Resistance	68
8. Streptothricin Resistance.....	68
9. Oxazolidinone Resistance	69
10. Trimethoprim Resistance.....	69
11. Sulfonamide Resistance	70
12. Fusidic Acid Resistance	70
13. Mupirocin Resistance.....	70
14. Fluoroquinolone Resistance	70
15. Rifampicin Resistance.....	73
16. Glycopeptide Resistance	73
17. Conclusion.....	75
Acknowledgments.....	75
References.....	75

CHAPTER 5 Biofilm Formation of *Staphylococcus aureus*..... 87

DANIEL VÁZQUEZ-SÁNCHEZ AND PEDRO RODRÍGUEZ-LÓPEZ

1. Introduction	87
2. Biofilms—An Overview.....	87
3. <i>Staphylococcus aureus</i> Biofilms	88
3.1 Initial Adherence	88
3.2 Biofilm Development: The Importance of the Extracellular Matrix	90
3.3 Biofilm Dispersion	93
4. Why Being in a Biofilm? Advantages of Multicellular Structures.....	94
4.1 Cell–Cell Communication.....	94
4.2 Increased Resistance to External Stimulus	95
4.3 Increased Dispersal Capacity	95
5. Multispecies <i>Staphylococcus aureus</i> —Carrying Biofilms.....	95
6. Biofilm Producing <i>Staphylococcus aureus</i> in the Food Industry	96

7. Conclusion.....	97
References.....	97
CHAPTER 6 Methods for the Identification, Characterization, and Tracking the Spread of <i>Staphylococcus aureus</i>	105
MARIA DE LOURDES RIBEIRO DE SOUZA DA CUNHA	
1. Introduction.....	105
2. Identification and Characterization of <i>Staphylococcus aureus</i> by Phenotypic Methods.....	106
2.1 Culture-Based Methods and Biochemical Tests.....	106
2.2 Automated Systems.....	108
2.3 Matrix-Assisted Laser Desorption/Ionization Time-of-Flight.....	109
2.4 Antimicrobial Susceptibility Testing.....	110
3. Identification and Characterization of <i>Staphylococcus aureus</i> by Genotypic Methods.....	112
3.1 Polymerase Chain Reaction/Real-Time Polymerase Chain Reaction-Based Methods.....	112
3.2 Microarray-Based Methods.....	113
3.3 Sequence-Based Methods Including Next-Generation Sequencing Techniques.....	114
4. Genotyping Methods for Molecular Epidemiology of <i>Staphylococcus aureus</i>	115
4.1 <i>spa</i> Typing.....	116
4.2 Multilocus Sequence Typing.....	116
4.3 Multiple-Locus Variable Number of Tandem Repeat Analysis.....	117
4.4 Pulsed-Field Gel Electrophoresis.....	117
4.5 Staphylococcal Cassette Chromosome <i>mec</i> Typing.....	118
5. Methods for Detection of Staphylococcal Enterotoxins.....	118
5.1 Immunological Methods.....	119
5.2 Molecular Biological Techniques.....	120
5.3 Other Staphylococcal Enterotoxin Detection Methods.....	121
6. Conclusion.....	121
References.....	122

PART III STAPHYLOCOCCUS AUREUS FROM FARM TO FORK— FOOD SAFETY ASPECTS

CHAPTER 7 <i>Staphylococcus aureus</i> as a Leading Cause of Foodborne Outbreaks Worldwide	129
---	------------

JACQUES-ANTOINE HENNEKINNE

1. Introduction.....	129
2. History.....	129

3. Characteristics and Behavior of <i>Staphylococcus aureus</i> in the Food Environment.....	131
3.1 <i>Staphylococcus aureus</i> Biotypes and Reservoirs.....	132
3.2 Means of Contamination.....	133
3.3 Potential for Methicillin-Resistant <i>Staphylococcus aureus</i> Contamination and Transmission.....	135
4. Factors Influencing the Growth of <i>Staphylococcus aureus</i> in Food.....	135
4.1 Water Activity (a_w).....	136
4.2 pH.....	137
4.3 Redox Potential.....	137
4.4 Temperature.....	138
4.5 Nutritional Factors and Bacterial Antagonism.....	138
5. Staphylococcal Food Poisoning Outbreaks: Symptomatology; Reporting System including the US and EU Control; Monitoring Schemes and Occurrence.....	138
5.1 Symptomatology and Toxic Dose.....	138
5.2 Reporting System and Occurrence of Staphylococcal Food Poisoning Outbreaks in the European Union.....	139
5.3 Reporting System and Occurrence in the United States.....	140
6. Conclusion.....	141
References.....	141

