

CONTENTS

<i>Contributors</i>	xv
<i>Preface</i>	xxv
1. Renilla Luciferase-LC3 Based Reporter Assay for Measuring Autophagic Flux	1
T. Farkas and M. Jäättelä	
1. Introduction	2
2. The Rluc-LC3 Assay	4
3. Designing the Rluc-LC3wt and Rluc-LC3G120A Fusion Proteins	6
4. Establishing Rluc-LC3wt- and Rluc-LC3G120A-Expressing Cells	8
5. The Rluc-LC3 Assay Performed on Cell Lysates	9
6. The Rluc-LC3 Assay Performed on Live Cells	10
Acknowledgments	12
References	12
2. Measurement of Autolysosomal pH by Dual-Wavelength Ratio Imaging	15
A. Saric, S. Grinstein, and S.A. Freeman	
1. Introduction	16
2. Cell Preparation	22
3. Equipment Setup and Software Requirements	23
4. Image Acquisition	23
5. In Situ pH Calibration	24
6. Image Analysis and Determination of Autolysosomal pH	25
7. Conclusion	27
Acknowledgments	28
References	28
3. Long-Lived Protein Degradation During Autophagy	31
N. Dupont, C. Leroy, A. Hamaï, and P. Codogno	
1. Introduction	31
2. Proteolysis	32
3. Other Methods for Measuring Autophagic Flux	36
4. Conclusion	38
Acknowledgments	38
References	38

4. Proteomic Profiling of De Novo Protein Synthesis in Starvation-Induced Autophagy Using Bioorthogonal Noncanonical Amino Acid Tagging	41
J. Zhang, J. Wang, Y.-M. Lee, T.-K. Lim, Q. Lin, and H.-M. Shen	
1. Introduction	42
2. Materials, Equipment, and Solutions	44
3. Fundamentals: AHA Labeling Combined With the iTRAQ Approach for Identification of De Novo Protein Synthesis	47
4. Protocol	50
5. Limitations	58
References	58
5. Methods to Monitor and Manipulate TFEB Activity During Autophagy	61
D.L. Medina, C. Settembre, and A. Ballabio	
1. Introduction	62
2. Methods to Monitor TFEB/TFE3 Activation	65
Acknowledgments	77
References	77
6. Application of CRISPR/Cas9 to Autophagy Research	79
J. O'Prey, J. Sakamaki, A.D. Baudot, M. New, T. Van Acker, S.A. Tooze, J.S. Long, and K.M. Ryan	
1. Introduction	80
2. Establishment of a Constitutively Active CRISPR/Cas9 System for Deletion of Autophagy in Human and Murine Cells	83
3. Regulated Disruption of Autophagy Using Tetracycline-Inducible CRISPR/Cas9 Systems	91
4. Discussion	103
Acknowledgments	106
References	106
7. A Molecular Reporter for Monitoring Autophagic Flux in Nervous System In Vivo	109
K. Castillo, V. Valenzuela, M. Oñate, and C. Hetz	
1. Introduction	110
2. Assessing Autophagy Flux In Vitro	113
3. In Vivo Measurements of Autophagic Flux	116

4. Pharmacological Induction of Autophagy	119
5. Tissue Processing and Histology	120
6. Quantification of Fluorescent Puncta	122
7. Ex Vivo Analysis of LC3 Vesicle Trafficking	124
8. Concluding Remarks	125
Acknowledgments	127
References	127
8. Magnetic Resonance Spectroscopy to Study Glycolytic Metabolism During Autophagy	133
Y.-L. Chung, M.O. Leach, and T.R. Eykyn	
1. Introduction	134
2. Measurement of Intracellular Lactate and Glucose Levels in Autophagic Cells or Tumor Extracts	138
3. Measurements of the Rate of Lactate Secretion and Glucose Uptake in Cultured Cells	142
4. Hyperpolarization Methods for Dissolution DNP Using Pyruvic Acid	144
5. Discussion	150
Acknowledgments	151
References	151
9. Assessment of Glycolytic Flux and Mitochondrial Respiration in the Course of Autophagic Responses	155
V. Sica, J.M. Bravo-San Pedro, F. Pietrocola, V. Izzo, M.C. Maiuri, G. Kroemer, and L. Galluzzi	
1. Introduction	156
2. Cell Culture and Treatments	158
3. Common Procedures	158
4. Assessment of Glycolytic Flux: Principles	159
5. Assessment of Glycolytic Flux: Protocol	160
6. Assessment of Mitochondrial Respiration: Principles	161
7. Assessment of Mitochondrial Respiration: Protocol	162
8. Calibration and Run	163
9. Concluding Remarks	163
10. Notes	165
Acknowledgments	168
References	169

