Preface

xxiii

1. Correlative Live Cell and Super Resolution Imaging of Autophagosome Formation	1
S.A. Walker, E. Karanasios, and N.T. Ktistakis	
1. Introduction	2
2. Live Cell Imaging	3
3. Correlative Super Resolution Imaging of Autophagosome Formation	6
Acknowledgments	19
References	19
2. Quantifying Autophagic Structures in Mammalian Cells Using Confocal Microscopy	21
C.A. Lamb, J. Joachim, and S.A. Tooze	
1. Introduction	22
2. Detection and Quantification of Autophagic Puncta in Fixed Mammalian Cells	24
3. Quantifying Starvation-Induced ATG9 Redistribution by Indirect Immunofluorescence and Confocal Microscopy	31
4. Quantification of ATG9 Compartment/Autophagosome Contact in Live Cells	36
Acknowledgments	41
References	41
3. The Use of DQ-BSA to Monitor the Turnover of Autophagy-Associated Cargo	43
L.S. Frost, A. Dhingra, J. Reyes-Reveles, and K. Boesze-Battaglia	
1. Introduction	44
2. Materials	45
3. Establishment of Polarized Epithelial Cell Cultures	47
4. Incorporation of DQ TM -BSA Conjugates	47
5. Monitoring Autolysosome Formation	47
6. Monitoring LC3-Associated Phagolysosome Formation	50
7. Immunofluorescence Analysis	51

8. Summary	52
Acknowledgments	53
References	53

4. Turnover of Lipidated LC3 and Autophagic Cargoes in Mammalian Cells 55

M. Rodríguez-Arribas, S.M.S. Yakhine-Diop, R.A. González-Polo,

M. Niso-Santano, and J.M. Fuentes

1. Introduction	56
2. Materials	58
3. Cell Culture, Treatments, and Sample Collection	62
4. Electrophoresis, Western Blot, and Data Analysis	64
5. Notes	67
Acknowledgments	69
References	69

5. High-Throughput Quantification of GFP-LC3⁺ Dots by Automated Fluorescence Microscopy 71

J.M. Bravo-San Pedro, F. Pietrocola, V. Sica, V. Izzo, A. Sauvat, O. Kepp,

M.C. Maluri, G. Kroemer, and L. Galluzzi

1. Introduction	72
2. Cell Culture	75
3. Generation of Stable GFP-LC3-Expressing Cells	75
4. Treatments	76
5. Image Analysis	77
6. Concluding Remarks	77
7. Notes	80
Acknowledgments	84
References	85

6. Use of pHlororin-mKate2-human LC3 to Monitor Autophagic Responses 87

I. Tanida, T. Ueno, and Y. Uchiyama

1. Introduction	88
2. Estimation of Autophagic Process Using pHlororin-mKate2-human LC3	90
3. Concluding Remarks	95
Acknowledgments	95
References	95

7. Production of Human ATG Proteins for Lipidation Assays	97
Y. Zheng, Y. Qiu, J.E.C. Gunderson, and B.A. Schulman	
1. Introduction	98
2. Expression of Human LC3B, ATG7, ATG3, ATG12~ATG5, and ATG16L1	99
3. Protein Purification	105
4. Storing Purified Proteins	111
5. Concluding Remarks	111
Acknowledgments	111
References	111
8. Investigating Structure and Dynamics of Atg8 Family Proteins	115
O.H. Weiergräber, M. Schwarten, B. Strodel, and D. Willbold	
1. Introduction	116
2. X-Ray Crystallography	117
3. NMR Spectroscopy	122
4. MD Simulations	126
5. Applications	130
6. Future Prospects	138
References	139
9. Methods for Studying Interactions Between Atg8/LC3/GABARAP and LIR-Containing Proteins	143
T. Johansen, Å.B. Birgisdóttir, J. Huber, A. Kniss, V. Dötsch, V. Kirkin, and V.V. Rogov	
1. Introduction	144
2. Discovering LIR-Containing Proteins and Defining LIRs	146
3. Characterization of Interactions Between Atg8/LC3/GABARAP and LIR-Containing Peptides	158
4. Summary and Future Outlook	165
Acknowledgments	166
References	166
10. Assessment of Posttranslational Modifications of ATG proteins	171
Y. Xie, R. Kang, and D. Tang	
1. Introduction	172
2. Monitoring PTMs of ATG Proteins Using Western Blotting	173
3. Monitoring PTMs of ATG Proteins Using Simple Western™ Assays	175
4. Monitoring PTMs of ATG Proteins Using Immunoprecipitation Assays	181

