List of Contributors	xiii
Author Biographies	xv
Preface	xxvii
Introduction	xxix

1. Retrovirus Receptor Interactions and Entry

Lorraine M. Albritton

Envelope Glycoproteins: Domain Structure	2
Retrovirus Entry Receptors	4
Virus Attachment	10
The Basics of Membrane Fusion	13
Do Receptor Interactions Contribute to the Envelope Proteins Functions That Drive Entry?	16
Do Env-Receptor Interactions Contribute to Pathogenesis?	23
Host Defenses That Inhibit Retroviral Entry Also Drive Envelope Protein Variation	26
Coevolution of Virus and Receptor	28
Captured Retroviral Envelope Proteins in the Development of Mammalian Placenta and Male Muscle Mass	30
References	31

2. Cellular Factors That Regulate Retrovirus Uncoating and Reverse Transcription

Stephen P. Goff

A Brief Description of Early Events of Infection	53
Monitoring the Course of Infection in Early Stages	56
Host Factors Promoting Early Events of Infection	62
Host Factors Restricting Infection in Early Stages of Infection	71
Sensing and Responding to Infection: Innate Immunity	85
Applications for Therapy	88
Conclusions: Parting Words	89
References	90

3. Nucleoporins in Retroviral Replication: What's Nup Got to Do with It?

Anne Monette and Andrew J. Mouland

Nuclear Pore Complexes, Nucleoporins, and Nucleocytoplasmic Transport	114
Nucleoporins Implicated in Retroviral Replication	115
Caution: Depletion of Any Single Multifunctional Nup Can Modify Overall NPC Architecture	138
The Importance of FG-Repeat Nups to Disease	139
Viruses Commonly Cause the Displacement of FG-Nups to Remodel NPCs	142
Acknowledgments	143
References	143

4. Virus-Host Interactions in Retrovirus Integration

Alan N. Engelman and Goedeke N. Maertens

Introduction	163
Integrase-Interacting Proteins	167
Lentiviruses	167
Lens Epithelium-Derived Growth Factor/p75	167
Hepatoma-derived Growth Factor Like 2 (HDGFL2)	170
Gammaretroviruses	170
Bromodomain and Extra-Terminal Domain Proteins	171
Deltaretroviruses	172
B'-Protein Phosphatase 2A (PP2A)	173
Gag-Interacting Proteins	177
HIV-1 CA-Interacting Proteins	177
Foamy Virus	179
Allosteric IN Inhibitors That Target the LEDGF/p75-IN Interaction	180
Conclusions	182
Acknowledgments	183
References	183

5. Transcriptional Control and Latency of Retroviruses

Bryan C. Nikolai and Andrew P. Rice

Introduction	200
Retroviral Integration Occurs at Transcriptionally Active Sites in Host Genome	200
Transcriptional Regulation by Endogenous Retroviruses	201
Retroviral Genome Complexity Confers a Benefit for Transcriptional Regulation	203
Transcriptional Control of HIV-1	209
HIV-1 Latent Infection	214

