

CONTENTS

Contributors	vii
Preface	ix
1. Natural Variation of the Circadian Clock in <i>Neurospora</i>	1
Bala S.C. Koritala and Kwangwon Lee	
1. Introduction	2
2. <i>Neurospora</i> in Nature	3
3. The Circadian Clock of <i>Neurospora</i>	7
4. Natural Variation and the Circadian Clock	17
5. Future Challenges	23
6. Concluding Remarks	25
Acknowledgments	27
References	27
2. Natural Variation and Genetics of Photoperiodism in <i>Wyeomyia smithii</i>	39
William E. Bradshaw and Christina M. Holzapfel	
1. Introduction	40
2. Genetics of Photoperiodic Response	44
3. Photoperiodism and Climate Change	52
4. Photoperiodism and Circadian Rhythmicity	54
5. Conclusions	64
Acknowledgments	66
References	66
3. Natural Variation in Human Clocks	73
Malcolm von Schantz	
1. Introduction	74
2. Direct Measurement of Human Period	75
3. Proxies of Human Period	76
4. Extremes of Human Circadian Period	78
5. Genetic Control of Circadian Rhythms in Mammals	79
6. Genetic Studies of Circadian Rhythm Sleep Disorders	82
7. Genetic Associations With Measured Behavioral Rhythms	85

8. Single-Gene Association Studies of Questionnaire-Determined Human Chronotype	86
9. GWAS of Circadian Phenotype	87
10. Suggestions of Population Differences in Human Clocks	89
References	90

ix

1. Natural Variation of the Circadian Clock in Neurospora	91
1.1. Introduction	91
1.2. Methods in Neurospora	92
1.3. The Circadian Clock in Neurospora	93
1.4. Natural Variation and the Circadian Clock	94
1.5. Future Challenges	95
1.6. Concluding Remarks	96
1.7. Acknowledgments	97
1.8. References	98

2. Natural Variation and Genetics of Photoperiodism in <i>Myosotis sylvatica</i>	99
2.1. Introduction	99
2.2. Genetics of Photoperiodism	100
2.3. Photoperiodism and Climate Change	101
2.4. Photoperiodism and Circadian Rhythmicity	102
2.5. Conclusions	103
2.6. Acknowledgments	104
2.7. References	105

3. Natural Variation in Human Clocks	107
3.1. Introduction	107
3.2. Direct Measurement of Human Phenotype	108
3.3. Proxy of Human Phenotype	109
3.4. Examples of Human Clocks	110
3.5. Genetic Control of Circadian Rhythms in Mammals	111
3.6. Genetic Studies of Circadian Rhythm Sleep Disorders	112
3.7. Genetic Association with Mammalian Behavioral Rhythms	113