10. Methods to Assess Mitochondrial Morphology in Mammalian Cells Mounting Autophagic or Mitophagic Responses	171
S. Marchi, M. Bonora, S. Patergnani, C. Giorgi, and P. Pinton	
1. Introduction	172
2. High-Resolution Imaging of Mitochondria in Live Cells Based on Fluorescent Protein Variants	173
3. High-Resolution Imaging of Mitochondria in Live Cells With Mitochondrial-Specific Fluorescent Dyes	175
4. Analysis of the Results	177
5. Assessment of Mitochondrial Morphology Using Electron Microscopy	180
6. Summary	182
Acknowledgments	183
References	183
11. Monitoring Mitophagy in Mammalian Cells	187
L. Chen, K. Ma, J. Han, Q. Chen, and Y. Zhu	
1. Introduction	188
2. Transmission Electron Microscopy	188
3. Western Blotting Analysis of Mitophagy	190
4. Detected Mitophagy by Analysis Mitochondrial Mass	193
5. Fluorescence Probes	193
6. Mitophagy Mouse Models	199
7. MAM Assay	201
8. Mitophagy Inducers and Inhibitors	202
9. Future Perspectives	204
Acknowledgments	205
References	205
12. Cytofluorometric Assessment of Mitophagic Flux in Mammalian Cells and Tissues	209
L. Esteban-Martinez, B. Villarejo-Zori, and P. Boya	
1. Introduction	209
2. Mitophagy Evaluation in Cell Lines	211
3. Mitophagy Evaluation in Tissue	212
4. Assessment of Mitophagic Flux	215
5. Summary	216
Acknowledgments	216
References	216

13. Automated Analysis of Fluorescence Colocalization: Application to Mitophagy	219
A. Sauvat, H. Zhou, M. Leduc, L.C. Gomes-da-Silva, L. Bezu, K. Müller, S. Forveille, P. Liu, L. Zhao, G. Kroemer, and O. Kepp	
1. Introduction	220
2. Cell Culture and Treatments	221
3. Acquisition Procedure	222
4. Assessment of Colocalization: Principles	222
5. The R Environment	224
6. Assessment of Colocalization: Protocol	224
7. Concluding Remarks	225
8. Notes	226
Acknowledgments	229
References	229
14. Assays to Monitor Lysophagy	231
Y.-P. Chu, Y.-H. Hung, H.-Y. Chang, and W.Y. Yang	
1. Introduction	232
2. Known Experimental Triggers for Lysophagy	232
3. Experimental Protocol for Triggering Lysophagy With Light	234
4. Detection of Lysophagy	240
5. Conclusions	242
References	242
15. Kinetics of Protein Aggregates Disposal by Aggrephagy	245
S. Tan and E. Wong	
1. Introduction	246
2. Experimental Models of Protein Inclusions and Their Characteristics	249
3. Aggrephagy: Selective Clearance of Protein Aggregates	254
4. Methods to Measure Aggrephagy	260
5. Modulation of Autophagic Responses	261
6. Microscopic Analysis of Protein Inclusion Clearance by Aggrephagy	263
7. Biochemical Analysis of Protein Inclusion Turnover by Aggrephagy	270
8. Concluding Remarks	274
Acknowledgments	274
References	274

