Preface xi

1. Defining Multiple Stressor Implications

SERGI SABATER, ARTURO ELOSEGI, RALF LUDWIG

- 1.1 Global Environmental Change: A Source of Stress 1
- 1.2 Stress, Stressor, Receptor, and Effect: Context and Evolution of the Terms 2
- 1.3 Types of Stressors According to Their Energy and Frequency 3
- 1.4 Multiple Stressors in the Literature 6
- 1.5 Studying the Effects of Multiple Stressors 8
- 1.6 Ecosystem Responses to Multiple Stressors 12
- 1.7 Joint Implications of Multiple Stressors for Social and Ecological Systems 13
- 1.8 Status and Relevance of Multiple Stressors on Water Policies: A Brief Overview 15
- 1.9 Reading This Book 17
- Acknowledgments 18
- References 18
- Further Reading 22

2. Climate Change and Interactions With Multiple Stressors in Rivers

SHERRI L. JOHNSON, BROOKE E. PENALUNA

- 2.1 Introduction 23
- 2.2 Observations and Predictions of Climate Change in Rivers 24
- 2.3 Climate Change in Rivers: Similarities to Existing Stressors and Surprises 30
- 2.4 Vulnerability of River Ecosystems: An Example of Drought as a Manifestation of Climate Change in Addition to Other Stressors 34
- 2.5 Concluding Remarks 38
- Acknowledgments 38
- References 38
- Further Reading 43

3. Understanding the Nexus Between Hydrological Alteration And Biological Invasions

ALBERT RUHL, JANE A. CATFORD, WYATT F. CROSS,
DANIEL ESCORIZA, JULIAN D. OLDEN

- 3.1 Altered Flow Regimes and Biological Invasions: Two Facets of Global Change in River Ecosystems 45
- 3.2 The Alteration-Invasion Nexus 46
- 3.3 Effects of the Alteration-Invasion Nexus on Riverine Populations and Communities 49
- 3.4 Effects of the Alteration-Invasion Nexus on Riverine Food Webs 52
- 3.5 The Alteration-Invasion Nexus as a Freshwater Conservation Challenge 57
- Acknowledgments 59
- References 59
- Further Reading 63

4. Multiple Stressors and Hydromorphological Degradation

ARTURO ELOSEGI, CHRISTIAN K. FELD, MICHAEL MUTZ,
DANIEL VON SCHILLER

- 4.1 Introduction 65
- 4.2 Interactions Among Hydrological and Morphological Stressors 67
- 4.3 Interaction Between HYMO Modifications and Other Non-HYMO Stressors 71
- 4.4 Conclusions and Perspectives 74
- References 75

5. Multiple Stressors in Riparian Ecosystems

JOHN C. STELLA, JACOB BENDIX

- 5.1 Stress and Disturbance in Riparian Systems 81
- 5.2 Natural and Anthropogenic Stressors in Riparian Systems 85
- 5.3 Multiple Stressor Interactions: Directionality and Magnitude 92

- 5.4 Riparian Stressor Interactions: Some Examples 99
- 5.5 Multiple Stressor Challenges for River Corridor and Riparian Management 103
- References 105

6. Water Scarcity as a Driver of Multiple Stressor Effects

NICK R. BOND, RYAN M. BURROWS, MARK J. KENNARD,
STUART E. BUNN

- 6.1 Definitions 111
- 6.2 Drivers of Water Scarcity 112
- 6.3 The Importance of Baseflows 113
- 6.4 Physical and Ecological Responses to Flow Reductions 115
- 6.5 Interactions With Other Stressors 119
- 6.6 Case Studies 120
- 6.7 Mitigating the Effects of Multiple Stressors in Water Scarce Regions 123
- 6.8 Future Research Needs and Opportunities 124
- 6.9 Concluding Remarks 125
- References 126
- Further Reading 129

7. An Introduction to the Geography of Multiple Stressors

ARTURO ELOSEGI, SERGI SABATER, RALF LUDWIG

- 7.1 Introduction 131
- 7.2 Methodology for a Geography of Multiple Stressors 132
- 7.3 Emerging Patterns and Some Recommendations 134
- References 136
- Further Reading 137

8. Water Stressors in Europe: New Threats in the Old World

TERESA FERREIRA, LIDIJA GLOBEVNIK, RAFAELA
SCHINEGGER

- 8.1 Stressors in Europe: An Old Problem With a New Perspective 139

- 8.2 Stressor Overview for Europe 142
- 8.3 When Stressors Meet 147
- 8.4 A Challenge for Water Body Managers 148
- Acknowledgments 154
- References 154
- Further Reading 155

9. Multiple Stressors in North America: Perspectives for the New World

S. MAŽEIKA P. SULLIVAN, DAVID W.P. MANNING,
JEANNINE-MARIE ST JACQUES,
RODRIGO MONCAYO-ESTRADA

- 9.1 Introduction 157
- 9.2 Major Stressors 161
- 9.3 Additional Considerations and Conclusions 171
- References 173
- Further Reading 178

10. Multiple Stressors in African Freshwater Systems

KELLY FOUCHY, MICHAEL E. MCCLAIN, JOHN CONALLIN,
GORDON O'BRIEN

- 10.1 Introduction 179
- 10.2 Stressors in African River Systems 181
- 10.3 Ecological Status of Rivers 184
- 10.4 Regional Summaries 185
- 10.5 Conclusion 188
- Acknowledgments 188
- References 188
- Further Reading 191