5. Monitoring PTMs of ATG Proteins Using Immunofluorescence Assays	183
6. Concluding Remarks	186
Acknowledgments	187
References	187
11. Tagged ATG8-Coding Constructs for the In Vitro and In Vivo Assessment of ATG4 Activity	189
C. López-Otín and G. Mariño	
1. Introduction	190
2. The Atg4-Atg8 System and Its Unexpected Evolutionarily Acquired Complexity	191
3. Monitoring Atg8-Like Proteins Processing in the Context of Autophagic Flux Analysis	194
4. Construction of Mammalian Expression Vectors Including Tagged Atg8 Proteins for Cleavage Assays	195
5. Transfection of Cultured Cells for the Analysis of Atg4-Like Activity	197
6. Hydrodynamic Delivery-Based Expression of Atg8-Like Tagged Constructs for the Analysis of Atg4-Like Activity in Live Animals	200
7. Concluding Remarks	203
Acknowledgments	204
References	204
12. Measurement of the Activity of the Atg4 Cysteine Proteases	207
M. Li, Y. Fu, Z. Yang, and X.-M. Yin	
1. Introduction	208
2. The Structure and Regulatory Machinery of Atg4	210
3. Overview of the Methods to Detect the Atg4 Activity In Vitro and Ex Vivo	211
4. Expression and Purification of Atg4 and Atg8 Proteins for In Vitro Assays	213
5. Measurement of Atg4 Activity In Vitro and Ex Vivo	215
6. Kinetics Analysis of Atg4 Enzymes	219
7. Summary	222
Acknowledgments	222
References	223
13. Crystallographic Characterization of ATG Proteins and Their Interacting Partners	227
Y. Qiu, Y. Zheng, A.M. Taherbhoy, S.E. Kaiser, and B.A. Schulman	
1. Introduction	228
2. Domain Structures of Atg Proteins in the UBL Conjugation Pathway	230

3. Proteins That Have Been Crystallized in the UBL Conjugation System in Autophagy	231
4. Crystallization of <i>Saccharomyces cerevisiae</i> Atg7 Alone or in Complex With Atg3 or Atg10	232
5. Crystallization of Human ATG5-ATG16L1 (1-69) E122D Disease-Associated Mutant	239
Acknowledgment	244
References	244
14. Dynamics of Atg5-Atg12-Atg16L1 Aggregation and Deaggregation	247
P. Kharaziha and T. Panaretakis	
1. Introduction	248
2. Experimental Conditions	250
3. Atg5-Atg12-Atg16L1 Reporter Systems	251
4. Conclusion	254
References	255
15. Fluorescent FYVE Chimeras to Quantify PtdIns3P Synthesis During Autophagy	257
S.M.S. Yakhine-Diop, G. Martínez-Chacón, R.A. González-Polo, J.M. Fuentes, and M. Niso-Santano	
1. Introduction	258
2. Cell Culture Conditions	261
3. Transient Transfection of Plasmid	262
4. Autophagy Assay Conditions	264
5. Detection by Fluorescence Microscopy	264
6. Quantification of PtdIns3P Puncta Formation	265
7. Concluding Remarks	265
8. Notes	266
Acknowledgments	267
References	267
16. Quantification of Phosphatidylinositol Phosphate Species in Purified Membranes	271
A. Jeschke, N. Zehethofer, D. Schwudke, and A. Haas	
1. Introduction	272
2. Detection and Quantification of PI(3)P and PI(4)P in Lysosomes or Autophagosomes by PIP-Binding Proteins	274

3. Quantification of PIPs In Lysosome Preparations by RP-HPLC-MS	282
4. Results and Discussion	285
Acknowledgments	289
References	289
17. Mass Assays to Quantify Bioactive PtdIns3P and PtdIns5P During Autophagic Responses	293
J. Viaud, G. Chicanne, R. Solinhac, K. Hnia, F. Gaits-iacovoni, and B. Payastre	
1. Introduction	293
2. Preparation of Recombinant Proteins	298
3. Lipid Extraction From Biological Samples	301
4. Purification of Phosphatidylinositol Monophosphates	304
5. Quantification of PtdIns3P by Mass Assay	306
6. Quantification of PtdIns5P by Mass Assay	308
Acknowledgments	309
References	309
18. Fluorescence-Based Assays to Analyse Phosphatidylinositol 5-Phosphate in Autophagy	311
M. Vicinanza, M.J. Gratian, M. Bowen, and D.C. Rubinsztein	
1. PI(5)P Role in Autophagy	312
2. Microscopy-Based Detection of PI(5)P	315
3. Manipulations of PI(5)P Levels to Visualize PI(5)P During Autophagy	318
4. Super-Resolution Structured Illumination Microscopy (SR-SIM) to Visualize PI(5)P During Autophagy	321
5. Concluding Remarks	328
Acknowledgments	328
References	328
19. Ultrastructural Characterization of Phagophores Using Electron Tomography on Cryoimmobilized and Freeze Substituted Samples	331
J. Biazik, H. Vihinen, E. Jokitalo, and E.-L. Eskelinen	
1. Introduction	332
2. Cryoimmobilization	334
3. Materials and Methods	335
4. Results	337
5. Discussion	342

