## Section I

### Human diseases: in vivo and in vitro models

#### 1. Drosophila: a model for biotechnologist

K. RAVI RAM AND D. KAR CHOWDHURI

|                                   |    |
|-----------------------------------|----|
| Summary                           | 3  |
| What you can expect to know       | 3  |
| Introduction                      | 3  |
| History                           | 7  |
| Principle                         | 8  |
| Methodology                       | 8  |
| Protocols                         | 9  |
| Ethical issues                    | 11 |
| Translational significance        | 11 |
| Clinical significance             | 11 |
| Turning point                     | 14 |
| World Wide Web resources          | 15 |
| Acknowledgments                   | 16 |
| References                        | 16 |
| Further reading                   | 17 |
| Glossary                          | 17 |
| Abbreviations                     | 18 |
| Long answer questions             | 18 |
| Short answer questions            | 18 |
| Answers to short answer questions | 18 |
| Yes/no type questions             | 18 |
| Answers to yes/no type questions  | 18 |

#### 2. Animal models of tuberculosis

DEVYANI DUBE, RAJEEV SHARMA, NISHI MODY, MADHU GUPTA,  
UDITA AGRAWAL AND SURESH P. VYAS

|                                                              |    |
|--------------------------------------------------------------|----|
| Summary                                                      | 21 |
| Introduction                                                 | 21 |
| Comparative pathology of tuberculosis in humans and animals  | 22 |
| Pathogen diversity: crossing species barriers                | 23 |
| Host diversity: fundamental processes and fine-tuning        | 23 |
| Animal models of tuberculosis: limits and lessons            | 24 |
| Animal models: contributions in tuberculosis vaccine testing | 24 |
| Various animal models                                        | 25 |

|                                   |    |