11. Multiple Stressors in China's Freshwater Ecoregions

YIXIN ZHANG, NOEL JUVIGNY-KHENAFUO, HONGYONG
XIANG, QIAOYAN LIN, ZHIJIE WU

- 11.1 Introduction 193
- 11.2 Regionalization—Habitats 193
- 11.3 Regionalization—Stressors 195
- 11.4 Future Trends 199
- 11.5 Conclusion 202
- References 202
- Further Reading 204

12. Multiple Stressors in the Neotropical Region: Environmental Impacts in Biodiversity Hotspots

BLANCA RÍOS-TOUMA, ALONSO RAMÍREZ

- 12.1 Introduction 205
- 12.2 Stressors in Neotropical River Systems 206
- 12.3 Conclusion 217
- References 217
- Further Reading 220

13. Multiple Stressors in Australia and New Zealand: Key Stressors and Interactions

CHRISTOPH D. MATTHAEI, JEREMY J. PIGGOTT

- 13.1 Introduction 221
- 13.2 Key Stressors in Streams and Rivers and Projected Changes in Stressor Intensities 222
- 13.3 Interactions Among Key Stressors 228
- 13.4 Conclusions and Outlook 229
- References 230

14. Detecting and Quantifying the Impact of Multiple Stress on River Ecosystems

SEBASTIAN BIRK

- 14.1 Introduction 235
- 14.2 Manipulative Experiments 238
- 14.3 Field-Based Observational Studies 242
- 14.4 Synthesis 245
- Appendix Scientific Articles Addressing Manipulative Multistressor Experiments Reviewed in This Chapter 247
- References 252

15. Application of a Multistressor Risk Framework to the Monitoring, Assessment, and Diagnosis of River Health

JONATHAN C. MARSHALL, PETER M. NEGUS

- 15.1 Introduction 255
- 15.2 A Cause-Effect Conceptual Framework for Multiple Stressors That Underpins River Health Diagnosis 258
- 15.3 Q-Catchments—A Practical Program of Diagnostic, Multistressor River Health Assessment 259

15.4 Case Study of Q-Catchments Application: The Warrego River 270

15.5 The Role of Diagnostic Multistressor River Health Assessments in Water Policy and Management 276

15.6 Options for Future Improvements 277

Acknowledgments 278

References 278

Further Reading 280

16. Projecting the Consequences of Climate Change on River Ecosystems

JENS KIESEL, BJÖRN GUSE, HELGE BORMANN

- 16.1 Theoretical Background of Climate Change Impacts on Riverine Stressors 281
- 16.2 Model-Based Predictions of Climate Change Impacts on River Ecosystems: Two Case Studies From Northern Germany 285
- 16.3 Concluding Remarks 296
- References 298
- Further Reading 301

17. Managing Ecosystem Services Under Multiple Stresses

VICENÇ ACUÑA, XAVIER GARCIA

- 17.1 Ecosystem Services in the Multistressor Framework 303
- 17.2 Effects of Multiple Stressors on Ecosystem Services 305
- 17.3 Management for the Resilience of Ecosystem Services to Multiple Stressors 306
- 17.4 Illustrative Case Study: The Degradation and Rehabilitation of the Yarqon River 306
- 17.5 Conclusions 311
- References 311

18. Multi-Stressor Effects on Riverine Drinking Water Production and Management

IANIS DELPLA, MANUEL J. RODRIGUEZ

- 18.1 Introduction 315
- 18.2 Impacts of Multistressed Rivers on Drinking Water in a Changing Climate 316

- 18.3 Management Tools and Approaches to Mitigate the Effects of Multistressed Rivers on Drinking Water Production 320
- 18.4 Assessing Inequalities in Population Exposure to Contaminants Associated to Multistressed Rivers 326
- 18.5 Concluding Remarks 330
- References 331
- Further Reading 333

19. Socio-Economic and Policy Implications of Multi-Stressed Rivers: A European Perspective

PHOEBE KOUNDOURI, EBUN AKINSETE, STELLA TSANI

- 19.1 Introduction 335
- 19.2 Sustainable Development Goals and EU Water Policies 336
- 19.3 The Water Framework Directive: Design, Implementation and Assessment 339
- 19.4 The WFD Programs of Measures as a Multiple-Pressure Targeting Tool 341
- 19.5 Economic Valuation of Water Resources: An Ecosystem Services Approach 342
- 19.6 Concluding Remarks 348
- Acknowledgments 349
- References 349
- Further Reading 351

20. An Integrated Perspective of Multiple Stressors in River Ecosystems From the Catchment to the Continental Scale

ALBERTO PISTOCCHI

- 20.1 The Protection of Aquatic Ecosystems in River Basin Management 353
- 20.2 Ecological Status: A Multicriteria Judgment 355
- 20.3 Integration Modeling of Multiple Stressors 364
- 20.4 From Integration Modeling to Integrated Management 368
- 20.5 Concluding Remarks 370
- References 371

21. Summary, Implications and Recommendations for the Occurrence and Effects of Multiple Stressors in River Ecosystems

SERGI SABATER, ARTURO ELOSEGI, RALF LUDWIG

- 21.1 Effects of Multiple Stressors: Evidences and Challenges 375
- 21.2 Implications of Multiple Stressors Certainties and Gaps 377
- 21.3 Recommendations for Researchers, Managers and Policy Makers 378
- References 379
- Further Reading 380