CHAPTER 8 ***Staphylococcus aureus* From Farm to Fork: Impact From a Veterinary Public Health Perspective..... 147**

CATHERINE M. LOGUE AND CLAIRE B. ANDREASEN

1. Introduction.....	147
2. <i>Staphylococcus aureus</i> in Animals Used for Food Production.....	147
2.1 General Overview.....	147
2.2 <i>Staphylococcus aureus</i> in Poultry.....	148
2.3 <i>Staphylococcus aureus</i> in Swine.....	149
2.4 <i>Staphylococcus aureus</i> in Cattle and Small Ruminants.....	149
3. Antimicrobial Resistance in <i>Staphylococcus aureus</i> and the Emergence of Methicillin-Resistant <i>Staphylococcus aureus</i>	150
3.1 General Overview.....	150
3.2 Methicillin-Resistant <i>Staphylococcus aureus</i> Associated With Poultry.....	151
3.3 Methicillin-Resistant <i>Staphylococcus aureus</i> Associated With Swine.....	152
3.4 Methicillin-Resistant <i>Staphylococcus aureus</i> Associated With Cattle.....	152
3.5 Methicillin-Resistant <i>Staphylococcus aureus</i> in Livestock—Factors Contributing to Selection and Spread.....	153
4. Summary and Conclusion.....	153
References.....	154

CHAPTER 9 *Staphylococcus aureus* and Methicillin-Resistant *Staphylococcus aureus* in Workers in the Food Industry 163

BIRGIT STROMMINGER, FRANZISKA LAYER AND GUIDO WERNER

1. Introduction	163
2. <i>Staphylococcus aureus</i> and Methicillin-Resistant <i>Staphylococcus aureus</i> Colonization in Humans	164
2.1 <i>Staphylococcus aureus</i> Carriage	164
2.2 Methicillin-Resistant <i>Staphylococcus aureus</i> in General and Hospital-Associated Methicillin-Resistant <i>Staphylococcus aureus</i>	165
2.3 Community-Associated Methicillin-Resistant <i>Staphylococcus aureus</i>	165
2.4 Livestock-Associated Methicillin-Resistant <i>Staphylococcus aureus</i>	166
3. Molecular Epidemiology of Colonizing <i>Staphylococcus aureus</i> Isolates	166
3.1 Clonality of <i>Staphylococcus aureus</i>	166
3.2 Clonality of Hospital-Associated Methicillin-Resistant <i>Staphylococcus aureus</i>	166
3.3 Clonality of Community-Associated Methicillin-Resistant <i>Staphylococcus aureus</i>	167
3.4 Clonality of Livestock-Associated Methicillin-Resistant <i>Staphylococcus aureus</i>	167
4. Colonizing <i>Staphylococcus aureus</i> and Methicillin-Resistant <i>Staphylococcus aureus</i> : Their Enterotoxigenic Potential and Involvement in Staphylococcal Foodborne Outbreaks	167
4.1 Enterotoxin Gene Content of Colonizing <i>Staphylococcus aureus</i> and Methicillin-Resistant <i>Staphylococcus aureus</i>	167
4.2 Colonizing Enterotoxigenic <i>Staphylococcus aureus</i> as Cause of Staphylococcal Foodborne Outbreaks	168
5. Are Workers in the Food Industry Different?	169
5.1 Workers Exposed to Living Animals at Slaughterhouses	170
5.2 Butchers and Food Handlers Exposed to Raw Meat	170
5.3 Food Handlers Not Exposed to the Previous Risk Factors	171
6. Summary and Conclusion	176
References	177

CHAPTER 10 Molecular Epidemiology of *Staphylococcus aureus* Lineages in the Animal-Human Interface 189

MYRIAM ZARAZAGA, PAULA GÓMEZ, SARA CEBALLOS AND CARMEN TORRES

1. Introduction	189
2. Genome Structure of <i>Staphylococcus aureus</i>	190
3. The Emergence of <i>Staphylococcus aureus</i> Lineage CC398	191
3.1 Historical Aspects and Characteristics of <i>Staphylococcus aureus</i> CC398. A Problem of Public Health	191