16. Methods to Study Chaperone-Mediated Autophagy	283
E. Arias	
1. Introduction	284
2. Methods to Test a Protein as Possible CMA Substrate	287
3. Methods to Assay CMA Activity	293
4. Concluding Remarks	301
Acknowledgments	302
References	302
17. Quantitative Assay of Macroautophagy Using Pho8Δ60 Assay and GFP-Cleavage Assay in Yeast	307
Y. Araki, S. Kira, and T. Noda	
1. Introduction to Pho8 Δ 60 Assay	308
2. Standard Method of Pho8 Δ 60 Assay	309
3. Genome Wide Pho8 Δ 60 Assay	314
4. GFP-Cleavage Assay for Autophagy	317
References	320
18. Monitoring the Formation of Autophagosomal Precursor Structures in Yeast <i>Saccharomyces cerevisiae</i>	323
R. Gómez-Sánchez, J. Sánchez-Wandelmer, and F. Reggiori	
1. Introduction	324
2. Standard Procedures	326
3. Recruitment of Atg Machinery to the PAS	335
4. Localization of Atg Proteins on Forming Autophagosomes	339
5. Bimolecular Fluorescence Complementation (BIFC)	340
6. Coimmunoprecipitation (Co-IP) Experiments	350
7. Concluding Remarks	354
Acknowledgments	355
References	355
19. Methods to Assess Autophagy and Chronological Aging in Yeast	367
K. Kainz, J. Tadic, A. Zimmermann, T. Pendl, D. Carmona-Gutierrez, C. Ruckstuhl, T. Eisenberg, and F. Madeo	
1. Introduction	368

2. Autophagy and Longevity: An Intimate Connection	369
3. Methods to Assess CLS in Yeast	373
4. Methods to Measure Nonselective Autophagy in Yeast	377
Acknowledgments	387
References	387
20. Methods to Measure Lipophagy in Yeast	395
A. Cristobal-Sarramian, M. Radulovic, and S.D. Kohlwein	
1. Introduction	396
2. Induction of Autophagy by Starvation	397
3. Visualization of LDs and Vacuoles In Vivo	398
4. Biochemical Assays to Monitor Lipophagy in Yeast	403
5. Isolation of Vacuoles From Yeast for Enzymatic Analyses	405
6. Electron Microscopy	407
7. Summary	408
Acknowledgments	409
References	409
21. Assays to Monitor Pexophagy in Yeast	413
W. Wang and S. Subramani	
1. Introduction	414
2. Assays to Monitor Pexophagy	415
3. Concluding Remarks	425
Acknowledgments	426
References	426
22. Monitoring Autophagic Responses in <i>Caenorhabditis elegans</i>	429
M.E. Papandreou and N. Tavernarakis	
1. Introduction	430
2. Reporters for Autophagy	431
3. Autophagy Induction and Suppression	435
4. Experimental Considerations	438
5. Experimental Procedures	439
6. Concluding Remarks	442
Acknowledgments	442
References	442

23. Characterization of Autophagic Responses in <i>Drosophila melanogaster</i>	445
T. Xu, S. Kumar, and D. Denton	
1. Introduction	446
2. Staging of Animals and Tissue Dissection	448
3. Morphological Monitoring of Autophagy by Transmission Electron Microscopy	451
4. Analysis of Autophagy Markers In Vivo	451
5. Biochemical Methods	458
6. Genetic Analysis	459
Acknowledgments	462
References	463
24. Methods to Study Autophagy in Zebrafish	467
E. Fodor, T. Sigmond, E. Ari, K. Lengyel, K. Takács-Vellai, M. Varga, and T. Vellai	
1. Introduction	468
2. Monitoring Autophagy in Zebrafish	470
3. Modulation of Autophagic Responses in Zebrafish	479
4. Experimental Procedures	487
5. Concluding Remarks	491
Acknowledgments	492
References	492
25. Biochemical Methods to Monitor Autophagic Responses in Plants	497
Y. Bao, Y. Mugume, and D.C. Bassham	
1. Introduction	497
2. Biochemical Assays for Autophagy Monitoring	500
Acknowledgments	509
References	509
26. Using Photoconvertible and Extractable Fluorescent Proteins to Study Autophagy in Plants	515
M.O. Abiodun and K. Matsuoka	
1. Introduction	516
2. Expression of KikGR Fusion Proteins in Tobacco BY-2 Cells	517

3. Photoconversion of KikGR and mKikGR Fusion Proteins in Transformed Tobacco Cells	518
4. Detection of Photoconverted and Nonconverted KikGR and mKikGR Fusion Proteins After Separation of Proteins by SDS-PAGE	520
5. Detection of Photoconverted and Nonconverted KikGR and mKikGR Fusion Proteins Using a Microscope	523
Acknowledgments	525
References	525
Author Index	527
Subject Index	565
