

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. Encapsulating Proteins in Nanoparticles: Batch by Batch or One by One	1
Yi Liu and Aoneng Cao	
1. Introduction	2
2. "Batch-by-Batch" Encapsulation of Proteins in Silica NPs	3
3. "One-by-One" Encapsulation of Proteins in NPs	14
4. Summary and Outlook	24
Acknowledgments	28
References	28
2. Enzyme Adsorption on Nanoparticle Surface Probed by Highly Sensitive Second Harmonic Light Scattering	33
Anindita Das, Abhijit Chakrabarti, and Puspendu K. Das	
1. Introduction	34
2. Techniques for Probing Nanoparticle-Protein Interaction	36
3. Second Harmonic Light Scattering	37
4. Sample Preparation	43
5. Interaction of ADH With GNPs	45
6. Interaction of Insulin With GNPs	50
7. Stoichiometry of the Protein-GNP Conjugate	50
8. Summary and Future Outlook	52
Acknowledgment	53
References	53
3. Armoring Enzymes by Metal-Organic Frameworks by the Coprecipitation Method	59
Miao Hou and Jun Ge	
1. Introduction	60
2. Equipment	64
3. Materials	65
4. Protocol	65
5. Safety	65

6. Step1: Preparation of Enzyme@MOF	66
7. Step2: Preparation of Buffers	67
8. Step3: Purification of the Product	69
9. Step4: Characterization of Enzyme@MOF	69
10. Step5: Measurement of Enzyme Loading in MOFS	70
11. Step6: Analysis of the Location of Enzymes in MOFS	71
12. Step7: Determination of Enzyme Activities	72
13. Conclusions	73
References	74
4. Enzyme Armoring by an Organosilica Layer: Synthesis and Characterization of Hybrid Organic/Inorganic Nanobiocatalysts	77
M. Rita Correro, Sabine Sykora, Philippe F.-X. Corvini, and Patrick Shahgaldian	
1. Introduction	78
2. Equipments and Chemicals	80
3. Safety Guidelines	81
4. Procedures	81
5. Conclusions	90
Acknowledgments	90
References	90
5. Strategies for Biophysical Characterization of Protein-Polymer Conjugates	93
Cameron Williams, Melissa L. Dougherty, Katherine Makaroff, Jacob Stapleton, Dominik Konkolewicz, Jason A. Berberich, and Richard C. Page	
1. Introduction	94
2. Biophysical Methods	98
3. Conclusions	110
Acknowledgments	110
References	111
6. Guide to the Preparation of Molecularly Imprinted Polymer Nanoparticles for Protein Recognition by Solid-Phase Synthesis	115
Jingjing Xu, Paulina X. Medina-Rangel, Karsten Haupt, and Bernadette Tse Sum Bui	
1. Introduction	116
2. Protocols	120
3. Physicochemical Characterization of MIP-NPs	128

4. Evaluation of the Binding Characteristics of MIP-NPs Using a Quartz Crystal Microbalance	129
5. MIP-NPs Protect Enzyme From Thermal and pH Denaturation	133
6. Concluding Remarks	136
7. Notes	136
Acknowledgments	139
References	139
7. Armored Urease: Enzyme-Bioconjugated Poly(acrylamide) Hydrogel as a Storage and Sensing Platform	143
Konda R. Kunduru, S.N. Raju Kutcherlapati, Dhamodaran Arunbabu, and Tushar Jana	
1. Introduction	144
2. Reversible Immobilization	146
3. Jack Bean Urease: Active Site	147
4. Immobilization of Jack Bean Urease	148
5. Methodology	150
6. Results and Discussion	157
7. Conclusions and Future Perspectives	165
Acknowledgments	166
References	166
8. Armored Enzyme–Nanohybrids and Their Catalytic Function Under Challenging Conditions	169
Omkar V. Zore, Rajeswari M. Kasi, and Challa V. Kumar	
1. Introduction	170
2. Methods: Synthesis of Bienzyme–Polymer Conjugates	175
3. Methods: Synthesis of Bienzyme–Polymer–Graphene Oxide (GOx–HRP–PAA/GO) Hybrid Materials	177
4. Characterization	179
5. Conclusions	188
Acknowledgments	190
References	190
9. Approaches for Conjugating Tailor-Made Polymers to Proteins	193
Matthew Paeth, Jacob Stapleton, Melissa L. Dougherty, Henry Fischesser, Jerry Shepherd, Matthew McCauley, Rebecca Falatach, Richard C. Page, Jason A. Berberich, and Dominik Konkolewicz	
1. Introduction	194
2. Polymer Synthetic Procedures	200
3. Protein Conjugation Methods—Amine Based	208