Future Research of Retroviral Transcription	217
Acknowledgments	218
References	219
6. Teetering on the Edge: The Critical Role of RNA Processing Control During HIV-1 Replication	
<i>Ahalya Balachandran, Liang Ming and Alan Cochrane</i>	
Introduction	229
Role of hnRNPs in the Regulation of HIV-1 RNA Processing	231
Role of SR Proteins in the Regulation of HIV-1 RNA Processing	236
Manipulation of HIV-1 RNA Processing With Small Molecules	240
Acknowledgments	245
References	245
7. Cellular RNA Helicases Support Early and Late Events in Retroviral Replication	
<i>Gatikrushna Singh, Xiao Heng and Kathleen Boris-Lawrie</i>	
RNA Helicase and Retroviruses in the Advent of "Omics Technology"	258
Early Events: Reverse Transcription and Integration	259
DHX9/RNA Helicase A Activity in the Genomic RNP	259
MOV10 Activity in Virions Remains Undefined	262
Late Events: Provirus Transcription, Primary RNA Processing, Export, Translation, Formation of Genomic RNP	262
Nuclear Cap-Binding Proteins and RNA Helicase: Translation Evading Nonsense RNA-Mediated Decay	265
Steady-State Translation: Switching 5'Cap-Binding Proteins to Gain eIF4E	266
Therapeutic Targeting at the Interface of RNA Helicase and Cognate Retroviral RNA	267
References	268
8. Role of Host Factors in the Subcellular Trafficking of Gag Proteins and Genomic RNA Leading to Virion Assembly	
<i>Eunice C. Chen and Leslie J. Parent</i>	
Introduction	274
Nuclear Export of Viral RNAs	275
Retroviral Genome Trafficking in the Cytoplasm	279
Retroviral Gag Protein Trafficking	281
Factors That Interact With Gag or Viral RNA to Restrict Virus Replication	296
Concluding Remarks	298
Acknowledgments	299
References	299

9. Tumor Suppressor Gene 101: A Virus' Multifunctional Conduit to the ESCRT Trafficking Machinery

Carol A. Carter

Introduction	318
Tumor Suppressor Gene 101 Structure	323
Tumor Suppressor Gene 101 Participation	328
Cellular Factors That Work With Tumor Suppressor Gene 101	330
Tumor Suppressor Gene 101 Role in Budding of Other Viruses	335
Questions Remaining	339
Acknowledgments	340
References	340

10. The Role of Lipids in Retroviral Replication

Abdul A. Waheed and Eric O. Freed

Introduction	353
Lipids in Retroviral Entry	360
Retroviral Assembly	363
Lipids in Retroviral Cell-Cell Transfer	375
Inhibition of Retroviral Replication With Lipid-Modifying Agents	379
Concluding Remarks	381
References	382

11. Cellular Immune Responses to Retroviruses

Susan R. Ross

Introduction	401
Steps of the Retrovirus Infection Pathway Targeted by the Host Intrinsic/Innate Response	402
Host Pathways Implicated in Cellular Control of Retrovirus Infection	406
Subversion of Cellular Immune Responses by Retroviruses	412
Conclusions	414
References	414

12. Noncoding RNAs in Retrovirus Replication

Alice A. Duchon and Karin Musier-Forsyth

Introduction	421
Host RNAs Packaged Into Virions	423
Long Noncoding RNA and Endogenous Retroviruses	434
Functional Transactivating Response Element RNAs	439
RNA Interference and miRNAs	440
Therapeutics	450
Concluding Remarks	453
Acknowledgments	453
References	453

13. Cellular Control of Endogenous Retroviruses and Retroelements

Suzanne Sandmeyer

Introduction	480
Background	480
Activity	486
Control of Retroelement Expression	488
Regulation of Retroelements by the Innate Immune System	502
Perspectives	507
Acknowledgments	509
References	510

14. Strategies to Discover Novel Cellular Factors Involved in Retrovirus Replication

*Rebecca J. Kaddis Maldonado, Eunice C. Chen
and Leslie J. Parent*

Introduction	528
Identifying Protein-Protein Interactions in Retroviruses Using Two-Hybrid Screens	528
Mass Spectrometry Approaches to Discovery of Retrovirus-Cell Protein-Protein Interactions	536
Mass Spectrometry Using Viral DNA as Bait	541
Mass Spectrometry Using Viral RNA as Bait	542
RNA Interference and Genome-Wide Screens to Assess the Contribution of Host Factors to Virus Replication	544
Host Genome Editing Using CRISPR/Cas-9 to Find Retrovirus Dependency Genes	549
Gain-of-Function Genetic Approaches Using cDNA Overexpression Screens	550
Identification of Cellular RNAs That Interact With Retroviruses	550
Concluding Remarks	554
Acknowledgments	560
References	560

Index	569