3.2 Pig Origin of Methicillin-Resistant <i>Staphylococcus aureus</i> CC398: First Hypothesis	192
3.3 Origin and Host Adaptation: First Jump From Humans to Pigs	193
4. New <i>Staphylococcus aureus</i> CC398 Emerging Topics Arising in the Last Few Years	194
4.1 Livestock-Associated Methicillin-Resistant <i>Staphylococcus aureus</i> CC398 in Humans Without Animal Contact. Human-to-Human Transmission	194
4.2 Second Jump From Animals to Humans. Acquisition of Immune Evasion Cluster: Readaptation to Humans	195
4.3 Emerging of Methicillin-Susceptible <i>Staphylococcus aureus</i> CC398, Mainly of <i>spa</i> -type t571	196
4.4 Acquisition of Panton-Valentine leukocidin by CC398 Strains (Methicillin-Susceptible <i>Staphylococcus aureus</i> and Methicillin-Resistant <i>Staphylococcus aureus</i>)	197
4.5 A Novel Hybrid Livestock-Associated Methicillin-Resistant <i>Staphylococcus aureus</i> CC9/CC398 Genotype and Foodborne Transmission	197
5. Other <i>Staphylococcus aureus</i> Lineages at the Animal-Human Interface	198
5.1 <i>Staphylococcus aureus</i> Lineage CC9	198
5.2 <i>Staphylococcus aureus</i> Lineage CC130	199
5.3 <i>Staphylococcus aureus</i> Lineage CC97	201
5.4 <i>Staphylococcus aureus</i> Lineage CC1	202
6. Summary and Conclusion	202
Acknowledgments	203
References	203

PART IV PREVENTION AND CONTROL OF *STAPHYLOCOCCUS AUREUS* IN THE FOOD CHAIN

CHAPTER 11 Hygiene Principles to Avoid Contamination/Cross-Contamination in the Kitchen and During Food Processing.....217

MARCO EBERT

1. Introduction	217
2. Good Hygiene Praxis and Hazard Analysis Critical Control Point Principles	218
3. Temperature-Related Food Hygiene Principles	219
3.1 Maintenance of the Cold Chain	220
3.2 Holding Temperatures	225
4. Personal Hygiene and Training of Staff	225
4.1 Personal Hygiene	226
4.2 Training	229

5. Preventive Measures Against <i>Staphylococcus aureus</i> in Consumer's Households	230
6. Conclusion	231
References	232
CHAPTER 12 Inactivation of <i>Staphylococcus aureus</i> in Foods by Thermal and Nonthermal Control Strategies	235
DANA ZIUZINA, AGATA LOS AND PAULA BOURKE	
1. Introduction	235
2. Inactivation of <i>Staphylococcus aureus</i> by Thermal Processing	236
2.1 Inactivation of <i>Staphylococcus aureus</i> by New Thermal Technologies	239
3. Inactivation of <i>Staphylococcus aureus</i> by Novel Nonthermal Technologies	245
3.1 Ultrasound	245
3.2 High-Pressure Processing	245
3.3 Pulsed Electric Fields	246
3.4 Ultraviolet	246
3.5 Pulsed Light	246
3.6 Irradiation	247
3.7 Nonthermal Plasma (Cold Plasma)	247
4. Inactivation of <i>Staphylococcus aureus</i> by Nonthermal Technologies Combined With High Temperature	247
5. Conclusion	248
References	249
CHAPTER 13 Mitigation Strategies to Combat <i>Staphylococcus aureus</i> in the Food Chain: International Food Standards, Guidelines, and Codes of Practice	257
SANDRA M. TALLENT AND JOHN F. SHEEHAN	
1. Introduction	257
2. Regulations/Policies/Standards for Coagulase-Positive <i>Staphylococci</i> Enumeration Regarding Food Safety: Acceptable Levels of <i>Staphylococcus aureus</i> in Different Foods or Food Types	258
2.1 The United States of America	259
2.2 Canada	261
2.3 The European Union	261
2.4 Turkey	262
2.5 Russia and the Eurasian Customs Union	262
2.6 The Gulf Cooperation Council	263
2.7 China	263
2.8 Japan	264
2.9 India	264

List of Contributors

2.10 Peru	264
2.11 South Korea	265
2.12 Mexico	265
2.13 South Africa	266
2.14 Australia and New Zealand	266
3. Safeguarding Foods	266
3.1 Retail Foods and Foodservice Practices	267
3.2 Dairy Foods	267
3.3 Seafood	269
4. Microbial Risk Assessment Plans to Reduce <i>Staphylococcus aureus</i> Contamination	270
5. Summary and Conclusion	271
Acknowledgments	271
Annex	272
References	287
Further Reading	292
Index	293