4. Polymer Conjugation by GT Using Click Approaches	214
5. Conjugate Characterization Methods	215
6. Conclusions	219
References	219
10. NanoArmoring of Enzymes by Polymer-Functionalized Iron Oxide Nanoparticles	225
Gayan Premaratne, Leslie Coats, and Sadagopan Krishnan	
1. Introduction	226
2. NanoArmoring by Making Polymer-Enzyme Conjugates	229
3. MNP-Polymer-Enzyme Conjugates	230
4. Covalent vs Noncovalent Immobilization of Peroxidase Active Proteins on PolyMNPs. What Difference Does It Make in the Electrocatalytic Activity and Kinetics?	242
5. Effect of MNP Size on Activity and Recovery of GOx (Park, McConnell, Boddohi, Kipper, & Johnson, 2011)	249
6. Summary	253
7. Future Outlook	253
Acknowledgments	254
References	254
11. Expression of Cellulolytic Enzyme as a Fusion Protein That Reacts Specifically With a Polymeric Scaffold	259
Priya Katyal, Yongkun Yang, Olga Vinogradova, and Yao Lin	
1. Introduction	260
2. Materials	265
3. Methods	266
4. Future Outlook	274
Acknowledgments	274
References	274
12. Nanoarmoring of Proteins by Conjugation to Block Copolymer Micelles	277
Nisaraporn Suthiwangcharoen and Ramanathan Nagarajan	
1. Introduction	278
2. Synthesis of Block Copolymer-Protein (BSA) Conjugate	284
3. Characterization of Block Copolymer-Protein Conjugate	290
4. Characterization of Protein-Polymer Conjugate Micelle	298
5. Conclusions	302
Acknowledgments	302
References	302

13. Semisynthetic Enzymes by Protein–Peptide Site-Directed Covalent Conjugation: Methods and Applications	305
Jose M. Palomo	
1. Introduction	306
2. Protein–Peptide Site-Directed Covalent Conjugation	307
3. The New Semisynthetic Lipases in Biotransformations	311
4. Conclusions	315
Acknowledgments	315
References	315
14. Transglutaminase-Mediated Nanoarmoring of Enzymes by PEGylation	317
Antonella Grigoletto, Anna Mero, Katia Maso, and Gianfranco Pasut	
1. Introduction	318
2. Materials and Reagents	321
3. Methods	324
References	345
15. Polymer-Based Protein Engineering: Synthesis and Characterization of Armored, High Graft Density Polymer–Protein Conjugates	347
Sheiliza Carmali, Hironobu Murata, Chad Cummings, Krzysztof Matyjaszewski, and Alan J. Russell	
1. Introduction	348
2. Protocols	357
3. Protein–Polymer-Based Engineering	370
4. Conclusions	375
Acknowledgment	375
References	375
16. Nano-Armoring of Enzymes: Rational Design of Polymer-Wrapped Enzymes	381
Kishore Raghupathi and Sankaran Thayumanavan	
1. Introduction	382
2. Covalent Conjugation	383
3. Electrostatic Complexation	393
4. Noncovalent Entrapment	401
5. Conclusions	408
Acknowledgments	409
References	409

17. Nanoarmored Enzymes for Organic Enzymology: Synthesis and Characterization of Poly(2-Alkyloxazoline)-Enzyme Conjugates	413
Melanie Leurs and Joerg C. Tiller	
1. Introduction	414
2. Synthesis of Poly(2-Alkyloxazoline)s With an NH ₂ End Group	416
3. Conjugation of Enzymes With Poly(2-Alkyloxazoline)s	424
4. Conjugate Characterization	427
5. Activity Evaluation of Poly(2-Alkyloxazoline)-Enzyme Conjugates	438
6. Conclusions	440
Acknowledgments	441
References	441
18. Preparation and Applications of Dendronized Polymer-Enzyme Conjugates	445
Andreas Küchler, Daniel Messmer, A. Dieter Schlüter, and Peter Walde	
1. Introduction	447
2. The Denpol <i>de</i> -PG2	450
3. The Denpol-Enzyme Conjugate <i>de</i> -PG2-BAH-proK	461
4. Synthesis and Characterization of Denpols Carrying Other Types of Enzymes	468
5. Immobilization of <i>de</i> -PG2-BAH-proK on Silicate Surfaces	468
6. Entrapment of Denpol-Enzyme Conjugates Inside Phospholipid Vesicles	471
7. Conclusions and Outlook	471
Acknowledgments	473
References	473
19. Nanoarmoring of Enzymes by Interlocking in Cellulose Fibers With Poly(Acrylic Acid)	475
Caterina M. Riccardi, Rajeswari M. Kasi, and Challa V. Kumar	
1. Introduction	476
2. Equipment and Reagents	482
3. Methods	484
4. Conclusions	498
Acknowledgments	499
References	499
Author Index	501
Subject Index	527