Acknowledgments	346
References	346
20. A Simple Cargo Sequestration Assay for Quantitative Measurement of Nonselective Autophagy in Cultured Cells	351
M. Luhr, P. Szalai, F. Sætre, L. Gerner, P.O. Seglen, and N. Engedal	
1. Introduction	352
2. Measuring Nonselective Autophagic Sequestration of Cytosol in Cultured Cells	353
3. Concluding Remarks	362
Acknowledgments	363
References	363
21. In Vitro Reconstitution of Autophagosome-Lysosome Fusion	365
J. Diao, L. Li, Y. Lai, and Q. Zhong	
1. Introduction	366
2. SNARE Protein Purification	367
3. Protein Reconstitution	370
4. Fluorescent Measurement	372
5. Single-Vesicle Assay	373
6. Summary	374
Acknowledgments	375
References	375
22. In Vitro Reconstitution of Atg8 Conjugation and Deconjugation	377
D. Fracchiolla, B. Zens, and S. Martens	
1. Introduction	378
2. Methods for In Vitro Atg8 Lipidation	379
References	388
23. Study of ULK1 Catalytic Activity and Its Regulation	391
B. Stork and J. Dengjel	
1. Introduction	392
2. Detection of Phospho-ULK1 Variants by Immunoblotting	393
3. Analysis of ULK1 Phosphorylation by Mass Spectrometry	397
4. Analysis of ULK1 Inhibitors by In Vitro Kinase Assays	400
5. Summary	402
Acknowledgments	403
References	403

24. Evaluating the mTOR Pathway in Physiological and Pharmacological Settings	405
S. Hong and K. Inoki	
1. Introduction	406
2. Functional Readouts and Inhibitors for the mTOR Pathway	409
3. Methods	410
4. Concluding Remarks	424
Acknowledgments	425
References	425
25. Methods to Study the BECN1 Interactome in the Course of Autophagic Responses	429
M. Antonioli, F. Ciccocanti, J. Dengjel, and G.M. Fimia	
1. Introduction	430
2. Materials	431
3. Methods	433
Acknowledgments	443
References	443
26. In Vitro Characterization of VPS34 Lipid Kinase Inhibition by Small Molecules	447
F. Fassy, C. Dureuil, A. Lamberton, M. Mathieu, N. Michot, B. Ronan, and B. Pasquier	
1. Introduction	448
2. Purification of Recombinant VPS34 Proteins	450
3. Catalytic Assay	451
4. Binding Assay	454
5. Crystallization	457
6. Cell Assay	458
7. Conclusion	461
Acknowledgments	462
References	462
27. Methods to Study Lysosomal AMPK Activation	465
C.-S. Zhang, M. Li, and S.-C. Lin	
1. Introduction	466
2. Analysis of Lysosomal Localization of AXIN/LKB1	467
3. In Vitro Reconstitution of Lysosomal AMPK Activation	473

Acknowledgment	477
References	477
28. Allosteric Modulation of AMPK Enzymatic Activity: In Vitro Characterization	481
J. Ward, A.R. Reyes, and R.G. Kurumbail	
1. Introduction	482
2. Notes About Key Reagents	489
3. Assays for Measuring Allosteric Activation of AMPK	491
4. Steady-State Kinetic Analysis of AMPK Activators	496
5. Assays for Monitoring Phosphorylation at Thr172 of the α -Subunit	498
6. Activation-Protection Assay	501
7. Summary	503
References	503
29. Assessing the Catalytic Activity of Transglutaminases in the Context of Autophagic Responses	511
M. D'Eletto, M.G. Farrace, M. Piacentini, and F. Rossin	
1. Introduction	512
2. TG Transamidating Activity Assay	513
3. Analysis of TG2 Degradation During Autophagy	516
4. Analysis of TG2 Interaction With p62 During Autophagy	517
References	519
Author Index	521
Subject Index	549
